M. D. Anderson Radiation Treatment Center in Katy

For many people with cancer, radiation treatment is a daily routine. In the hands of experts at The University of Texas M. D. Anderson Cancer Center, it's an important step in ensuring the best possible outcome.

Working in collaboration with CHRISTUS St. Catherine Hospital, M. D. Anderson brings patient care excellence and the latest in radiation oncology therapy beyond the Texas Medical Center and into your neighborhood.

The Radiation Treatment Center in Katy provides radiation oncology services on the campus of CHRISTUS St. Catherine Hospital. This treatment center offers convenience, direct appointment scheduling and free parking for radiation patients in the Katy area.

Everyone treated at the center receives the best combination of M. D. Anderson's wide range of cancer expertise and local care. Every patient's treatment plan is reviewed by a team of cancer experts that includes the radiation oncologist and specialists at M. D. Anderson's main campus.

The latest treatments, technologies

The center features the latest technology and approaches to deliver the highest quality patient care possible, including a linear accelerator, computerized tomography simulation, ultrasound, three-dimensional treatment planning and intensity modulated radiation.

The M. D. Anderson team

Our staff members, trained and employed by M. D. Anderson, are led by Gregory Chronowski, M.D., assistant professor of radiation oncology. The Katy care team includes radiation therapists, dosimetrists, radiation physicists, nurses, patient service coordinators and business office specialists who provide a full range of radiation oncology services and the same quality of care you've come to expect from M. D. Anderson.

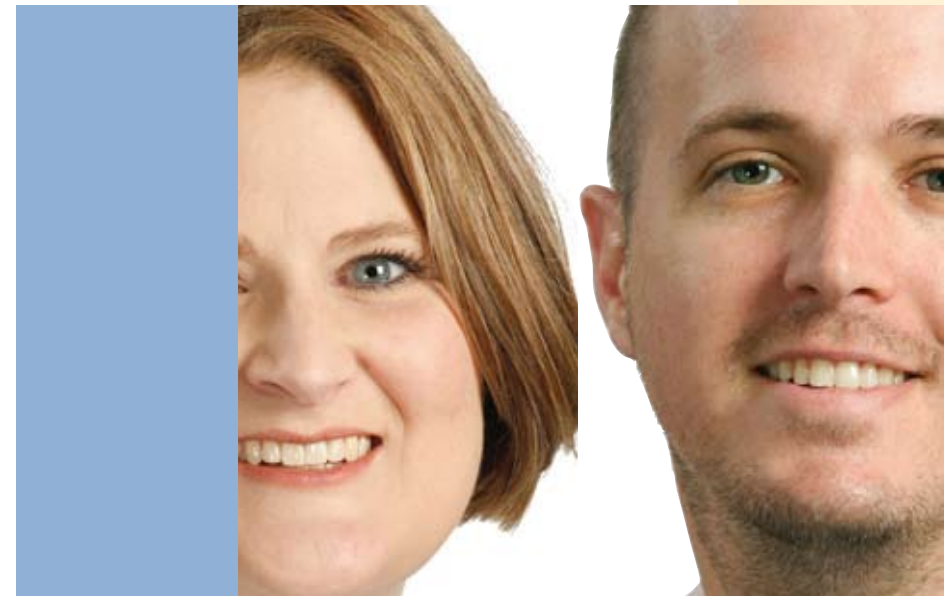

Dr. Chronowski is board certified by the American Board of Radiology and has a broad background in treating all adult cancers with radiation. He also has experience using intensity modulated radiation therapy to treat selected tumors, prostate brachytherapy, and combining radiation with chemotherapy for some tumors.

In order to provide the highest level of patient care, Dr. Chronowski works primarily at the Radiation Treatment Center in Katy.

Collaborative approach to care

The center has the capacity to treat more than 30 patients each day and is available to serve current M. D. Anderson patients, as well as others in Katy in need of radiation treatment.

By selecting the center as your place of treatment, you become a patient of M. D. Anderson's Division of Radiation Oncology while remaining under the primary care of your personal physician or referring specialist. Dr. Chronowski and his staff will work directly with your physicians to tailor an individual treatment plan to your needs, keeping them informed throughout your treatment experience.

How to contact us

The Radiation Treatment Center in Katy is open 8 a.m. to 5 p.m., Monday through Friday. To schedule an appointment or to speak with a member of our team, contact the center directly at 713-563-9600 or toll-free at 866-423-2129. Let us show you what a great neighbor we are.
