

## Clinical Observership in the Department of Radiation Oncology

### Things to Know about Observing in Radiation Oncology

- To participate in observership in Radiation Oncology, you must have been invited by a faculty mentor who agrees to host you for the duration of your observation experience.
- There are two types of observership opportunities:
  - Observer
    - [Read about the institutional requirements.](#)
    - Six to thirty consecutive days for appointment (with a maximum of 30 days (2 weeks on any given service))
    - Observers are strictly limited to a “hands in pockets” observation and are prohibited from taking part or participating in any research or clinical activities.
    - Observers are not granted system access and these appointments are unpaid.
    - Fee: \$1000
  - STEP (Short-Term Educational Experience) Observer
    - Term limit is a maximum of 5 consecutive calendar days (Monday through Friday).
    - STEP Observers are strictly limited to a “hands in pockets” observation and are prohibited from taking part or participating in any research or clinical activities.
    - STEP Observers are not granted system access and these appointments are unpaid.
    - Fee: \$100

### NOTES:

- Applicants from [sister institutions](#) should contact the [Global Academic Programs](#) before completing any paperwork.
- Fees do not apply to full-time trainees or students (residents, fellows, graduate students, etc.)
