Tips to quit tobacco

Get ready

Select a guit date and make it special. Try to reduce your tobacco use before your guit date.

Get support

Ask family and friends to support you. Ask your doctor to prescribe a medication for smoking cessation or your employer to help you find a cessation program.

Learn new skills and hehaviors

Change daily routines to break away from tobacco triggers. Get your teeth cleaned and try peppermints, sunflower seeds or gum to keep your mouth busy.

Consider nicotine replacement therapy

Nicotine replacement products are sold over the counter and by prescription, and can double your chances of guitting. Speak with your doctor about what may be right for you.

 Be prepared for relapse or difficult situations It may take multiple attempts to quit.
