A non-English speaking patient needs to be consented on a research study

Has the consent already been translated into the patient’s language?

Use the translated consent

Have 2 patients speaking this language been consented for this study using a Verbal Translation Preparative Sheet (VTPS)?

Contact IRB Help to have the consent translated into the language

Is there a VTPS form available in the language?

Patient and a witness will read and sign the VTPS

The study chair (or person obtaining consent), translator, and witness (if not the translator) sign the English consent

The patient must NOT sign the English Consent

Please note, at this time iConsent cannot be used if a VTPS is being used
