

Hind Rafei, M.D.

Hometown: Lebanon

Undergraduate: American University of Beirut

Medical School: American University of Beirut

Residency: The George Washington University

What are your career goals?

I would like to pursue an academic career that combines translational research with clinical activity. My goal is to contribute to the delivery of innovative immunotherapies to cancer.

Why did you choose MD Anderson?

Simply, it is MD Anderson!

How has MD Anderson helped you in achieving your goals?

MD Anderson has provided me with tremendous opportunities to grow and develop the expertise I am looking for. The program is extremely supportive and focused on teaching, mentoring and training the next generation of leaders. The opportunity to care for a diverse patient population and working closely with world leaders in the field allows for an unparalleled training.

What do you like best about MD Anderson's fellowship program?

People are extremely friendly and helpful. The fellowship staff are very dedicated and supportive. The program leadership have track records in training brilliant fellows. The ability to practice in different clinical settings is unique.

What do you like about living in Houston?

You will never get bored living here!

What has surprised you most about living in Houston?

The abundance of dogs in this city!

What do you like to do outside of medicine?

Painting, reading, writing, ballet dancing, playing chess, traveling.
