Total number of semester credit hours 90

**Applicants to the one-year program in Molecular Genetic Technology should have the majority of prerequisite courses completed at the time of application.** The prerequisite courses may be taken at any regionally accredited college/university with a grade of C- or better. Courses are listed using the Texas Common Course Numbering System (tccns.org).

Admissions into the program is competitive. Learn more at mdanderson.org/SHPapply.
Frequently Asked Questions

1. When do I turn in my admission application for Fall 2024?
The application will be available starting September 15, 2023. You should submit the application, transcripts of each college attended, essay and three professional recommendation forms before the priority deadline of April 1, 2024. To ensure documents are received before the priority deadline, it’s recommended that you apply months before the deadline.

2. Can I apply for Spring or Summer admissions?
No. Students enter the Molecular Genetic Technology program once a year in the Fall semester.

3. I've not finished with all the prerequisite courses. Can I still apply for admission?
Yes, if the majority of the prerequisite courses are completed, you may apply for admission. The more prerequisite courses you have completed at the time of application, the better.
Admitted students must have no more than 3 missing prerequisite courses by the first day of enrollment in the School of Health Professions.

For this purpose, please note that a science course with a corresponding lab, is considered one course and not two courses, e.g. General Chemistry lecture and lab.

4. What factors are considered in the admission process?
Admissions to the program is competitive and holistic. This means that an admissions committee will look at all the factors below when admitting a student. Meeting the minimum requirement does not guarantee acceptance.
(1) A minimum of 2.50 in all three areas: Overall GPA, science GPA and prerequisite GPA
(2) Number of completed prerequisite courses at the time of application
(3) Essay (the essay prompt will appear on the online admission application)
(4) Three Professional Recommendation Forms
(5) Interview

5. When will I receive my admission decision?
Completed applications are reviewed on a rolling basis. Therefore, you are encouraged to apply early and will be notified by the Admissions Review Committee for an interview. The earlier you apply, the earlier you will receive an admission decision.

6. I was accepted for Fall 2024 to the Molecular Genetic Technology one-year track. Due to a few lacking prerequisite courses, I was accepted into the program conditionally. What is the deadline to complete my outstanding prerequisite courses?
By the first day of enrollment in the School of Health Professions, you can have a maximum of 3 outstanding prerequisite courses. These outstanding prerequisite courses must be completed no later than May 2025. Our recommendation is to finish the missing prerequisite course(s) as soon as possible.
Frequently Asked Questions

7. I already hold a bachelors degree. Can I apply for this program?
Yes, you can apply. Upon graduation you will earn a second bachelors degree.

8. I already hold a bachelors degree. Can you waive all the prerequisite courses?
No, despite holding a prior degree, prerequisite requirements cannot be waived. However, applicable courses from your prior degree may be used toward the prerequisite requirements.

9. The prerequisite courses require a minimum of 12 semester credit hours of upper-division course work at a 3000 or 4000 level. What is an upper-division course?
If you attended a university, courses offered at a junior level or higher are considered upper-division. Any course taken at a community college is not upper division.

10. Can I enroll in classes part-time?
No, enrollment is only offered full-time. View the courses you will complete during this 1-year program here.

11. Where is the School located?
The School is located at 1515 Holcombe Blvd, Houston, TX 77030 inside MD Anderson’s Main Building.

12. What is a clinical rotation?
As part of the learning process, you will complete approximately 480 hours of guided clinical rotation hours. Clinical rotations allow you to apply your knowledge gained from the classroom and labs to the real life medical setting.

13. When I graduate, what degree will I earn?
You will earn a bachelor of science degree from The University of Texas MD Anderson Cancer Center.

14. What does it mean to be board certified?
Upon graduation, you will have the opportunity to take a board of certification exam offered by the American Society for Clinical Pathology. This is the gold standard in global certification for medical laboratory professions. Passing the certification exam can result in improved job prospects and higher salaries. You will be certified as a Technologist in Molecular Biology.
