**III. Comments:**

9. Comments regarding significant changes from previous year's corresponding quarter.

As a result of COVID, the institution implemented a strategic position management committee to review and approve replacement positions using established workload metrics. This has resulted in a slight decrease in the institution's overall headcount/FTEs as compared to last year.

**FTE limitation: 753.9**

10. Explanation of Exceeding the Limitation on State Employment Levels.

The increase in FTE above the cap is required to support the continuing growth in patient care, research and support services at MD Anderson Cancer Center (MDACC). These additional employees will allow MDACC to continue to provide the institution's standard of care and service to the increasing number of cancer patients. The source of funds for the salaries and benefits of the additional FTEs is Health Related Patient Income.

**IV. Management-to-staff Ratio:**
