FALL/WINTER 2018

☐ 9/12/18 Safe Laboratory Practices
   Chavaun H. LeBlanc
   Biological safety practices are essential to keep in compliance with the institutional and federal rules, and to keep the lab as a safer work place. This RCR seminar will describe the requirements for compliance and will serve as a reminder for the implementation of fundamentals biosafety practices.

☐ 10/10/18 Research Misconduct and Policies for Handling Misconduct
   William Plunkett, PhD
   A discussion of the basic components of research misconduct in the course of research activities -- falsification, fabrication and plagiarism; questionable research practices; the various agency definitions of misconduct; how to report occurrences; and the roles and responsibilities of the whistleblower.

☐ 11/14/18 Communication and Difficult Conversations
   Diana Anderson, Ombuds Office
   A discussion of how postdocs can use communication and diplomatic skills to navigate some aspects of the research environment, particularly when conversations between postdocs and their mentors/supervisors is a difficult or sensitive topic.

☐ 12/12/18 Ethical Issues in Biomedical Research
   Ishwariah Subbiah, MD, MS
   A discussion of the ethical standards for research, including the principles of respect, beneficence and justice.

☐ 1/9/19 Collaborative Science
   Timothy McDonnell, MD, PhD
   The aspects of developing and maintaining research collaborations, including communicating and establishing the parameters of the collaboration (e.g., authorship determinations and sharing of the data and materials) as well as collaboration between researchers from academic and industry.

☐ 2/13/19 TBD
