Exercise improves our health, reduces the risk of cancer, diabetes and heart disease and is a critical component to maintaining a healthy weight. For cancer survivors, there is another important benefit supported by scientific research: Exercise can reduce the risk of recurrence and improves overall survival from certain cancers.

Studies show exercise is safe and beneficial for most cancer patients and survivors. Evidence is strongest that exercise can help reduce the risk of recurrence of breast, colon, glioma, ovarian, and prostate cancers. In fact, studies suggest women with breast cancer who exercise regularly have improved survival rates. However, most of these studies are observational and more research is needed.

Independent of how much someone exercises, emerging research is also showing sedentary behavior has negative health consequences. In fact, physical inactivity seems to have an effect similar to that of smoking or obesity - increasing the chances of developing non-communicable diseases, such as cardiovascular disease, diabetes and cancer. Researchers found physical inactivity caused 10 percent of the burden of disease for both breast and colon cancers.

Remaining active during cancer treatment can:
• Decrease cancer-related fatigue.
• Restore muscle strength and mobility following cancer surgery, radiation therapy, chemotherapy or stem cell transplants.
• Decrease bone loss from hormonal therapies or radiation.
• Improve sleep quality.
• Help manage depression and anxiety.
• Reduce many long-term and late effects of cancer treatments.

Exercise also has important biological and physiological effects that are important for remaining cancer free. Exercise can:
• Reduce fat stores in the body, eliminating cancer-causing substances stored in those fat cells.
• Regulate the body’s balance of hormones, potentially leading to growth of certain tumors when imbalanced.
• Reduce the amount of sugar circulating through the blood stream, which causes our body to release insulin and other substances that can contribute to inflammation of certain tissues - stimulating cancer growth.
• Increase the number and function of natural killer cells in the blood stream.

Exercise-related guidelines suggested by the American Institute for Cancer Research and recommended by MD Anderson’s Integrative Medicine Program encourage participation in at least 150 minutes of moderate or 75 minutes of vigorous physical activity each week. Moderate exercise causes heavier breathing, but allows you to carry on a basic conversation - during vigorous activity it becomes difficult to carry on a conversation.

Here are 5 tips to incorporate more exercise into your life:
1. Park farther away for grocery shopping, doctors’ appointments, or at work.
2. Take the stairs; walk up and down escalators.
3. Take brief walk breaks throughout the workday and conduct walking meetings.
4. Put exercise equipment in front of your TV.
5. Stand more when working, watching TV, or talking on the phone.

Talk to your physician to see if participating in an exercise program would be beneficial and appropriate. Our Senior Physical Therapist can evaluate your current fitness level and work to establish a feasible and safe exercise program. To make an appointment at the Integrative Medicine Center, ask your MD Anderson physician to submit an online consultation request. For additional details, visit www.mdanderson.org/integrativemed.
# Group Clinical Services

All Classes are free.
Please call **713-794-4700** to sign up.

## Physical

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Nutrition Lecture</td>
<td>Learn about the special nutritional needs for cancer patients, information on organic foods, and more.</td>
</tr>
<tr>
<td>Cooking Class</td>
<td>Participants will observe as a dietitian makes dishes in our demo kitchen, then have the chance to enjoy some delicious samples.</td>
</tr>
<tr>
<td>Brief Relaxation Massages</td>
<td>Experience a brief upper body massage for relaxation. These chair massages are generously funded by Angie’s Spa.</td>
</tr>
<tr>
<td>Tai Chi</td>
<td>Find balance and strength through continuous flowing movements that link mind to body.</td>
</tr>
<tr>
<td>Get Moving</td>
<td>Recharge and energize with uplifting music and a blend of yoga, dance and martial arts.</td>
</tr>
<tr>
<td>Pilates</td>
<td>Come learn and practice a series of exercises in deep muscle strengthening that improve skeletal alignment overall and flexibility.</td>
</tr>
<tr>
<td>Yoga (Hatha)</td>
<td>Develop strength and flexibility during a sequence of postures while focusing on the breath as well as cultivate relaxation and mindfulness through meditation and breathing exercises.</td>
</tr>
<tr>
<td>Gardening 101</td>
<td>Join expert instructors from Urban Harvest for a lesson on gardening basics. Learn to plan, nurture, and harvest warm-season vegetables so that you can experience the benefits of gardening at your own home.</td>
</tr>
</tbody>
</table>

## Mind-Body

<table>
<thead>
<tr>
<th>Activity</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Music for Health</td>
<td>Discover new ways to reduce stress, improve mood, and decrease fatigue! Each week learn a different skill and how to utilize your favorite music to improve your health.</td>
</tr>
<tr>
<td>Tibetan Bon Meditation</td>

Individual Clinical Services

An MD Anderson physician’s order is required before scheduling any of the services listed below. For additional details, please call 713-794-4700 or visit our clinic at R1.2000, which is a free-standing facility east of the Main Building near valet.

Integrative Oncology Physician Consultation
Our physicians will provide guidance on a comprehensive and integrative approach to your cancer care.

Health Psychology Consultation
A licensed clinical psychologist will provide both evaluation and interventions to help with lifestyle change and address symptoms of stress, anxiety and depression.

Nutrition Consultation
A registered dietitian provides personalized nutrition counseling and education to help patients manage side effects and reach their goals during and after cancer treatment. Education emphasizes a whole foods, plant-based diet for optimal health.

Exercise/Physical Activity Consultation
Being more physically active may benefit patients during and after cancer treatment by decreasing fatigue and improving strength. A senior physical therapist provides recommendations on achieving safe and optimal exercise during each consultation.

Acupuncture
Acupuncture is a safe and often effective medical treatment that can be used to manage side effects from cancer and related treatments, including nausea and vomiting, pain, neuropathy, hot flashes, fatigue and dry mouth. Initial visit fee will range from $85 to $100. Follow-up visits range from $45 to $100.

Oncology Massage Treatment
Oncology massage may help patients address anxiety, relieve pain, decrease fatigue and improve sleep quality. Services are by appointment for patients and their caregivers with a treatment fee of $70.

Music Therapy
Benefits of music therapy include, encouraging self-expression, reducing stress, improving coping skills and implementing protocols to improve cognitive, motor, communications and socialization skills. Initial visit fee is $50. Follow-up visits range from $25 to $50.

Meditation Consultation
Meditation decreases anxiety and negative emotions, improves sleep and memory and increases spiritual awareness and a sense of well-being. Initial visit fee is $50. Follow-up visits range from $25 to $50.

Friends of Integrative Medicine proudly presents

Spices and Health
Lecture and Book Signing

Monday, April 20, 2015
Registration: 6 – 6:30 p.m.
Talk: 6:30 – 7:30 p.m.

Featuring: Bharat Aggarwal, PhD
Professor, Department of Experimental Therapeutics
The University of Texas MD Anderson Cancer Center

Join Bharat Aggarwal, PhD, as he talks about the research and therapeutic uses of spices to boost your health. Enjoy some food samples prepared with some of the spices he will discuss. Dr. Aggarwal will also be available to sign his book “Healing Spices” following his talk. (Books available for purchase at the event).

Location:
South Campus Research Building 2
Conference Rooms 5 – 6
7455 Fannin Street, Houston, TX 77054

Free Parking:
Enter parking lot from OST, between Fannin and Bertner. Go straight and the surface parking lot will be on your left. The event will be held in the building on your right.

Light hors d’oeuvres donated by Hippo Kitchen

Free (event donations accepted at registration)
RSVP: KMTaniguchi@mdanderson.org
