Disclaimer

This catalog is a general information publication only. It is not intended to nor does it contain all regulations that relate to students. The provisions of this catalog do not constitute a contract, express or implied, between any applicant, student or faculty member and The University of Texas MD Anderson Cancer Center School of Health Professions or The University of Texas System. The University of Texas MD Anderson Cancer Center reserves the right to withdraw courses at any time, to change fees or tuition, calendar, curriculum, degree requirements, graduation procedures and/or any other requirements included in this catalog affecting students. Changes will become effective whenever the proper authorities so determine and will apply to both prospective students and those already enrolled. Students are held individually responsible for complying with all requirements of the rules and regulations of The School of Health Professions and the Board of Regents of The University of Texas System. Failure to read and comply with policies, regulations and procedures will not exempt a student from applicable penalties.

The University of Texas
MD Anderson Cancer Center
School of Health Professions

The School of Health Professions is located within the main campus of The University of Texas MD Anderson Cancer Center. We offer Bachelor of Science and Master of Science degrees in exciting and high demanding career fields in laboratory sciences, radiologic sciences, health care disparities, management and education. At the School of Health Professions, students learn from faculty with years of practical experience in their field who ensure that the curriculum combines a rich classroom environment with hands-on practical experience. The student’s clinical experience takes place in an institution that is recognized worldwide for its excellence in education, health care and research, and has the distinction of being one of the nation’s first Comprehensive Cancer Centers.

Degree Programs

**Baccalaureate of Science**
- Clinical Laboratory Science
- Cytogenetic Technology
- Cytotechnology
- Diagnostic Imaging
- Diagnostic Medical Sonography
- Health Care Disparities, Diversity and Advocacy (DDA)
- Histotechnology
- Medical Dosimetry
- Molecular Genetic Technology
- Radiation Therapy

**Master of Science**
- Diagnostic Genetics and Genomics
- Radiologic Sciences

**Certificate Program**

**Advanced Technical Certificate**
- Mammography

**Accreditation**
MD Anderson is accredited by the Southern Association of Colleges and Schools Commission on Colleges (SACSCOC) to award degrees at the baccalaureate, master’s and doctoral levels.

**Mission**
The School of Health Professions, in concert with the mission and visions of The University of Texas MD Anderson Cancer Center, is committed to the education of health care professionals, through formal academic programs that award institutional degrees in health sciences.

**Vision**
The University of Texas MD Anderson Cancer Center School of Health Professions faculty is committed to:
- Setting the standard for world class didactic and clinical instruction necessary for program graduates to perform procedures within a specialty area, to integrate and relate clinical data and to solve problems related to the production of clinical results.
- Meeting the current and future needs of health science professions by developing and implementing formal academic didactic and clinical education programs incorporating state-of-the-art diagnostic and treatment techniques.
- Developing, understanding and appreciating research and quality management programs; providing the skills necessary to establish quality control measures and to make appropriate decisions to maintain accuracy and precision. Instilling a professional code of conduct related to patients, health care professionals and the public that demonstrates the highest regard for human dignity and life.
- Identifying the value of lifelong learning of students and graduates through continued education and professional competence.

**Core Values**

**Caring**
By our words and actions we demonstrate caring toward everyone.
- We are sensitive to the concerns of our patients, their loved ones and our colleagues.
- We are respectful and courteous to each other and practice cultural humility.
- We promote and reward teamwork and inclusion.
**Integrity**
We work together with professionalism to merit the trust of our colleagues and those we serve in all that we do.
- We hold ourselves, and each other, accountable for our work — decisions and data — and for practicing our values and ethics.
- We advocate for diversity and equity for our workforce, for those we serve and for our community.
- We communicate frequently, honestly, openly and responsibly.

**Discovery**
We embrace creativity and seek new knowledge from diverse perspectives.
- We encourage continuous learning, seeking out information and new ideas.
- We team with each other to identify and resolve problems.
- We seek personal growth and enable others to do so.

**Safety**
We provide a safe environment — physically and psychologically — for our patients, for our colleagues and for our community.
- We create a sense of security and empowerment and are committed to keeping one another free from harm.
- We embrace a framework and best practices for the highest quality of care and service.
- We inspire trust by modeling excellence in our work and acceptance of each person’s contributions.

**Stewardship**
We protect and preserve our institutional reputation and the precious resources, people, time, financial and environmental — entrusted to us.
- We prioritize the health and well-being of each other.
- We act responsibly to safeguard the institution’s finances.
- We ensure the proper care and use of time, data, materials, equipment and property afforded to us.

**The University of Texas System Board of Regents**
The School of Health Professions is subject to the *Rules and Regulations* of the Board of Regents of The University of Texas System.

The UT Board of Regents, the governing body for the UT System, is composed of nine members who are appointed by the Governor and confirmed by the Senate. Terms for Regents are scheduled for six years each and staggered so that three members’ terms will usually expire on February 1 of odd-numbered years. In addition, the Governor appoints a Student Regent for a one-year term that expires on May 31.

Throughout the more than 100-year history of the UT System, the Board has been composed of dedicated and distinguished Texans who have been strong advocates of excellence in academic programs, scientific inquiry and responsible public service.

**Officers**
Kevin P. Eltife, Chairman term expires 02/27
Janiece Longoria, Vice Chairman term expires 02/29
James C. “Rad” Weaver, Vice Chairman term expires 02/29

**Regents**
John Michael Austin (student) term expires 05/24
Christina Melton Crain term expires 02/25
Robert P. Gauntt term expires 02/29
Jodie Lee Jiles term expires 02/25
Nolan Perez, M.D. term expires 02/27
Stuart W. Stedman term expires 02/27
Kelcy L. Warren term expires 02/25

Each Regent’s term expires when a successor has been appointed, qualified and taken the oath of office. The Student Regent serves a one-year term.

Francie A. Frederick is the General Counsel to the Board of Regents.

**The University of Texas MD Anderson Cancer Center**

**Institutional Mission**
The mission of The University of Texas MD Anderson Cancer Center is to eliminate cancer in Texas, the nation, and the world through outstanding programs that integrate patient care, research and prevention, and through education for undergraduate and graduate students, trainees, professionals, employees and the public.

**Institutional Vision**
We shall be the premier cancer center in the world, based on the excellence of our people, our research-driven patient care and our science. We are Making Cancer History®.

**Institutional Core Values**

**Caring**
By our words and actions we demonstrate caring toward everyone.
- We are sensitive to the concerns of our patients, their loved ones and our colleagues.
- We are respectful and courteous to each other and practice cultural humility.
- We promote and reward teamwork and inclusion.

**Integrity**
We work together with professionalism to merit the trust of our colleagues and those we serve in all that we do.
- We hold ourselves, and each other, accountable for our work — decisions and data — and for practicing our values and ethics.
- We advocate for diversity and equity for our workforce, for those we serve and for our community.
- We communicate frequently, honestly, openly and responsibly.

**Discovery**
We embrace creativity and seek new knowledge from diverse perspectives.
- We encourage continuous learning, seeking out information and new ideas.
- We team with each other to identify and resolve problems.
- We seek personal growth and enable others to do so.
Safety
We provide a safe environment — physically and psychologically — for our patients, for our colleagues and for our community.
• We create a sense of security and empowerment and are committed to keeping one another free from harm.
• We embrace a framework and best practices for the highest quality of care and service.
• We inspire trust by modeling excellence in our work and acceptance of each person’s contributions.

Stewardship
We protect and preserve our institutional reputation and the precious resources, people, time, financial and environmental — entrusted to us.
• We prioritize the health and well-being of each other.
• We act responsibly to safeguard the institution’s finances.
• We ensure the proper care and use of time, data, materials, equipment and property afforded to us.

Chris McKee, SVP, Strategy and Business Development
Mark Moreno, Vice President (VP), Governmental Relations
Diane Bodurka, M.D., VP, Chief Education & Training Officer
Kimberly Hoggatt Krumwiede, Ph.D., Dean and Professor

Institutional Profile
The University of Texas MD Anderson Cancer Center is one of the world’s most respected centers devoted exclusively to cancer patient care, research, education and prevention. It is located in central Houston in the Texas Medical Center.

MD Anderson was created in 1941 as part of the UT System. The institution is one of the nation’s original three comprehensive cancer centers designated by the National Cancer Act of 1971 and is one of 50 National Cancer Institute-designated comprehensive cancer centers today.

U.S. News & World Report’s “Best Hospitals” survey has ranked MD Anderson the nation’s top hospital for cancer care. The institution has been named one of the nation’s top two hospitals for cancer care every year since the survey began in 1990.

Visit the MD Anderson Facts & History page for more information and documentation on the institution.

Equal Educational Opportunity Statement
To the extent provided by applicable law, no person shall be excluded from participation in, denied the benefits of, or be subjected to discrimination under, any program or activity sponsored or conducted by MD Anderson on the basis of race, color, national origin, religion, sex, age, veteran status or disability.
**Academic Calendar**

**Fall Semester 2023**

**Aug. 17, Thursday-Aug. 18, Friday**  School of Health Professions Orientation for new students.

**Aug. 18, Friday**  Tuition and fees payment-in-full deadline to avoid late payment fee.  
First payment due for students on an installment plan.

**Aug. 19, Saturday-Aug. 25, Friday**  Late registration period via myUTH; includes late payment fees; must pay tuition and fees on the same day as registering.

**Aug. 19, Saturday-Sept. 6, Wednesday**  Add/Drop Period via Add/Drop/Withdrawal Form:  
Adds: includes late payment fees, must pay tuition and fees on the same day as registering.  
Drops: tuition and fees refunded based on class(es) dropped.

**Aug. 21, Monday**  Classes Begin.

**Sept. 4, Monday**  Labor Day Holiday.

**Sept. 6, Wednesday**  Census Date; students dropped for non-payment at the end of the day.  
Last day of Add/Drop Period

**Sept. 18, Monday**  Last day for a full withdrawal with partial refund.

**Sept. 25, Monday**  Second payment due for students on an installment plan.

**Oct. 3, Monday**  Last payment due for students on an installment plan.

**Nov. 15, Wednesday**  Registration open for Spring via myUTH.

**Nov. 23, Thursday-Nov. 24, Friday**  Thanksgiving Holidays.

**Dec. 1, Friday**  Classes end.

**Dec. 4, Monday-Dec. 8, Friday**  Final exams.

**Dec. 11, Monday-Dec. 29, Friday**  Winter Break.

**Spring Semester 2024**

**Dec. 29, 2022, Friday**  Tuition and fees payment-in-full deadline to avoid late payment fee.  
First payment due for students on an installment plan. 
School of Health Professions Orientation for new students.

**Dec. 30, 2023, Saturday-Jan. 8, Monday**  Late registration period via myUTH; includes late payment fees; must pay tuition and fees on the same day as registering.

**Dec. 30, 2023, Saturday-Jan. 18, Thursday**  Add/Drop Period via Add/Drop/Withdrawal Form:  
Adds: includes late payment fees, must pay tuition and fees on the same day as registering.  
Drops: tuition and fees refunded based on class(es) dropped.

**Jan. 1, Monday**  New Year’s Holiday.

**Jan. 2, Tuesday**  Classes begin.

**Jan. 15, Monday**  Martin Luther King Holiday.

**School of Health Professions Academic Catalog 2023-2024**

**Jan. 18, Thursday**  Census Date; students dropped for non-payment at the end of the day.  
Last day of Add/Drop Period.

**Jan. 30, Tuesday**  Last day for a full withdrawal with partial refund.

**Feb. 6, Tuesday**  Second payment due for students on an installment plan.

**March 4, Monday-March 8, Friday**  Spring Break.

**March 19, Tuesday**  Last payment due for students on an installment plan.

**April 3, Wednesday**  Registration open for Summer via myUTH.

**April 19, Friday**  Classes end.

**April 22, Monday-April 26, Friday**  Final Exams.

**April 29, Monday-May 3, Friday**  Summer Break.

**Summer Semester 2024**

**May 3, Friday**  Tuition and fees payment-in-full deadline to avoid late payment fee.  
First payment due for students on an installment plan.

**May 4, Saturday-May 10, Friday**  Late registration period via myUTH; includes late payment fees; must pay tuition and fees on the same day as registering.

**May 4, Saturday-May 21, Tuesday**  Add/Drop Period via Add/Drop/Withdrawal Form:  
Adds: includes late payment fees, must pay tuition and fees on the same day as registering.  
Drops: tuition and fees refunded based on class(es) dropped.

**May 6, Monday**  Classes begin.

**May 21, Tuesday**  Census Date; students dropped for non-payment at the end of the day.  
Last day of Add/Drop Period.

**May 27, Monday**  Memorial Day Holiday.

**June 3, Monday**  Last day for a full withdrawal with partial refund.

**June 10, Monday**  Second payment due for students on an installment plan.

**July 4, Thursday**  Independence Day Holiday.

**July 12, Friday**  Last day to apply for graduation through myUTH.

**July 16, Tuesday**  Last payment due for students on an installment plan.

**July 17, Wednesday**  Registration opens for Fall via myUTH.

**Aug. 2, Friday**  Classes end.

**Aug. 5, Monday-Aug. 9, Friday**  Final exams.

**Aug. 9, Friday**  Commencement.

**NOTE: Calendar is subject to change**
Admissions

Admission to the School of Health Professions is contingent upon acceptance to one of the programs. Each program has specific prerequisite course requirements for graduation. Students seeking a baccalaureate degree from the School of Health Professions must complete a minimum of 120 semester credit hours (SCH) of which 42 general education “core” SCH must be transferred to the School of Health Professions from an accredited college or university with acceptable transferability of credit.

The unit of credit used at the School of Health Professions is the semester hour. A semester hour is the equivalent of one lecture contact hour per week plus 2 hours of homework or 3 hours of lab for 16 weeks based on the Carnegie definition. Time requirements for the semester credit hour in activities other than lecture vary according to the nature and objectives of the activities.

Admission criteria include previous grade point average (GPA), professional references, essay and personal interviews. (Note: Histotechnology and Health Care DDA programs do not require an interview). Admission is competitive. Achieving the minimum criteria does not guarantee admission into the School of Health Professions.

Texas Core Curriculum Requirements

Students receiving their first baccalaureate degree from the School of Health Professions must successfully complete the Texas Core Curriculum requirements (19 Texas Administrative Code (TAC), §4.28). The core curriculum consists of 42 SCH in specified component areas. If a student’s transcript from another Texas public college or university indicates that the student has completed that institution’s core curriculum, no additional core curriculum requirements will be imposed. If a student has not completed the core requirement at another Texas institution prior to entering the School of Health Professions, the student will be required to earn academic credits from a Texas public college or university to fulfill the School of Health Professions core curriculum course requirements.

The School of Health Professions does not offer lower-level core curriculum courses, but has developed a core curriculum in order to accommodate students who transfer from other states or private institutions. If a student enrolls at the School of Health Professions prior to completing the core curriculum requirements elsewhere, the student is responsible for completing the core curriculum requirements listed below. The student should obtain approval from his or her advisor prior to registering for courses intended to fulfill these requirements. The same requirements also apply to out-of-state students (Texas Education Code (TEC), §61.821 et seq.).

Texas Core Curriculum  42 SCH

COMMUNICATION   6 SCH
ENGL 1301 Composition I
ENGL 1302 Composition II

MATHEMATICS   3 SCH
MATH 1314 College Algebra or higher

LIFE AND PHYSICAL SCIENCES   12 SCH
Courses in biology, chemistry, physics, geology, or other natural sciences

LANGUAGE, PHILOSOPHY AND CULTURE   3 SCH
Courses in literature, philosophy, modern or classical language/literature, cultural studies, or equivalent

CREATIVE ARTS   3 SCH
Courses in arts, dance, music appreciation, music, drama, or equivalent

AMERICAN HISTORY   6 SCH
HIST 1301 United States History I
HIST 1302 United States History II

GOVERNMENT/POLITICAL SCIENCE   6 SCH
GOVT 2305 Federal Government
GOVT 2306 Texas Government

SOCIAL AND BEHAVIORAL SCIENCES   3 SCH
Courses in anthropology, economics, criminal justice, geography, psychology, sociology, social work or equivalent

General Requirements

Consideration for admission to one of the School of Health Professions Programs is not based on race, religion, national origin, veteran status, sex, age or disability (34 Code of Federal Regulations (CFR) §106.9). The School of Health Professions is committed to providing reasonable accommodations for students with disabilities. Students who can fulfill the nonacademic technical standards and who have disabilities, will need to disclose those disabilities at the beginning of the program, if reasonable accommodation is to be requested. The student should initiate the disclosure process with his or her discipline-specific program director. Other resources within the institution may be consulted if appropriate. Documentation may be required to verify certain disabilities.

The following are required for admission to the School of Health Professions’ programs (TEC, §51.808 and Regents’ Rules and Regulations, Rule 40303):

• Application to the program, including submission of official transcripts, three professional reference forms and a personal interview (Note: Histotechnology and Health Care DDA programs do not require an interview).

• Completion of all prerequisite coursework
  o Required courses must be acceptable toward a major in the respective field of study. Survey courses will not fulfill these requirements.
  o Candidates who completed the prerequisite courses seven or more years before admission may be required to update their academic skills. For specific information, contact the program director.
  o A minimum overall GPA and science GPA of 2.5 on a 4.0 scale overall is preferred. Meeting the minimum criteria does not guarantee acceptance.

• Test of English as a Foreign Language (TOEFL) - For all international students whose native language is not English, proof of English language proficiency must be submitted. A minimum TOEFL score of 100 on the internet-based format or 600 on the paper exam is required.

• Texas Success Initiative (TSI): In accordance with TEC, Subchapter F-1, the School of Health Professions will comply with the TSI. All applicants must provide proof of successful attainment of the TSI, unless they fall into the following categories:
• Graduation from an accredited Texas public institution of higher education with an associate or baccalaureate degree
• Completion of 60 SCH of the prerequisites for any School of Health Professions program with a grade of C (75) or higher
• Acceptable scores (within five years of the application) on any of the following (TEC, §51.803(a)):
  o SAT (combined verbal and mathematics score of 1070 with a minimum of 500 on both the verbal and math test)
  o ACT (composite score of 23 with a minimum of 19 on both English and mathematics)
• TAAS exams (with a minimum scale score of 1770 on the writing test, a Texas Learning Index of 86 on the mathematics test and 89 on the reading test)
• Proof of an applicant’s readiness to enroll in college level coursework, as related to TSI, will be determined by the Office of the Registrar based upon review of official transcripts from previously attended institutions. Satisfactory performance on an acceptable testing instrument is a requirement for admission to the baccalaureate program or to non-degree-seeking admission status.

For additional information, contact the Office of the Registrar at
The University of Texas Health Science Center at Houston
PO Box 20036
Houston, Texas, 77225
713-500-3361

Additional requirements and/or considerations are listed on the specific program pages of the School of Health Professions web site.

Nonacademic Technical Standards

Sensory/Observational Skills
• Candidates for admission to the School of Health Professions must be able to observe demonstrations and participate in laboratory or clinical experiments and practices as required by the program of interest.
• Candidates must have visual acuity corrected to 20/20 and visual perception with respect to color. A color blindness test will be administered during orientation.
• Candidates must be able to visually identify probe colors on slides, computer readout and monitor, interpret reactions on slides, microwells and test tubes and visually identify cellular components and microorganisms under a microscope.
• Candidates must be able to view images for accuracy, view computer screens for extended periods, visually monitor patients during treatment and treatment planning procedures in dim light.
• Candidates must be able to hear various equipment alerts, sounds and signals and background sounds during equipment operations, distinguish phonetic sounds either mechanically or from conversation to perform procedures in low light and monitor patients via audio monitors during treatment and treatment planning procedures.

Physical and Motor Skills
• Candidates for admission to the School of Health Professions must have sufficient motor function to operate/manipulate and maintain a microscope and/or microtome and other laboratory equipment.
• Candidates must have the ability to obtain and/or verify patient samples, ambulate sufficiently to collect blood specimens from patients and possess sufficient stamina to tolerate physically taxing workloads.
• Candidates must be able to demonstrate manual dexterity required to process samples, operate, maintain and repair laboratory equipment or maintain balance while positioning patient and adjusting x-ray tube and/or perform all aspects of clinical laboratory testing or radiological procedures.
• Candidates must be able to lift 30 pounds of weight overhead, be able to reach up to six feet off floor, be able to move immobile patients from stretcher to treatment table and/or push wheelchair from waiting area to treatment room.
• Candidates for the MRI program must not have foreign bodies or medical implants that are contraindicated for the MRI environment.
• Candidates must be able to stand for long periods of time, maneuver through congested areas to perform positioning procedures and move and adjust medical equipment such as x-ray tubes.

Communication Skills
• Candidates for admission to the School of Health Professions must be able to communicate in English and medical terminology in oral and written form to faculty, staff, colleagues, other health care professionals, patients and visitors.
• Candidates must have the ability to participate in discussions in the classroom and clinical areas.
• Candidates must be able to complete and maintain written assignments and reports.

Intellectual/Conceptual, Integrative and Qualitative Skills
• Candidates for admission to the School of Health Professions must have the ability to measure, calculate, analyze, interpret, synthesize and evaluate data.
• Candidates must be able to comprehend three-dimensional and spatial relationships on a computer monitor or under a microscope and monitor and input clinical data.
• Candidates must have the ability to learn, prioritize and perform laboratory or radiologic testing.
• Candidates must have the ability to make sound judgement and correlate disease states with clinical data.
• Candidates must possess organizational skills and be able to problem solve in a timely manner and under stressful conditions.

Social Behavior and Professionalism
• Candidates for admission to the School of Health Professions must demonstrate the ability to follow instructions/procedures with accuracy and precision.
• Candidates must possess the ability to maintain intellectual and emotional stability and maturity under stress, while maintaining appropriate performance standards.
• Candidates must have the ability to manage time, organize workload and meet deadlines.
• Candidates must be able to function as a part of a team and learn to delegate responsibilities appropriately.
• Candidates must be able to exhibit respect of self and others and project an image of professionalism, including appearance, dress and confidence and maintain complete personal integrity and honesty.
• Candidates must be able to interact appropriately with diverse personalities and populations.
• Candidates must adhere to safety guidelines for self and others and be able to comply with standards and regulations required by external agencies.

Academic Fresh Start
A Texas resident may apply for admission to and enroll as an undergraduate student under TEC, §51.931, Right to an Academic Fresh Start. If an applicant elects to seek admission under this section, the School of Health Professions shall not consider academic course credits or grades earned by the applicant ten (10) or more years prior to the starting date of the semester in which the applicant seeks to enroll. An applicant who applies under this section and is admitted as student may not receive any course credit for courses undertaken ten (10) or more years prior to enrollment.

Automatic Admission
An applicant is entitled to automatic admission as an undergraduate student if the applicant meets any minimum requirements established by the institution and is a child of certain public servants who were killed or sustained a fatal injury in the line of duty (TEC, §51.803(e)).

Instructions for Applicants
The Office of the Registrar at UTHealth serves as the Registrar for the School of Health Professions. To access the School of Health Professions on-line Application Form and the on-line Recommendation Form for admission into the program, visit the How to Apply page.

International Students
Students who complete all or part of their college coursework outside the United States (U.S.) must submit their transcripts to an approved accredited U.S. evaluation agency. Students who are seeking a certificate of completion from the School of Health Professions should refer to the approved evaluation list (pdf) for a list of acceptable agencies for course-by-course and grade-by-grade evaluations.

Approved Transcript Evaluation Agencies (Foreign Transcripts)
All applicants with foreign college transcripts/mark sheets must have a course-by-course, and grade-by-grade evaluation by an approved evaluation agency (pdf).

Test of English as a Foreign Language (TOEFL)
For all international students whose native language is not English, proof of English language proficiency must be submitted. The School of Health Professions accepts the Test of English as a Foreign Language (TOEFL) as a standardized test to measure the English language ability of non-native speakers. A minimum TOEFL score of 100 on the internet-based format or 600 on the paper exam is required.

The TOEFL Designated Institution Code for MD Anderson is 6906.

Applicants meeting any criteria below are exempt from the TOEFL:
• If you are a U.S. citizen or permanent resident, regardless of your native language

• If you have earned a high school diploma from an accredited U.S. high school
• If you have earned an Associate of Arts, Associate of Science, Bachelor’s degree or higher-level degree from an accredited U.S. college or university
• If you have obtained a secondary school degree or higher-level degree from a country where English is spoken as the native language

Onboarding
All students who have fulfilled all the requirements for admission, and have been granted admission status, are required to go through the Onboarding process. Invitations to join the online onboarding course are sent out in Mid-June. In the course, newly admitted students will receive all the information they need for clearance to MD Anderson, including mandatory paperwork and trainings.

Orientation
As part of the Onboarding course, Orientation is designed to prepare students for the first semester and to acquaint them with the classroom facilities and all the additional resources and services available to them.

International students are required to attend a separate orientation organized by the Academic and Visa Administration – Visa Office. For additional information contact

Academic and Visa Administration – Visa
1MC17.3439
7007 Bertner Ave.
Houston, Texas 77030
Phone 713-792-1112
Fax 713-792-6229

Texas Common Application System
During this current catalog, the School of Health Professions does not utilize the common application form for freshman-level and transfer students. The School of Health Professions currently allows applicants to submit online applications for consideration with the Office of the Registrar. The School of Health Professions is currently preparing to be included in the common application system.

Transfer Students
The School of Health Professions does not accept students who are, or have been, enrolled in a similar program and wish to transfer into one of the School of Health Professions programs. All students must take and complete all required courses shown in the current Health Professions Student Catalog. If the School of Health Professions student prefers to change programs, the student will need to withdraw from the current program and formally apply to the new School of Health Professions program of choice.

Transferability of Credit
The Office of the Registrar will evaluate all official transcripts from regionally accredited institutions on an individual basis to determine if coursework is acceptable for transfer credit. Official transcripts of credit earned from all institutions of higher education previously attended must be submitted as part of the admissions requirement. The official transcript must include SCH and a grade symbol that reflects satisfactory performance. Not all credit earned by equivalency will be used...
in the calculation of the student admission GPA. The School of Health Professions does not consider a grade of D in program-specific prerequisite courses to be acceptable performance. Program-specific prerequisite courses taken at other institutions in which a grade below C- was earned are not transferable or applicable toward degree requirements.

Students who satisfactorily completed an accredited health sciences program that holds current licensure/certification may be allowed up to 30 SCH of transfer credit. The number of SCH will be determined by the curriculum committee of the School of Health Professions.

Accepted students should meet with their program director or designated faculty to complete a degree plan at the beginning of the program. Their degree plan should be reviewed and updated periodically throughout the program. The student is responsible for tracking and completing all course requirements for graduation.
Tuition and Fees

In compliance with TEC, §61.0777, current School of Health Professions Tuition and Student Fee schedule are available on the Current Student page. Additional information regarding reasonable cost of living expenses for the period of enrollment is also available on the page and will be periodically updated (19 TAC, §21.2220). Note that School of Health Professions students are not under any obligation to purchase a textbook from a university-affiliated bookstore. The same textbook may also be available from an independent retailer, including an online retailer (TEC, §51.9705 and 19 TAC, §4.215, et seq.).

A student who fails to make full payment of tuition and fees, including any late fees assessed, to the University when the payments are due is subject to one or more of the following actions at the University’s option:

- Bar against readmission to the institution
- Withholding of grades, degree and official transcript
- All penalties and actions authorized by law

Student Financial Responsibility

Students are responsible for fulfilling all financial obligations to MD Anderson. Students who do not meet their financial responsibilities are subject to withdrawal from school, the withholding of grades, degrees and official transcripts. Defaulting students are barred against readmission to the institution and will be subject to all penalties and actions authorized by law.

Tuition

Tuition for Texas residents is governed by the TEC. Tuition fees are subject to change by legislative or regental action and become effective when enacted. Fee increases are determined by the institution and not mandated by the legislature (General Appropriations Act 2010-2011 (pdf), Article IX, §6.16). For more detailed information about fees and application timetables, visit the Tuition and Fees page.

Tuition and Fees Exemptions

Students under 21 years of age who are children of firefighters or peace officers who died or were disabled in the line of duty are exempt from tuition. Individuals are not considered disabled unless they furnish proof of disability.

Texas law provides exemptions from tuition and fees for various categories of students, including but not limited to: Students who are dependent children of any person who is a domiciliary of Texas on active duty as a member of the U.S. Armed Forces and who, at the time of registration, is classified by the Department of Defense as a prisoner of war or missing in action. For more information, about these and additional exemptions, visit the College for All Texans site and/or contact the Office of the Registrar.

The School of Health Professions does not provide concurrent enrollment.

Resident tuition and fee rates are available to certain veterans and service members, their spouses and children, if the veteran or service member is eligible for benefits. For more information email the Office of the Registrar and see TEC, §54.241.

Incidental Fees

Incidental fees for enrolled students can be found on the Current Student page.

Installment Payments for Tuition and Fees

All tuition and fee payments are made to the UTHealth Bursar’s Office.

Bursar’s Office
7000 Fannin St., Ste. 2240
Houston, TX 77030
Office 713-500-3895
Fax 713-500-3303

Installments payments are made according to the posted deadlines (must login with UTHealth credentials), which are also noted on the School of Health Professions’ Academic Calendar.

Six Drop Rule

Under TEC, §51.907, “an institution of higher education may not permit a student to drop more than six courses, including any course a transfer student has dropped at another institution of higher education.” This statute was enacted by the State of Texas in spring 2007 and applies to students who enroll in a public institution of higher education as first-time freshmen in fall 2007 or later.

Academic Common Market

The Academic Common Market is a tuition-savings program for college students in the 16 Southern Regional Education Board (SREB) member states who want to pursue degrees that are not offered by their in-state institutions. Students can enroll in out-of-state institutions that offer their degree program and pay the institution’s in-state tuition rates. Hundreds of undergraduate and graduate programs are available for residents of SREB states.

Out of State Students, Non-Resident Tuition and Considerations for Tuition Rebates

Tuition rebates may be available to certain undergraduate students while enrolled in the School of Health Professions. Eligible enrolled students must submit a School of Health Professions scholarship application and meet the identified criterion to be considered.

Each eligible student will be notified if a tuition rebate has been awarded to their student account for the current academic year.

Residency

Under Texas state law, an applicant or enrolled student is classified as a resident of Texas, a nonresident or a foreign student. Residency for admission and tuition purposes at a public college or university in Texas is different from residency for voting or tax purposes.

Before an individual may register at the School of Health Professions and pay tuition at the rate provided for residents of the State of Texas, the individual must complete the “Residency Core Questions.”

To qualify as a Texas resident, an individual must reside in Texas for at least 12 consecutive months and establish a domicile in Texas prior to enrollment. An applicant or student who is claimed as a dependent on a parent’s most recent federal tax return will be classified based on the parent’s qualifications for residency.
An individual, despite his or her citizenship, can be classified as a Texas resident if the individual:

- Graduated from a high school or received a GED in this state.
- Resided in this state for at least three years immediately preceding that graduation or receipt of GED.
- Resided in this state the 12 months preceding the census date of the academic semester in which the person enrolls.
- Provides the required affidavit regarding permanent residency in accordance with TEC §54.053.
- An individual’s residency classification is based on information from his or her admission application. If an applicant or student is classified as a nonresident and wishes to be reclassified as a resident, it is necessary to submit a Core Residency Questions Form, which provides more detailed background information than is available from the admission application (19 TAC §21.21, et seq.).

Withdrawal and Refund

Withdrawal from the School of Health Professions

A student who wishes to withdraw from MD Anderson after completing registration for a semester must secure the dean’s approval. The dean’s approval to withdraw must be submitted to the registrar, where the student may request a refund of fees in accordance with MD Anderson policy. No fees will be repaid to anyone other than the payer, except on the payer’s written order.

Students who withdraw from a program will be refunded a percentage of tuition and mandatory fees according to the current Fall, Spring and Summer schedules found on the Office of the Registrar’s Refund Policy page.

Enrollment

Students can enroll in classes through the end of the first week of class in the current semester.

Adding and dropping courses

Students can make schedule changes—add/drops—up until the end of the 12th class day of the current semester. Up until this date, students will receive a refund or have additional charges added to their account based on the number of semester credit hours involved.

Withdrawal from a course before the grade earned becomes part of the student record

Course must be dropped prior to the 12th class day. After the completion of the eighth week of classes, no student will be allowed to withdraw from a course; therefore the grade earned will become part of the official transcript. Students withdrawing from classes after the official census date and prior to the deadline will receive a grade of either W or WF.

Tuition and fees paid by sponsors, donors or scholarships will be refunded to the source.

Medical Withdrawal

A medically ill student whose illness precludes class attendance may withdraw from MD Anderson effective the date and under the conditions specified at the time of the withdrawal. A student who requests a medical withdrawal must submit adequate written documentation from the treating physician to the registrar to withdraw the student under specified conditions.

Military Withdrawal

Any student withdrawing from the school to perform active military services as a member of the U.S. Armed Forces or Texas National Guard must provide reasonable proof of the fact and duration of their active military service. Moreover, if a student elects to withdraw from the institution, several institutional procedures must be complete prior to the withdrawal. If eligible, the student may receive a refund in accordance with the academic calendar and posted dates for student refunds. If a student is eligible to receive an incomplete, the incomplete will follow normal registrar’s procedures.

For more details regarding official withdrawal procedures, the student should notify the program director, Office of the Registrar and the UTHealth student financial services offices accordingly. Previously earned coursework will be applied toward the student’s academic records along with any standardized test scores, if applicable. The student will return to the academic status prior to withdrawal. Preceptorships will be accommodated as soon as possible for the military student.
Financial Aid

A student must be in good standing and making satisfactory academic progress toward their degree objective to be eligible for federal financial assistance per Federal Regulations 34 CFR, 686.16(e), 686.32(l), and 686.34. Each financial aid applicant's academic progress will be officially verified at the end of each academic year using a qualitative and quantitative measure. Qualitative standard is the GPA that a student must have at each evaluation. Quantitative standard is the pace at which students must progress through their program to ensure that they will graduate within the maximum timeframe.

Enrollment

Students must be enrolled at least half-time in a degree-seeking program that is accredited by an approved accrediting agency to be eligible for federal, institutional, and state financial aid. Enrollment hours are reviewed at the time of disbursement.

A student subject to selective service registration under federal law must file a statement that he or she has registered or is exempt before he or she is eligible to receive financial assistance that is funded by federal or state revenue in accordance with federal law and the provisions of TEC, §51.9095.

Student Financial Services
The University of Texas Health Science Center at Houston
7000 Fannin Street, Ste. 2220
Houston, TX 77030
713 500-3860

Financial Assistance

Certain financial assistance offerings may be made available to eligible students administered by the Texas Higher Education Coordinating Board (19 TEC §22).

School of Health Professions

Scholarships

Students may obtain a scholarship from any source. Additionally, the School of Health Professions, through funds provided by the MD Anderson Development Office, annually offers competitive $1,000 scholarships to selected students who have been accepted as degree candidates into one of the School of Health Professions programs.

Eligibility

Applicants must meet the following eligibility requirements to apply for a scholarship from the school (TEC, §51.809).

• Acceptance as a degree candidate into one of the School of Health Professions degree programs
• A minimum cumulative GPA of 3.0 on a 4.0 scale.
  o The cumulative School of Health Professions GPA is used for returning students.
  o The admissions overall GPA is used for newly accepted students.
• Submit two signed letters of recommendation on official organization letterhead from professional or educational references.
• Submit the completed application by the date designated in the scholarship information made available to returning and newly accepted students.

Selection Criteria

Members of the Scholarship Review Committee are appointed by the dean of the School of Health Professions to review scholarship candidates based on the following criteria.

• Academic achievement
• Evidence of leadership and involvement (school and community)
• Outstanding character
• Service to community and school
Academic Policies and Procedures

Academic Advising

Program directors and associate program directors assist students in developing intellectual potential and exploring educational opportunities and life goals. Many people in the campus community contribute to the advising process, including faculty and staff. Through the relationship established between adviser and student within a friendly, helpful and professional atmosphere, a student can:

- Learn about educational options, degree requirements and academic policies and procedures.
- Clarify educational objectives.
- Plan for professional employment and life goals.

Ultimately, the student is responsible for seeking adequate academic advice, knowing and meeting degree requirements and enrolling in appropriate courses to ensure orderly and timely progress toward a degree. Adviser contact each semester provides students with current academic information and promotes progress toward educational goals.

MD Anderson supports that progress and encourages effective academic advising campus-wide.

Admission of Applicants with Dismissals

The purpose of the policy is to establish review procedures concerning applicants with previous dismissals from institutions of higher education other than the School of Health Professions. Refer to the School of Health Professions Policy #01: Admission of Applicants with Dismissals (pdf).

Class Attendance

Regular attendance at all learning activities is expected, and unsatisfactory attendance may lead to disciplinary action.

Instructors are responsible for implementing the attendance policy of programs and must notify students of any special attendance requirements.

Unexcused absences

Unexcused absences include tardiness and early departures that are not scheduled and are not approved by the director. The director keeps a record of unexcused absences in each student’s file. It is the responsibility of the director/faculty advisor to give proper counseling to the student as soon as a problem is evident.

If a student has had more than two unexcused absences in 60 days or three unexcused absences in 90 days, the director may take disciplinary action as stated in the policies of the individual programs.

Absence Due to Illness

A student who is absent because of illness for three continuous days or more must submit a physician’s statement indicating the nature of the illness, the requirement for absence and a release to return to school. Absences of three or more consecutive days will be reviewed by the program director and dean for the possibility of a leave of absence, requiring the student to repeat the classes or clinical rotations missed. Absences exceeding two classes or 50% of the course content within one course may necessitate a makeup period at the conclusion of the course, which might delay a clinical rotation or anticipated graduation date.

Students may be required to complete additional out of classroom assignments to make up work due to any absences. The program director in cooperation with the course instructor/s will review the factors for the absence and will determine the need for make-up work. It is the student’s responsibility to contact the program official immediately following absenteeism or lateness regarding coursework or exam make-up. An unreported absence is considered an unexcused absence.

Excused Absences

Excused absences will be handled on an individual basis by the program director. Scheduling of any elective physician appointment or other personal appointment must be cleared by the program director in advance of the date or the absence will be unexcused. Examples of excusable reasons for absence are illness, death or illness in the immediate family, jury duty, subpoena, religious observance, faculty-approved attendance at professional conferences or military service (19 TAC §4.4).

In the case of absence due to military service, the student must be excused from regularly scheduled classes or other required activities if he or she is called to and/or participates in active military service for a reasonably brief period. In this case, students will be allowed to complete an assignment or exam within a reasonable time after the absence. If the student is aware of the need for an absence prior to the day of the absence, that student should notify the program director or an instructor in advance of the absence (7EC §51.9111 and 19 TAC §4.9).

Religious Holidays

A student who is absent from a class or examination for the observance of a religious holiday may complete the work missed within a reasonable time after the absence if proper notice has been given. Notice must be given at least 15 days prior to the classes scheduled on dates the student will be absent.

For religious holy days that fall within the first two weeks of the semester, notice should be given on the first day of the semester. It must be personally delivered to the instructor and signed and dated by the instructor, or sent certified mail, return receipt requested. A student who fails to complete missed work within the time allowed will be subject to the normal academic penalties.

Additional special regulations may be enacted through the normal legislative process and updated in this Catalog.

Credit by Exam

The School of Health Professions may accept courses accepted or taken at other institutions if deemed to include the appropriate content required for advancement in the programs. The student should request a course equivalency review from their program director or other designated faculty. Credit by Exam may include College Level Examination Program dual credit courses or School of Health Professions administered program examinations. A maximum of 8 SCH earned in this manner may be applied to the science prerequisites in biology, chemistry or physics.

The program director and/or course instructor will evaluate all official transcripts from regionally accredited institutions on an individual basis to determine if coursework is acceptable as credit towards the satisfaction of prerequisite courses at the
School of Health Professions. Credit will not be given for experiential learning or for courses that duplicate prior credit given by another institution. Credit is awarded only in areas offered within the current curriculum requirements of the institution and related to the student’s program of study.

Credit Earned by Equivalency
Course equivalency credit is the substitution of credit for a course taken at another institution in place of a specific School of Health Professions course. This type of credit is only granted when the non-School of Health Professions course contains course content that is equivalent to the School of Health Professions course for which the student is requesting equivalency.

Courses must be upper-level courses taken at the university level. Courses in which grades lower than C are not eligible for credit by equivalency. Requests for obtaining course-equivalency must be submitted prior to the start of the semester using the approved Petition for Equivalency form.

Curriculum Changes
The School of Health Professions places primary responsibility for the quality and oversight of its educational programs with its program directors and primary faculty operating through the Curriculum Committee. At the program level, the program director is responsible for reviewing significant changes to current courses and determines the appropriate number of scholastic credit hours.

Approval Process
The program director initiates the approval process for substantive changes or additions by submitting the proposed new or revised changes to the Program Curriculum Committee. Upon approval by the Program Curriculum Committee, the requested changes are forwarded to the School of Health Professions Curriculum Committee. Significant changes or additions must receive written approval by the School’s Curriculum Committee and the dean prior to implementation.

Documentation and consideration of approval of new degree programs must receive written final approval by the President of the University and The Texas Higher Education Coordinating Board. The responsibility for obtaining this level of approval is the shared responsibility of the dean and the respective program director and primary faculty.

Original Documentation
The chair of the School’s Curriculum Committee will maintain original documentation of meeting minutes, academic changes and/or additions within the programs in the School. Additionally, copies of program-specific documentation will be held by the program director in the files of that program.

Membership of School’s Curriculum Committee
The School’s Curriculum Committee shall consist of the chair (non-voting member), the dean (an ex-officio member), a Student Affairs representative (ex-officio member) and at least one full-time faculty member from each of the School’s academic programs. The dean will appoint the members to this committee based on recommendations from the School of Health Professions faculty.

Examinations
The following instructions govern the conduct of final examinations as well as other examinations given during the semester:

- Instructors are responsible for advising students of the rules governing examinations and for supervising examinations in their respective classes. They, or their representatives, must remain in the examination room and take necessary actions to ensure an orderly examination and minimize the temptations and opportunities for cheating.
- Students must be informed that all written work handed in by them is considered to be their own work, prepared without unauthorized assistance.
- Students should be asked to cooperate in maintaining the integrity of examinations and encouraged to inform the instructor, without specifying the offenders, when cheating goes on in class.
- Rules for test-taking.
  - Remain in the examination room until the test is completed.
  - Refrain from talking.
  - All notes, books and electronic devices must not be accessible during the examination unless specifically approved by the instructor for that exam.
- An instructor who suspects academic dishonesty must report the incident to the dean.

Reference the Provisions: Conduct section for more information regarding student conduct.

Grades
Overview
A student’s standing in academic work is expressed by grades earned on class assignments and examinations.

Grading scale

<table>
<thead>
<tr>
<th>Number Range</th>

<td>D</td>
<td>1.0</td>
</tr>
<tr>
<td>Below 60</td>
<td>F</td>
<td>0.0</td>
</tr>
</tbody>
</table>

To receive credit for a course, an undergraduate student must earn a grade of C or above in both academic and clinical coursework. A student in the School of Health Professions must achieve a grade of C or above in all program courses to graduate. A grade below a C in any course may result in an academic dismissal from the respective program. This action is posted to the student’s permanent record. During this period, the student will have the opportunity to exercise the appeal process outlined in the Grievance section of the School of Health Professions Policies and Procedures. A student who wishes to be readmitted after an academic dismissal from the respective program may apply to the program through the entire admissions process for the next academic year.

After a grade is reported to the registrar, it may not be changed unless an error was made by the instructor. Grades are given by semesters, however, in a course extending through two semesters, credit is not counted toward the degree until both semesters of the course are completed.
A student is expected to complete a course, including self-paced courses, in a single semester or summer session. If the course is not completed as expected, the student normally will not be given additional time to complete it or to do additional work to achieve a better grade. In rare instances, and subject to the approval of the instructor, a temporary delay of the final course grade, Incomplete (I), may be given. If no final grade is reported by the end of the next semester, excluding any intervening summer session, a grade of I is recorded as the final grade in the course. A student will not be able to graduate unless the symbol I is replaced by a passing letter grade.

Members of the staff are not authorized, without the academic dean’s approval, to withhold a final grade or to defer reporting a final grade at the end of the semester other than by the use of the symbol I. If a grade is withheld without the dean’s approval, the grade may not be added to the official records later without the written approval of the dean.

**About Symbols**

Under specific conditions, instructors may use symbols to report a student’s standing in the semester’s work. The symbol I is used to report a temporary delay of the final course grade for a student who has been given additional time to complete a course, and the symbol W to indicate that a student has officially withdrawn from MD Anderson. If a faculty member fails to report a grade for a student, the registrar will enter the symbol I to provide the student time to contact the faculty member and arrange for a final grade to be reported. If a final grade is not reported by the end of the next semester, excluding any intervening summer session, the registrar will change the I to an F. The registrar will notify the student when a grade change is reported.

**Symbol I: Temporary Delay in Reporting the Final Course Grade**

Issuance of the symbol I, representing a temporary delay in reporting the final course grade, is approved under the circumstances described below and is at the discretion of the instructor.

If a student receives a symbol I in a course, the student must complete the requirements for the course and have the instructor report a final course grade on or before the last date for grade reporting in the next semester, excluding any intervening summer session, or an F will be recorded as the final grade in the course. The period for completion of the coursework may be extended only for unusual circumstances beyond the student’s control as recommended by the instructor and approved by the student’s academic dean. A student who has received an I in a course may not register for that course again until a final grade has been recorded unless the course is one that may be repeated for credit.

If the symbol I appears on a student’s record, the course for which the symbol is recorded is not used in the calculation of the student’s GPA. When the instructor assigns the final course grade and it is approved by the student’s dean and reported to the registrar by the appropriate deadline, the grade is entered on the record and counted in computing the student’s GPA. The symbol I remains on the record.

**Approved Uses of the Symbol I**

An undergraduate student may, with the approval of the instructor, be assigned the symbol I in a course for one of the following reasons:

**Missing the Final Examination**

The student is unable to take a final examination because of illness or other nonacademic reason. A physician’s statement or other satisfactory verification is required.

**Incomplete Classroom Assignment**

The student has not been able to complete the required class or laboratory assignments for a reason other than lack of adequate effort. A request for temporary delay of the final course grade because of incomplete class or laboratory work can be made only if the student has a passing average on the class or laboratory work already completed and has taken and passed the final examination (unless a final examination is not given in the course or the student is unable to take the examination for reasons indicated in the previous paragraph).

**Reexamination Petition**

Only a student who has an average of C or above on all class and laboratory work submitted before the final examination may request a temporary delay of the final course grade because he or she failed the final examination, which is the examination given during the final examination period as printed in the official examination schedule. If the petition is denied by the instructor, the student’s final course grade will remain as originally determined. If the petition is granted by the instructor, the grade on the reexamination will be substituted for the grade on the original examination in determining the student’s final course grade, provided the student earns at least a C on the reexamination. If the grade on the reexamination is less than a C, a final course grade of F must be recorded.

The temporary delay of final course grade symbol is not issued for student or faculty convenience; it may be issued for the reasons cited above only in the case of compelling, nonacademic circumstances beyond the student’s control.

**Improper Uses of the Symbol I**

A student must not be assigned a temporary delay of the final course grade symbol to permit any of the following:

- Time to prepare coursework in addition to that assigned to the entire class.
- Time to repeat the entire course.
- Opportunity to raise a grade for any reason other than the approved reasons cited above.

**Computation of the Grade Point Average**

The cumulative GPA for each student is calculated based on all work undertaken at MD Anderson (including credit by examination, correspondence and extension) for which a letter grade is recorded. Courses in which the symbol W or I is recorded are excluded in calculating the GPA.

**Graduating with Honors**

Based on cumulative GPA earned at the School of Health Professions recorded the last day of the Spring Semester in the graduating year. All students meeting the requirements outlined below will be recognized at the commencement ceremony:

- **Magna Cum Laude** 3.7 to 3.899 recognition with silver cords
- **Summa Cum Laude** 3.9 to 4.0 recognition with gold cords
Graduation

General and specific requirements for degrees may be altered in successive catalogs. A student is bound by the requirements of the catalog in force at the time of his/her admission; however, a student must complete all requirements within seven years or be subject to degree requirements of subsequent catalogs. The student who is required to or chooses to fulfill the requirements of a subsequent catalog must have his/her amended degree plan approved by the dean of the School of Health Professions.

School of Health Professions Commencement Exercise

Graduating Student Eligibility

- All program directors must submit the Degree Authorization Form for each student to be eligible to participate in the commencement ceremony.
- Students must be enrolled and in good academic standings to participate in the commencement exercise. A student who has withdrawn; been dismissed; or currently placed on probation may not participate in the commencement exercise.
- Completion of School of Health Professions and program degree requirements are required to be eligible to participate in the ceremony.
- If an ineligible student request to participate in the commencement exercise and the program director denies student’s request, the student may appeal to the dean.

School of Health Professions Commencement Exercise Information

- Participation in the commencement exercise is strongly encouraged, however, participation is not a requirement for completion of a degree/ diploma.
- The location; date and time; rehearsal information; attendee parking; graduate photo; and family instructions will be provided to students and faculty by the dean’s Office in late June.
- Personalization or alteration to the student cap and gown is prohibited for the commencement exercise.
- The School of Health Professions will provide sign language accommodation.

Application and Procedure for Graduation

- Each student must order a Cap and Gown (from the graduation company) in order to participate in the commencement ceremony.
- Deadline: 2 months prior to the graduation date listed. Extras cap and gowns will not be ordered under any circumstances.
- All students must complete the School of Health Professions Clearance form, prior to the commencement ceremony, in order for the Diploma to be mailed.
- Student ID and Institutional materials must be returned to the program director.
- All students must apply for Graduation via the myUTH site.
- All students must satisfy all financial obligations (fines, fees, etc.) with the bursar’s office.
- The name that will be listed in the Commencement program is the students’ legal name currently on file in the Office of the Registrar.
- International Students must contact the Visa Office regarding clearance procedures and final process documentation.

Grievances – Academic

Academic appeals include those appeals related to grades and academic programs or degree requirements. Specific instructions are provided below for each type of academic appeal. In all instances, the School of Health Professions requires that every attempt be made to resolve such disputes informally though discussion among all relevant parties prior to initiating formal procedures.

Grade Appeals

All appeals relating to specific course grades require that students first seek a satisfactory solution with their primary course instructor(s). The student should request a conference with the program director or associate program director within two business days after the posting of grades.

If the matter is not resolved to the satisfaction of the student after meeting with the program director or associate program director, he or she may submit a written appeal to the dean within five business days of that conference. The dean will then initiate the appropriate procedures to review the appeal. The appeal process will include collection and review of all course grades, advising notes, explanation of extenuating circumstances, etc. The student will be notified in writing of the decision within seven business days.

Within five business days of the student’s receipt of the decision of the dean, the student may appeal the dean’s decision to the CETO. If no decision is rendered by the dean within seven business days from the delivery of the written grievance to the dean, the written grievance and grievance record may be sent by the student to the CETO. The CETO or their designee may take whatever action is deemed appropriate with seven business days. The decision of the CETO or their designee is final.

Appeals of Academic Program or Degree Requirements

All appeals relating to a specific program require that students first seek a satisfactory solution with their program director. In the event that a satisfactory solution cannot be reached with the program director, the student may submit a written petition to the dean of the School of Health Professions detailing the grounds for the appeal. Following are examples of student appeals:

- Petitions pertaining to the general education requirements and/or general university requirements.
- Petitions requesting that transferred elective credits be accepted for degree requirements. These petitions must be accompanied by a catalog copy of the course descriptions.

Outstanding Student of the Year Recognition with a Gold Sash

Each program will select one Outstanding Student of the Year, however, all students earning an MD Anderson 3.8 GPA and rank in the top one-third of the class on July 15 are eligible for consideration.

Outstanding Student Assessment Criteria

The selected Outstanding Student:

- Exhibits outstanding leadership qualities.
- Is highly motivated to work within the profession.
- Is consistently reliable.
- Demonstrates excellent communication skills.
- Has an outstanding ability to work with others.
- Effectively works independently.
- Demonstrates a high degree of maturity.
- Is an excellent example of MD Anderson’s Core Values of Caring, Integrity, Discovery, Safety and Stewardship.

**Selection Process and Criteria**

- The Program Faculty will rate each student using the Outstanding Student assessment criteria.
- The program director will select adjunct, clinical and/or non-primary program faculty to evaluate the students creating a 1:1 ratio with primary School of Health Professions faculty.
- The average assessment score will be added to the student’s July 15 MD Anderson grade-point-average. The student earning the highest score will receive this recognition.
- In the event there is a tie, the program director will make the final decision.

**Personal Record Information**

**Name Change**

MD Anderson policy is to maintain educational records under the student's full, legal name. Official documents such as diplomas and transcripts will not be issued bearing any other name.

A currently enrolled student may change the name on his or her permanent academic record by presenting a certified copy of the appropriate documentation to the Office of the Registrar. Correcting the spelling or the proper sequence of the name requires a copy of the student’s birth certificate. To change the name, the student must present a notarized request and a copy of the signed court order showing the new legal name. To assume the spouse's name following marriage, a student must present a notarized request and a copy of the marriage certificate. A student who wishes to discontinue use of the married name and resume use of the original family name or another name must present a divorce decree or signed court order showing restoration of the original, or other, name.

MD Anderson maintains student records under the name the student had when last enrolled. A former student may not change the name on his or her permanent academic record except by presenting a notarized request and a certified copy of the signed court order showing the authorized name change.

**Change of Address and/or Telephone Number**

The student must give correct local and permanent addresses and telephone numbers to the Office of the Registrar, the Office of the Dean and to the program director. The student must notify these offices immediately of any changes in address or telephone number.

Students may change their addresses online via myUTH.

Official correspondence is sent to the address last given to the registrar and program director. If the student has moved and failed to correct this address, he or she will not be relieved of responsibility on the grounds that the correspondence was not delivered.

**Procedure for Visiting International Relatives Attending the Graduation**

Students that plan to invite family residing outside the U.S.A. may apply for an *International Visitor Letter* from the Dean’s Office. Requests take approximately 5-10 business days to complete.

**Returning Student for Bachelor’s Degree**

A student who completes prerequisites within four years after completion of coursework at the School of Health Professions and returns to obtain a bachelor’s degree must meet with their program director to obtain permission to proceed with the pending requirements to graduate and receive a degree and diploma.

**Student Readmission**

The purpose of the policy is to identify the conditions in which previously dismissed students may be readmitted to the School of Health Professions and its programs after a separation from the school due to academic and/or disciplinary (conduct/behavioral) dismissal. Refer to *Student Readmission (SHP02)*.

**Summons and Official Communications**

**Summons to Administrative Offices**

A summons to the office of any administrative officer must be observed. Failure to respond to a summons may result in suspension from MD Anderson. In most programs, a summons to the Dean is sent by mail, so it is important that the student keep the Dean, Registrar and Program Director informed of current address information.

**Official Communications with MD Anderson**

Students are expected to attend to business matters with MD Anderson during regular working hours on Monday through Friday. A student who is unable to conduct business personally should contact the appropriate office by mail or telephone. For purposes of proper identification and clarity, written communications should include the student's name, student identification number and local address (if applicable).

**Syllabi, Faculty Credentials and Textbook Information**

All course information including textbook information is provided on the Office of the Registrar page related to course description information upon registering for a course. After actual course registration, course syllabi are made available within the learning management system of the institution.

Appointed faculty in the school maintain credentials listings on the following institutional pages:

- School of Health Professions appointed faculty and staff
- MD Anderson Faculty Profile Institutional Search
Transcripts and Diplomas

Transcripts
With proper identification, a student may receive an official transcript in person, on-line via myUTH, or by mail. The transcript includes only the academic record accumulated at MD Anderson. Unofficial copies of transcripts from other institutions are furnished by the registrar in accordance with the Texas Open Records Act (a fee may be charged).

A transcript is a comprehensive record of an individual's academic progress; it contains all the significant facts about a student's admission, academic level and scholarship. No partial or incomplete record (e.g., with grades of F omitted) will be issued. A student who owes a debt to MD Anderson may not be able to obtain an official transcript until the debt is paid.

Texas law provides criminal penalties for forgery of a transcript or similar document.

Diplomas
A graduate of MD Anderson may purchase a diploma to replace one that has been lost or destroyed. If purchased more than one year after the original diploma was issued, the replacement will bear the reissue date below the date the degree was awarded. The signatures of MD Anderson and The University of Texas System officials may not be the same as those on the original diploma because the signatures of former officials are not maintained on file. Additional copies of an original diploma also may be purchased at the time of issue. The student will be required to pay a fee for the additional copy.

A student who requests a new diploma based on a change of name must pay the fee unless the name change was submitted by the deadline set by the registrar or a postponement of the deadline was granted.
General Regulations

Alcoholic Beverages

**Off-Campus**

Students traveling or attending events related to their didactic or clinical education are viewed as representatives of the institution and are expected to maintain the highest standards of personal conduct. The abuse of alcoholic beverages on such occasions will be considered a violation of policy. Failure to comply with this policy will constitute grounds for disciplinary action, up to and including expulsion from the school.

**On-Campus**

In accordance with the UT System Rules and Regulations of the Board of Regents, no alcoholic beverages are allowed on campus without special approval.

The University of Texas System Rules and Regulations of the Board of Regents

**Rule 80102: Alcoholic Beverages**

**Sec. 1 Prohibition**

The use of alcoholic beverages is prohibited on property and in buildings owned or controlled by The University of Texas System or any of the institutions. However, the Chancellor of the UT System or the president of an institution may waive this prohibition with respect to any event sponsored by the UT System or any of the institutions. An event is sponsored if a budgeted office, department, or division of the UT System or any of the institutions is responsible for organizing the event, inviting attendees, and paying expenses related to the event, except that such an event is considered to be sponsored even if an outside entity pays for the food and beverages at the event. Meetings or events organized and presented by registered faculty, staff, or student organizations are not events sponsored by the UT System or any of the institutions.

Section 1 immediately above does not apply to areas that are licensed under State law for the sale and service of alcoholic beverages, to a Special Use Facility during use by a noninstitutional individual, group, association, or corporation for purposes permitted by the Regents’ Rules and Regulations, Rule 80102, or to property, buildings, or facilities that are occupied by a third party pursuant to a written lease or occupancy agreement that does not specifically exclude alcoholic beverages.

Appearance and Demeanor

Professional attire is especially important for students who have direct patient contact. In most cultures, professional caregivers are expected to present a uniform appearance. If a student’s clothing differs greatly from the patient’s perception of professional hospital attire, the patient’s confidence in the institution’s professional standards may be negatively affected.

It is the policy of the School of Health Professions to require personal cleanliness, good grooming/hygiene and appropriateness of dress while students are in classes and student laboratories in the hospital or representing the school while off campus. The nature of the student’s clinical education requires cleanliness, neatness and a professional, business-like appearance—particularly in daily relations with patients, visitors and the public. The School of Health Professions follows the guidelines for personal appearance established by the institution. Individual written policies related to appropriate personal appearance and hygiene may be found within the policies of individual programs within the School.

**Appearance and Demeanor Guidelines**

Each student must always wear his or her ID badge when in class, on any part of the MD Anderson campus, or on clinical rotations. The ID badge must be worn on the upper portion of the body with the picture visible at all times. Students must also carry the emergency numbers card at all times. Good personal hygiene must be maintained. At times, students will be in close contact with patients, co-workers and fellow students. Students are required to adhere to departmental and/or clinical affiliate standards. Dress codes vary from program to program within the School of Health Professions, and each student is responsible for adhering to the dress code of his or her specific program. If a student is found to be in violation of the dress code policy, he or she will be instructed to return home to make the necessary adjustments to his or her attire or hygiene. Upon the second violation of the dress code, the student may be subject to disciplinary action. Projecting a professional image extends to the demeanor of each student. Students must be mindful of their behavior at all times, and are expected to exhibit a competent presence, good manners and a respectful, friendly and helpful attitude. Each student is a representative of MD Anderson and his or her program of study, and everything that a student says and does while on the premises or off campus reflects upon the institution and the school. Refer to the Appearance and Demeanor Policy, Institutional Policy (ADM0261 with VPN access).

Centers for Medicare & Medicaid Services (CMS) COVID-19

The purpose of this policy is to:

- Protect patients, visitors, and Workforce Members from SARS-CoV-2 (COVID-19) transmission and infection;
- Comply with the Centers for Medicare & Medicaid Services (CMS) eligibility requirements for participation in federally-funded health care programs, including but not limited to the CMS Omnibus COVID-19 Health Care Staff Vaccination Interim Final Rule; and
- Provide a process for ensuring the implementation of additional precautions, intended to mitigate the transmission and spread of COVID-19, for all Workforce Members who are not Fully Vaccinated.

Refer to the Centers for Medicare & Medicaid Services (CMS) COVID-19 Vaccination Policy (ADM3523 with VPN access).

Conduct and Discipline

The purpose of the policy is to explain School regulations concerning Student conduct and discipline. Refer to The University of Texas MD Anderson Cancer Center School of Health Professions Conduct and Discipline Policy (ACA1264).

Confidentiality

It is the policy of The University of Texas MD Anderson Cancer Center Programs in the School of Health Professions to protect, to the extent permitted by law, confidential information such as information relating to patients, student records, matters pertaining to pending litigation and intellectual property/scientific discoveries.

Under Pub. L. 104-191 the Health Insurance Portability and Accountability Act of 1996 (HIPAA), students have an obligation to respect the privacy of all patients and to hold in
Policy and Procedures

- The facility includes students doing clinical rotations in all individuals who have direct contact with patients or human resource management. Organizations (Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) standards pertaining to human resource management.

- Criminal background checks were instituted by the School of Health Professions to meet clinical agency compliance with the Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) standards pertaining to human resource management.

- The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees. This includes students doing clinical rotations in the facility and/or off-site facilities. Competency extends beyond technical skills to an individual's criminal history.

A student is defined as a person who

- Is enrolled at MD Anderson, or
- Is accepted for admission or readmission at MD Anderson.

Conflicts of Interest

It is the policy of the School of Health Professions to ensure that students do not engage in any business transaction or professional activity, or incur any obligation, financial or otherwise, that conflicts with the proper discharge of their duties.

Students are prohibited from

- Accepting or soliciting any gifts, favor, service or benefits that might reasonably tend to influence the student in his/her performance (Regents’ Rules and Regulations, Rule 80103).
- Accepting outside employment or engaging in a business or professional activity that might require or induce the student to disclose confidential information.
- Accepting outside employment or compensation that could impair the student’s independence of judgment in the performance of his/her clinical and/or didactic responsibilities.

COVID-19 Statement

COVID-19: The University of Texas MD Anderson Cancer Center is closely monitoring the coronavirus outbreak and following guidance from the Centers for Disease Control and Prevention, U.S. Department of State, State of Texas and City of Houston Administrations. Due to the unpredictable course of the coronavirus outbreak, the School of Health Professions may be compelled to offer some or all didactic courses in a hybrid-format, and make changes to the course offerings, including rescheduling of laboratory exercises, clinical laboratory rotations, and thesis research.

Criminal Background Check

Policy Overview

Criminal background checks were instituted by the School of Health Professions to meet clinical agency compliance with the Joint Commission on Accreditation of Healthcare Organizations (Joint Commission) standards pertaining to human resource management.

The Joint Commission requires verification of competency of all individuals who have direct contact with patients or employees. This includes students doing clinical rotations in the facility and/or off-site facilities. Competency extends beyond technical skills to an individual’s criminal history.

A student is defined as a person who

- Is enrolled at MD Anderson, or
- Is accepted for admission or readmission at MD Anderson.

Implementation

Criminal background checks are required for all newly admitted students and successful completion of a criminal background check is required for admission to all the School of Health Professions programs.

Disclaimers

- Successful completion of a criminal background check for a School of Health Professions program does not ensure eligibility for licensure or future employment.
- If they so desire, clinical agencies may establish more stringent standards to meet the regulatory requirements for their facilities.
- Clinical agencies may conduct additional background checks at their discretion.

Allocation of Cost

The cost of the criminal background check is the responsibility of the student.

Gang-Free Zones

Premises owned, rented or leased by MD Anderson and areas within 1,000 feet the premises are gang-free zones. Certain Criminal offenses, including those involving gang-related crimes, will be enhanced to the next highest category of offense if committed in a gang-free zone by an individual 17 years or older (Texas Penal Code (TPC), §71.028).

Grievances – Nonacademic

This procedure is intended to provide students with an opportunity to formally grieve any perceived act, omission or issue of a nonacademic nature which adversely affects the grieving student and for which no other grievance or appeals procedure is provided in the UT System or in the policies or procedures of the School of Health Professions (19 TAC, §1.112).

- The formal written grievance should be initiated as soon as possible.
  - If the student chooses not to attempt informal resolution of a grievance, he or she must file a formal written grievance not more than 30 calendar days from the date that he or she knew or should have known of the offensive act or issue.
  - If the student attempts informal resolution and then chooses to file a formal written grievance, he or she must file the written grievance within five working days from the last informal attempt at resolution.
  - If the student does not use the informal resolution, then the formal written grievance must be filed not more than 30 calendar days from the date the student knew or should have known of the offensive act or issue.

- The student may file the written grievance, setting out a complete description of the grievance and the proposed remedy.
  - If the accused individual is a School of Health Professions employee, the employee’s immediate supervisor receives the written grievance. The dean can assist students in identifying the accused individual’s supervisor so that the written grievance may be filed with the appropriate person.
  - If the accused individual is a student, the written grievance is given to the appropriate program director of the student.
Where the grievance does not involve an individual, the grievance may be filed with the administrator responsible for the program issue or issues involved. Copies of the grievance will be made available to the student who has filed the grievance, the director of his or her program, the individual accused of the act or omission is the subject of the grievance, and the accused individual’s supervisor and the administrator to whom the grievance is presented.

- The administrator hearing the grievance may, at his or her discretion, hold discussions with or without the accused to hear and resolve the grievance, schedule a meeting between the student and the party accused, and/or involve other parties in facilitating a resolution of the grievance.
- If the decision of the grievance officer is to affirm the grievance, any resulting directive to the accused must be presented in writing and must be pursuant to a meeting between the accused and his or her supervisor. Denial of the grievance must also be presented in writing.
- Within five working days of the student’s receipt of the decision of the dean, the student may appeal the dean’s decision to the CETO. If no decision is rendered by the dean within 14 working days from the delivery of the written grievance to the dean, the written grievance and grievance record may be sent by the student to the CETO.
- The VPE may take whatever action is deemed appropriate.
- Within five working days of the student’s receipt of the decision of the CETO, the student may appeal the CETO decision to the Chief Academic Officer (CAO) of MD Anderson. The CAO may take whatever action is deemed appropriate.

The decision of the CAO of MD Anderson is final.

Hazing

Hazing in state educational institutions is prohibited by both state law (TEC, §37.151 and §51.936 et seq.) and by the Regents’ Rules and Regulations, Rule 50101. Individuals or organizations engaging in hazing could be subject to fines and charged with criminal offenses. Additionally, the law does not affect or in any way restrict the right of the University to enforce its own rules against hazing.

Individuals

A person commits an offense if the person:

- Engages in hazing.
- Solicits, encourages, directs, aids or attempts to aid another person engaging in hazing.
- Recklessly permits hazing to occur, or
- Has firsthand knowledge of the planning of a specific hazing incident involving a student in an educational institution or has firsthand knowledge that a specific hazing incident has occurred, and knowingly fails to report that knowledge in writing to the dean of the School of Health Professions or other appropriate officials of the institution.

Organizations

An organization commits an offense if the organization condones or encourages hazing or if an officer or any combination of members, pledges or alumni of the organization commit or assist in the commission of hazing.

Definition

The term hazing is broadly defined by statute to mean any intentional, knowing or reckless act, occurring on or off the campus of an educational institution, by one person alone or acting with others, directed against a student, that endangers the mental or physical health or safety of a student for the purpose of pledge, being initiated into, affiliating with, holding office in or maintaining membership in an organization.

Hazing includes, but is not limited to

- Any type of physical brutality, such as whipping, beating, striking, branding, electronic shocking, placing of a harmful substance on the body or similar activity.
- Any type of physical activity, such as sleep deprivation, exposure to the elements, confinement in a small space, calisthenics or other activity that subjects the student to unreasonable risk of harm or that adversely affects the mental or physical health or safety of the student.
- Any activity involving the consumption of a food, liquid, alcoholic beverage, liquor, drug or other substance that subjects the student to an unreasonable risk of harm or that adversely affects the mental or physical health or safety of the student.
- Any activity that intimidates or threatens the student with ostracism, that subjects the student to extreme mental stress, shame or humiliation, that adversely affects the mental health or dignity of the student or discourages the student from entering or remaining registered in an educational institution, or that may reasonably be expected to cause a student to leave the organization or the institution rather than submit to acts described in this subdivision.
- Any activity that induces, causes or requires the student to perform a duty or task that involves a violation of the Penal Code (Note: the fact that a person consented to or acquiesced in a hazing activity is not a defense to prosecution.).

Regents’ Rules and Regulations, Rule 50101 provides that

- Hazing with or without the consent of a student is prohibited by the System, and a violation of that prohibition renders both the person inflicting the hazing and the person submitting to the hazing subject to discipline.
- Initiations or activities by organizations may include no feature which is dangerous, harmful or degrading to the student, and a violation of this prohibition renders both the organization and participating individuals subject to discipline.

Activities which under certain conditions constitute acts that are dangerous, harmful, or degrading, in violation of Rules include but are not limited to

- Calisthenics, such as sit-ups, push-ups or any other form of physical exercise.
- Total or partial nudity at any time.
- The eating or ingestion of any unwanted substance.
- The wearing or carrying of any obscene or physically burdensome article.
- Paddle swats, including the trading of swats.
- Pushing, shoving, tackling or any other physical contact.
- Throwing oil, syrup, flour or any harmful substance on a person.
- Rat court, kangaroo court or other individual interrogation.
- Forced consumption of alcoholic beverages either by threats or peer pressure.
- Lineups intended to demean or intimidate.
• Transportation and abandonment (road trips, kidnaps, walks, rides, drops).
• Confining individuals in an area that is uncomfortable or dangerous (hot box effect, high temperature, too small).
• Any type of personal servitude that is demeaning.
• Wearing of embarrassing or uncomfortable clothing.
• Assigning of embarrassing or uncomfortable clothing.
• Intentionally messing up the house or room for clean-up.
• Being called by a demeaning name.
• Enduring yelling and screaming.
• Requiring boxing matches or fights for entertainment.

**Immunity**

In an effort to encourage reporting of hazing incidents, the law grants immunity from civil or criminal liability to any person who, in good faith and without malice, reports a specific hazing event to the School of Health Professions dean or other appropriate officials of the institution and immunizes that person from participation in any judicial proceeding resulting from that report.

Additionally, a doctor or other medical practitioner who treats a student who may have been subjected to hazing may make a good faith report of the suspected hazing activities to police or other law enforcement officials and is immune from civil or other liability that might otherwise be imposed or incurred because of the report.

The penalty for failure to report is subject to a fine or time in jail or both.

**Health Information for Students**

**AIDS, HIV and HBV**

MD Anderson recognizes the acquired immune deficiency syndrome (AIDS), human immunodeficiency virus (HIV) and hepatitis B virus (HBV) as serious public health threats. It is the policy of this institution to minimize risk to our patients and to provide the highest quality patient care. It is also the policy of this institution to make reasonable accommodations when disabilities limit the capacity of otherwise qualified applicants and employees as set forth in the Accommodating Disabilities Policy for AVA Trainees (ACA0081 with VPN access) and the Accommodating Disabilities in the Workplace Policy (ADM0286 with VPN access). Any student or employee infected with HIV or HBV will not be permitted to perform exposure-prone procedures unless and until an Expert Review Panel determines that it would be medically appropriate to do so.

The existence of HIV or HBV infection will not be used by MD Anderson to determine suitability for admission to an educational program unless the program requires performance of exposure-prone procedures as identified by MD Anderson’s Expert Review Panel. No employee or student will be denied benefits or provided reduced benefits under a health plan offered through the UT System on the basis of a positive HIV test result. A person with HIV or HBV infection shall not be denied access to MD Anderson because of HIV or HBV infection. Refer to the HIV/HBV Policy (ADM0348 with VPN access) regarding AIDS, HIV and HBV.

It is also the policy of the institution to prevent the spread of infections between patients and faculty, trainees/students and other members of MD Anderson’s workforce. Refer to the Management of Occupational Exposure to Blood or Body Fluids Policy (ADM1068 with VPN access).

Information concerning the HIV, AIDS or HBV status of students, employees, or patients, and any portion of a medical record will be kept confidential and will not be released without written consent, except where release is required or authorized by law, or as necessary to provide a reasonable accommodation or to investigate an occupational exposure (TEC §51.919 and §51.933).

**Educational Materials Concerning AIDS/HIV**

Refer to the HIV/HBV Policy (ADM0348 with VPN access).

**Bacterial Meningitis**

The UT System has issued a policy statement (docx) regarding Texas Meningitis Laws. TEC, §38.0025 and §51.9191-92 that applies to students under the age of 30, requiring a meningococcal (bacterial meningitis) vaccine or “booster” dose during the five-year period prior to but no later than ten days before the first day of the first semester students will enter that institution (19 TAC, §21.610).

**Policy Revision**

**Effective October 1, 2013:**

- Students 22 years of age or older are not required to submit evidence of meningococcal meningitis vaccination.
- Affidavit forms for exceptions to vaccination for reasons of conscience, such as religious or philosophical belief can only be issued by the Texas Department of State Health Services (DSHS).
- The exception form from DSHS must be signed and notarized no more than 90 days prior to the first day of classes to be valid.

**Information about Meningitis**

The School of Health Professions provides all new students with information about bacterial meningitis including the following.

- Symptoms
- How the disease is diagnosed
- How it is transmitted
- Consequences of the disease
- How it can be treated

All students must acknowledge receipt of this information during online Onboarding prior to arrival on campus.

**Contagious Diseases and Immunization Requirements**

If a student contracts or is exposed to a communicable disease, the student must notify the program director so that patient contact limitations are considered. All institutional policies regarding infection will be observed. Copies of these policies are available in each Program Office and in the Office of the Dean.

Federal regulations require that

- Students who are at risk for exposure to body/ blood fluids must be informed of the potential danger of contracting the hepatitis B virus and other infectious materials.
- The School of Health Professions must show documentation that each student has
  - been informed of the standard exposure precautions to be followed when working with patients,
  - received the hepatitis B vaccine or has declined the vaccine but understands the risk incurred by so doing and
  - completed the Immunization Form at the time of registration.
Health Insurance

**Purpose**
It is the policy of the School of Health Professions to require all students entering into one of the School of Health Professions’ programs to carry health insurance. (TEC, § 51.952). Students will be automatically assessed The University of Texas insurance plan but may have this fee waived by UTHS. Auxiliary Enterprises if proof of comparable coverage is presented by the 12th class day.

Students enrolled in The University of Texas insurance plan may seek medical care at

**UT Health Services**
7000 Fannin St, Ste 1620
Houston, TX 77030

**Policy Statement**
Beginning in 2002, the UT System Registrar’s Office requires that all students enrolled in health institutions have health insurance coverage.

The student health insurance program is offered to registered students through a private company selected by the UT System office. This plan is designed to supplement student health services provided in the student clinics. In addition, it also assists with expenses not covered by the student services fee and those incurred outside that setting such as prescriptions, hospitalization, etc. Students have the option of enrolling their families in this plan at an additional cost. This plan is reviewed each year and revised to meet the current needs of the students.

In addition, the Regents requires all international students holding nonimmigrant visas and living in the U.S. to have coverage for repatriation and medical evacuation while enrolled at component institutions of The University of Texas. The required health insurance fee assessed by the University includes coverage for repatriation and medical evacuation. International students with coverage outside of the plan can visit the Auxiliary Enterprises site or contact them via telephone 713-500-8400 or email to provide the information needed to waive the insurance fee and, if needed, purchase coverage for repatriation and medical evacuation (Regents’ Rules and Regulations, Rule 50402).

**Students Enrolled in Field Experience Courses**
All students enrolled in field experiences courses are covered by a certificate of liability insurance issued annually to the Board of Regents (Regents’ Rules and Regulations, Rule 50501).

**Student Counseling**
MD Anderson School of Health Professions students seeking counseling should contact The University of Texas Employee Assistance Program (UTEAP) office, which provides services to students through a variety of resources. Limited services are also available for students’ dependents.

**Intellectual Property**

**Purpose**
The Regents and the School of Health Professions encourage the development of inventions and other intellectual creations for the best interest of the public, the creator and any research sponsor. After securing available protection for the creation, the School of Health Professions will permit the disclosure of intellectual property by development and commercialization, by publication or both.

The basic policy of the board is to develop intellectual property primarily to serve the public interest, and usually this is best achieved by developing and commercializing the property by exclusive licensing. However, the public interest may sometimes be promoted best by granting nonexclusive licenses for the period of the patent. These determinations will be recommended and made in accordance with administrative procedures established by the board and the School of Health Professions.

The Intellectual Property Policy (ADM0345 with VPN access) has been formulated to clarify and protect the interests of all concerned.

**Application**
This intellectual property policy applies to all candidates for degrees or certificates. As used in the context of this policy, the term “intellectual property” includes any invention, discovery, trade secret, technology, scientific or technological development, computer software or other forms of expression that is in a tangible form.

The board does not assert an interest in student, professional, faculty or non-faculty-authorized works, scholarly works, art works, musical compositions and dramatic and non-dramatic literary works related to the faculty member’s processional field regardless of the medium of expression, unless the work is commissioned by the board or is a work for hire.

**Rights**
The board has rights in the intellectual property if the intellectual property is related to an individual’s employment responsibility or has resulted from activities performed by the creator(s) on the School of Health Professions time, under any of the following circumstances.

- With support of state funds
• While using facilities or personnel of the School of Health Professions
• While engaged in research supported by a grant or contract from a federal agency, by a profit or non-profit entity or by a private gift to The University of Texas

However, a creator of intellectual property who does not fall within any of the previously mentioned circumstances may offer his or her creation to the UT System. In such case, the dean of the School of Health Professions will recommend to the board whether the System should support and finance a patent application or other available protective measures and manage the development and commercialization of the property.

The UT System, with the cooperation of the School of Health Professions, will provide review and management services for patentable inventions as well as other intellectual property either by its own staff, through a related foundation or by other means.

**Protection**

To obtain protection for intellectual property, an individual will complete the School of Health Professions Invention Disclosure form and submit it to the attention of the chair of the Intellectual Property Advisory Committee. Copies of the form may be obtained from the Office of Legal Affairs and Risk Management.

**Assertion of Interest**

The committee will review each disclosure and formulate recommendations regarding what interest, if any, the School of Health Professions has in the property, and whether the School of Health Professions and the board should assert their interest or permit the creator to proceed on his or her own with or without certain restrictions. The committee’s recommendations will be forwarded to the president, who will forward his or her recommendations to the board.

If the School of Health Professions chooses not to assert its interest in a newly created intellectual property, and that recommendation is approved by The University of Texas Office of General Counsel and the executive vice chancellor for health affairs, the creator will be notified within 180 days of the date of submission.

If the School of Health Professions chooses to assert its interest, it will work with the UT System to pursue patent or other appropriate protection of the intellectual property and will bear the costs of doing so.

**Royalties**

The School of Health Professions and The University of Texas royalties, as net royalties are defined by the board, will be shared between the School of Health Professions and the creator(s) according to the following formula:

- 50% creator(s)
- 5% school(s) of creator(s)
- 5% department, division (or equivalent)
- 5% laboratory of creators
- 5% legal fees
- 30% The University of Texas MD Anderson Cancer Center School of Health Professions Fund

If no school or department is clearly involved in the original development, the Intellectual Property Advisory Committee will suggest a division consistent with the intention of the division shown above. The final decision will rest with the president.

**Institutional Mandatory Training**

Students must take all one-time and annual trainings required by MD Anderson, the Division of Education & Training, the School and their academic program. Student non-compliance will be managed in accordance with The University of Texas MD Anderson Cancer Center School of Health Professions Conduct and Discipline Policy (ACA1264). See Institutional Mandatory Training Policy (ADM1168 with VPN access).

Trainings include but are not limited to the following:

- “New hire” training: Available during Onboarding to new students at the School. The training must be completed within the first 30 days of the student’s first semester. Students missing the deadline will receive a written notification and possible loss of access to MD Anderson systems (email, DUO, etc.) until proof of completion is submitted to their program director.
- Lab safety training: Available during Onboarding for new students at the School in a laboratory science program. The training must be completed PRIOR to the first day of the first semester. Students missing the deadline will not be allowed to attend any laboratory classes until proof of completion is submitted to their program director.
- Annual training: Available annually in March for ALL students at the School. The training must be completed by the Friday before Summer registration (see Academic Calendar). Students missing the deadline may incur one or more of the following until proof of completion is submitted to their program director: a hold on summer registration, a hold on their transcripts or a hold on spring grades.

**Notification of Students Rights under FERPA**

It is the policy of MD Anderson to protect the privacy and records access rights that apply to records maintained by or for MD Anderson about its current and former students by complying with the Family Educational Rights and Privacy Act (FERPA) at all times. FERPA, 20 U.S.C. §1232g, and 34 C.F.R. Part 99 provide students with the certain rights with respect to their education records. Refer to the Student Rights Under the Family Educational Rights and Privacy Act (FERPA) (ACA1222).

The Office of the Registrar maintains all official records of enrollment for School of Health Professions students. Review the following information regarding the rights of a student on the Office of the Registrar’s site.

**Observance of Religious Holy Days**

**TEC, §51.911(b) reads in part as follows.**

“An institution of higher education shall excuse a student from attending classes or other required activities, including examinations, for the observance of a religious holy day, including travel for that purpose. A student whose absence is excused under this subsection may not be penalized for that absence and shall be allowed to take an examination or complete an assignment from which the student is excused within a reasonable time after the absence.”

The notification shall be in writing and shall be delivered by the student personally to the instructor of each class, with receipt of notification acknowledged and dated by the instructor or by certified mail, return receipt request, addressed to the instructor of each class.
On-Campus Housing

MD Anderson does not provide housing for students. Admitted students into the School of Health Professions may submit an application to be considered for available housing with UTHealth Auxiliary Enterprises. The student will be subject to the requirements as stated by UTHealth Auxiliary Enterprises.

Personal Protective Equipment and COVID-19

Students must adhere to the Personal Protective Equipment (PPE) Policy (ADM1118 with VPN access) and all relevant procedures regarding COVID-19 procedures and protocols as provided on the institutional intranet. Student non-compliance will be managed in accordance with The University of Texas MD Anderson Cancer Center School of Health Professions Conduct and Discipline Policy (ACA1264).

Public and Retail Space Use

It is the policy of MD Anderson to ensure that it is public and retail spaces are appropriately utilized in a manner consistent with state law governing the use of state-owned property and all policies and regulations of the UT System regarding the use of facilities. The institution’s facilities should be used only for purposes consistent with its mission and in a manner that is fair, reasonable and safe. In that regard, it is important to delineate the types of activities that may take place in the Public and Retail Space Use Policy (ADM0234 with VPN access).

Use of Common Outdoor Areas: Expressive Activities

Common Outdoor Areas are deemed to be traditional public forums, and are generally open to assembly, speech, and other Expressive Activities subject to reasonable restrictions on time, place, and manner.

Students may conduct Expressive Activities in the Common Outdoor Areas of MD Anderson’s campus within the time, place, and manner parameters established in the Expressive Activities in MD Anderson’s Common Outdoor Areas Policy (ADM3352 with VPN access). Visit the Expressive Activities on Campus web page for more information.

Sexual Harassment

MD Anderson prohibits any form of sex discrimination or sexual harassment by any member of the university community against another member of the university community. Members of the community include but are not limited to administrators, faculty, staff, students, residents and fellows and other trainees.

Sexual harassment has profound and detrimental effects on individuals’ work or academic performance as well as to their self-esteem. Additionally, sexual harassment often contributes to an offensive work or academic environment within the school/department that ultimately impedes MD Anderson’s mission to be a progressive, humanistic institution of higher education in the health sciences.

Sexual harassment is a form of sex discrimination that is illegal under Title VII of the Civil Rights Act of 1964 and Title IX of the Education Amendments of 1972. Beyond its illegality, sexual harassment is a behavior that is contradictory to the mission and goals of MD Anderson and will not be tolerated. Policies addressing sexual harassment or sexual misconduct and establishing procedures for resolving concerns or complaints about sexual harassment or sexual misconduct are the Sexual Harassment Prevention Policy (ADM0285 with VPN access) and the Non-Retaliation Policy (ADM0254 with VPN access).

Definition of Sexual Harassment

Sexual harassment occurs in a variety of situations that share common elements:

- The inappropriate introduction of sexual activities or comments into the work or learning environment,
- Unwelcome sexual advances,
- Requests for sexual favors and
- Verbal, visual or physical conduct of a sexual nature.

The criteria to determine whether or not an action constitutes sexual harassment are included in the Sexual Harassment Prevention Policy (ADM0285 with VPN access).

Sexual harassment may include men harassing women, women harassing men, men harassing men and women harassing women.

Consensual Relationships

Consenting romantic and sexual relationships between a faculty member and student are considered inappropriate and unwise.

Faculty members exercise power over students, as do supervisors over employees, whether in evaluating them, making recommendations for their promotion or future employment or conferring on them any other benefits. Others may be adversely affected by the relationship in that it places, or appears to place, the faculty member or supervisor in a position to favor or advance one student’s interest at the expense of others.

Consenting romantic and sexual relationships are in conflict with the relationship of authority that exists between a faculty member and his or her student and between a supervisor and his or her employee, and thus are viewed as damaging to the university environment.

Under conditions in which a relationship of authority exists between married individuals, a similar case for preferential treatment could be made. For these individuals, the nepotism rules are in force, as described in the Regents’ Rules and Regulations, Rule 30106, Nepotism.

Complaints lodged about consensual relationships by nonparticipating individuals will be treated as third-party sexual harassment complaints.

Procedure for Filing a Sexual Harassment Complaint

Students or other persons who believe they have been subjected to Sexual Harassment or Sexual Misconduct, including sexual assault, should report the incident with reasonable promptness to their choice of at least one of the following:

- Their academic program director and/or the dean of the School of Health Professions
- MD Anderson Human Resources Office of Equal Opportunity (HR EO), or Sheri Wakefield, Glery Act and Title IX Coordinator, at 713-745-6174 or sbrownlo@mdanderson.org.

Immediate safety concerns or issues should be reported by calling 911 or 2-STOP (713-792-7868).
Someone from the HR-EO office will contact the person making the complaint as soon as reasonably possible to acknowledge receipt of the complaint and schedule an intake meeting. The dean and Human Resources EO office will work together to arrange any interim safety measures as appropriate pending the outcome of the complaint. Further details about how a complaint is investigated and resolved can be found in the **Sexual Harassment Prevention Policy** (ADM0285 with VPN access).

To the extent permitted by law, complaints and information received during an investigation, including the results of the investigation, will remain confidential. The investigator will balance the need for confidentiality with the responsibility of the institution to provide an environment free from sexual harassment. Relevant information will be provided only to those persons who need to know in order to achieve a timely resolution of the complaint.

All trainees (including students), faculty and employees are expected to cooperate in investigations of alleged sexual harassment. Any person who knowingly makes a false statement, or inappropriately discloses confidential information during an investigation will be subject to disciplinary action, up to and including dismissal from the School of Health Professions.

Any person who retaliates in any way against an individual for filing a complaint in good faith, or for participating in an investigation, will be subject to disciplinary action in accordance with the applicable disciplinary policy and procedure, up to and including dismissal from an educational program.

### Smoking

It is the policy of School of Health Professions to safeguard the health of its students, employees, patients and visitors. Therefore, no one is allowed to smoke or use smokeless tobacco products on property owned or under the control of MD Anderson and the programs.

Any infraction of the non-smoking regulation is subject to disciplinary action up to and including termination.

### Student Congress

The School of Health Professions Student Congress is an elected student body designed to represent all program disciplines in the School. Once elected, students must remain in good academic standing to maintain their position as a representative of their program and the School.

The Student Congress consists of elected Congress persons who are representative of students from each of the programs in the School. Students elected to the Student Congress must remain in good academic standing to in order to maintain their position in the Student Congress. The Student Congress is a representative body and will serve as a forum to enhance communications between the students at MD Anderson and at any distance learning sites, and the faculty and the administration of the School. The Student Congress will also elect students to represent the School on the UT System Student Advisory Council and the McGovern Center Student Advisory Council.

The Executive Committee elected by the Student Congress will serve as an advisory body to the dean, assisting the administration in reaching decisions on policy that concerns students enrolled in the School. The Executive Committee will provide leadership to the Student Congress by identifying activities that will broaden the intellectual, cultural and recreational opportunities open to the entire School of Health Professions student body.

The Student Congress will organize community outreach activities for the School student body such as “Adopt a Family,” the donation of magazines throughout the year to hospital waiting rooms, and periodic food and clothing drives at MD Anderson and cities where distance learning sites are located. These activities are intended to further communications and relationships between the students at the School of Health Professions and the community.

### Student Right to be Informed about Information Collected

With few exceptions, upon your request, you are entitled to be informed about the information MD Anderson collects about you.

- Under Texas Government Code (TGC), §552.023, you are entitled to receive and review the information.
- Under TGC, §599, you are entitled to have MD Anderson correct information about you that is held by us and that is incorrect, in accordance with the procedures set forth in UT System Business Procedures Memorandum 32.

The information MD Anderson collects will be retained as required by Texas records retention laws (TGC, §441.180, et seq.) and rules. Different types of information are kept for different periods of time.

### Student Right-to-Know

**Campus Security Act**

In compliance with the Student Right-to-Know and Campus Security Act, 20 USC, §1092(a), (e) and (f), as amended, MD Anderson collects specified information on campus crime statistics.

Pursuant to the federal law, alleged victims of violent crime are entitled to know the results of campus student disciplinary proceedings concerning the alleged perpetrators. The University will make timely reports to the campus community on crimes considered to be a threat to students and employees and reported to campus police or local police agencies.

Every September, the university will publish and distribute an annual report of campus security policies and crime statistics to all current students and employees, provide copies of the report to applicants for enrollment or employment upon request and submit a copy of the report to the secretary of education upon request.

The annual campus crime statistics report will reference crimes which occur on property owned or controlled by the university. The university will publish in its annual security report, its policy regarding sex-related offenses, including sexual assault prevention programs, education programs to promote awareness of sex offenses, administrative disciplinary procedures and sanctions for offenders and counseling and student services for victims.

Visit the UT Police-Houston (UTP-H) Reports page to review the crime statistics on the Texas Medical Center campus.

**Comprehensive Emergency Notification System**

It is the policy of MD Anderson that a comprehensive emergency notification system is in place that requires all
employees (and students) to participate in the notification process in accordance with the content of this policy and any subsequent or additional emergency instructions provided by the Emergency Notification Policy (ADM1097 with VPN access).

All School of Health Professions students will be notified by the emergency notification system on campus, the Everbridge system. Emergency emails and text messages will be disseminated accordingly. The campus community will be notified of a significant emergency involving an immediate threat and campus evacuation, if required. Ongoing details are provided on the Emergency Alert Information page.

**Concealed Handgun Carriage on MD Anderson Campus**

It is the policy of MD Anderson to respect the Federal and Texas Constitutions, both of which recognize Texas citizens’ right to keep and bear arms. MD Anderson also recognizes the Texas Legislature’s power to regulate the carriage of handguns.

This policy does not authorize the open carry of a handgun on MD Anderson campus, and the open carrying of a handgun is prohibited on the MD Anderson Campus. Refer to the Policy on Concealed Handgun Carriage on MD Anderson’s Campus (ADM1254 with VPN access).

**False Alarm or Report**

Students are entitled to notification of state law relating to the false reporting of an emergency (e.g., fire, bomb threats, etc.) to the school or any other department of The University of Texas MD Anderson Cancer Center. Making a false report is a state jail felony and doing so may result in disciplinary action by the school, up to and including expulsion, as well as criminal charges.

**TPC, §42.06. False Alarm or Report**

(a) A person commits an offense if he knowingly initiates, communicates or circulates a report of a present, past, or future bombing, fire, offense, or other emergency that he knows is false or baseless and that would ordinarily:

(1) cause action by an official or volunteer agency organized to deal with emergencies;

(2) place a person in fear of imminent serious bodily injury; or

(3) prevent or interrupt the occupation of a building, room, place of assembly, place to which the public has access, or aircraft, automobile, or other mode of conveyance.

(b) An offense under this section is a Class A misdemeanor unless the false report is of an emergency involving a public or private institution of higher education or involving a public primary or secondary school, public communications, public transportation, public water, gas, or power supply or other public service, in which event the offense is a state jail felony.

**Fire Safety**

While on MD Anderson campus, students should know the emergency plan for fire as issued by the MD Anderson Department of Health and Safety:

Know how to report a fire:

- Be able to locate exits, fire extinguishers and pull stations.
- Activate the nearest pull station Call: 911 or 713-794-HELP (4357)

Remember R.A.C.E.

- Rescue
- Alarm
- Confine
- Extinguish if capable or Evacuate as directed

When using an extinguisher, remember P.A.S.S.

- Pull the pin
- Aim the hose or nozzle at the base of the fire
- Squeeze the handle
- Sweep the hose or nozzle from side to side

**Additional information**

For further information, call the MD Anderson Environmental Health and Safety department at 713-792-2888. For non-emergency requests for UTP-H, call 713-792-2890.

**Missing Student Notification**

It is the policy of MD Anderson to encourage a safe and secure environment for patients, visitors, and faculty, trainees/students, and other members of MD Anderson’s workforce. Refer to the Identification, Communications, and Notification of a Missing Person Policy (ADM1003 with VPN access) regarding communications and notifications pertaining to the disappearance or abduction of a missing.

Students are encouraged contact UTP-H for further instructions about the reporting process. In an emergency or to report an imminent threat requiring police response, dial 911. For non-emergency calls, dial 713-792-2890.

**Student Travel**

MD Anderson supports the educational, research and service activities of its student by organizing and sponsoring certain approved travel activities. It is the policy of MD Anderson to promote safe travel practice for students. Refer to the Student Travel Safety Policy – SHP (ACA0019).

**Students with Disabilities**

The School of Health Professions determines, establishes and publishes educational prerequisites and physical/mental skills necessary to perform in the respective clinical and didactic program. Reference the Nonacademic Requirements for general skills necessary for performance in all the programs, and the individual program catalog sites for skills needed for specific programs.

The School is committed to providing reasonable accommodations for students with disabilities. Students who have disabilities that require accommodation should discuss these with the program director early in the year. Documentation may be required to verify certain disabilities.

**Substance Abuse**

**Policy Overview**

MD Anderson is committed to maintaining an environment that is free from substance abuse, and its primary concern related to substance abuse among students is prevention and treatment. The institution provides educational programs to inform its community about the physical and psychological problems associated with substance abuse, as well as pertinent state and federal laws. MD Anderson recognizes that substance abuse is a treatable condition and, as an institution dedicated to health, facilitates the treatment and rehabilitation of this condition.
MD Anderson encourages impaired students, residents and fellows to seek help voluntarily and to assume responsibility for their professional and personal conduct. A student suspected of being under the influence may be removed from the classroom or clinical setting and referred for laboratory testing for the presence of illegal drugs or alcohol in the body. In cases in which a student causes harm to or endangers the safety of himself or herself or others, the student will be subject to disciplinary action. (Safe and Drug Free Schools and Communities Act, 20 USC §7101-7165).

The following are prohibited.

- The purchase, manufacture, distribution, possession, sale, storage or use of an illegal drug or controlled substance while on the premises or property owned or controlled by the university or in vehicles used for university business.
- Use of alcohol, an illegal drug or a controlled substance that occurs while not on university property or in university vehicles, but that adversely affects the safety of other students, employees, visitors or patients. This includes the use of alcohol at authorized official university functions or at an authorized university site that may adversely affect the safety of any other person.
- Use of prescription or over-the-counter medications without heed to warnings about impact on performance or safety.
- Distribution to others of drugs or controlled substances obtained pursuant to a prescription, except by a duly licensed and certified person, while in or on premises or property owned or controlled by the university.
- Arrival to class or the clinical setting under the influence of illegal drugs or alcohol.
- Arrival to class or work under the influence of legal drugs to the extent that there is an adverse effect on the student’s ability to perform.

Failure to comply with this policy by any student will constitute grounds for disciplinary action.

Any student who is convicted under a criminal statute for a drug-related offense is required to notify the dean and program officer or appropriate representative not later than five days after such conviction.

Sanctions
The following are the sanctions for students convicted of substance-abuse-related crimes.

- Any student convicted of illegal use, possession and/or sale of a drug or narcotic on campus shall be dismissed.
- A felony conviction of a violation of any criminal drug statute for use, possession, dispersion, distribution or manufacture of an illegal drug on MD Anderson premises will result in expulsion.

Vehicles on Campus
Students enrolled in the School of Health Professions may obtain parking contracts with either the Texas Medical Center parking office or surface lots owned by MD Anderson. The contract holder must give the parking office current and accurate information in accordance with institutional policies and Texas Medical Center regulations. Refer to the Parking Policy (ADM0230 with VPN access). Students that are disabled veterans with a disabled veteran license plate may park free of charge in Texas Medical Center and MD Anderson parking garages and surface lots, in accordance with applicable policies.

Veterans Education Counselor’s Program
Students seeking information regarding the Veterans Education Counselors program should contact the Office of the Registrar to support their endeavors for veteran’s educational opportunities. Contact Winston Matranga, Coordinator of VA/Hazelwood benefits at UTHealth, for more information.
Degrees and Certificates Offered at the School of Health Professions

The School of Health Professions offers degree and certificate programs that are listed below. Students must be accepted into one of these programs before entering the School of Health Professions. If students desire to change programs, they must withdraw from the School of Health Professions and re-apply. See admission criteria for more information on each program.

Graduate Degrees

- Diagnostic Genetics and Genomics, Emphases in Cytogenetics and Cytogenomics and Molecular Genetics and Genomics
- Radiologic Sciences, Emphases in Administrative Leadership, Educational Leadership and Medical Imaging Informatics

Undergraduate Degrees

Radiologic Sciences Programs

The Radiologic Sciences Programs do not have a common core curriculum. Refer to each program section for specific course listings.

- Diagnostic Imaging, Emphases in Computed Tomography, Computed Tomography with Vascular Interventional, Education, Magnetic Resonance Imaging and Management
- Diagnostic Medical Sonography
- Medical Dosimetry
- Radiation Therapy

Hybrid and Online Programs

Flexible options include part-time, full-time and hybrid on-line enrollment. Contact the respective program faculty for more information on course listings for each programs.

- Cytogenetic Technology: part- or full-time online
- Diagnostic Imaging, Emphases in Education and Management: part- or full-time hybrid
- Health Care DDA: part- or full-time online

Laboratory Sciences Programs

The Laboratory Sciences programs admit students at the Junior- or Senior-level. Students entering at the Junior-level complete a two-year curriculum consisting of the Laboratory Sciences Core courses to build their foundation, and Program Specific Core courses to develop expertise in their program. Students entering at the Senior-level have a one-year curriculum consisting of a Senior Year Program Specific Core.

Complete curricula are listed in each program section.

- Clinical Laboratory Science
- Cytogenetic Technology
- Cytotechnology
- Histotechnology
- Molecular Genetic Technology

Advanced Technical Certificates

Radiologic Sciences Programs

- Mammography

Program Accreditations

CAAHEP

- Cytotechnology

JRCERT

- Diagnostic Imaging Radiography through September 2024
- Diagnostic Imaging MRI through July 2025
- Medical Dosimetry through June 2030
- Radiation Therapy through November 2023

NAACLS

- Clinical Laboratory Science through October 31, 2030
- Cytogenetic Technology through April 30, 2031
- Histotechnology through April 30, 2032
- Molecular Genetic Technology through April 30, 2028
Graduate Degree Programs

M.S. in Diagnostic Genetics and Genomics
M.S. in Radiologic Sciences
Diagnostic Genetics and Genomics

The Graduate Program in Diagnostic Genetics and Genomics (GPDGG) concentrates on the development of technical, analytical and interpretive skills in the following key fields:

- Genetics and genomics of hematological malignancies
- Solid tumor genetics and genomics
- Genomics of infectious diseases, and metagenomics
- The human microbiome
- Pre and Post-natal genetics and genomics
- Human Identity testing
- Bacterial, model organism and human genomics
- Bioinformatics in diagnostic genetics and genomics

Degree Offered

Master of Science in Diagnostic Genetics and Genomics, with Specialization in

- Cytogenetics and Cytogenomics
- Molecular Genetics and Genomics

Program Administration

Program Director  Peter Hu, Ph.D., MLS(ASCP)CM CGCM MBCM, FACSc, FASAHP

Associate Graduate Program Director  Awdhesh Kalia, Ph.D., MB(ASCP)CM, FACSc

Executive Advisor  Rajyalakshmi Luthra, Ph.D.

Program Information

Mission

The University of Texas MD Anderson Cancer Center Graduate Program in Diagnostic Genetics and Genomics, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of academically outstanding graduates prepared to meet the immediate and future needs of diagnostic genetic laboratories, allied health teaching and genomics and biotechnology enterprise.

Objectives

Newer technologies, affordable and faster human, bacterial, viral and metagenome sequencing and superfast computing capabilities have thrust precision medicine into the national spotlight. A major bottleneck in moving precision medicine from bench to patient management is a relative lack of personnel who can deploy cytogenetic or molecular genomic toolkit including bioinformatics to develop new diagnostic methods and generate new insights into disease mechanisms.

Genomic technologies generate an extraordinary volume of data. Bioinformatics is central to the acquisition, storage, analysis and interpretation of data. GPDGG training programs, which include project-based curriculum, diagnostic laboratory rotations, and thesis research collectively enable development of core competencies in human and infectious disease genomics. GPDGG curriculum is geared towards integrating classroom knowledge on the structure and function of chromosomes and genomes with hands-on experience on using sophisticated tools for the analysis and interpretation of genomic data. The program aims to empower our graduates with demonstrable evidence of applying cutting-edge research leading to the development of new diagnostic tests, new patient management protocols or new insights into disease mechanisms. Consequently, GPDGG graduates enjoy a wide range of career options in:

- Biotechnology and genomic companies in R&D and sales
- Diagnostic labs within a hospital setting
- Pharmaceutical industry including R&D (assay development) and sales
- Research, laboratories, including Lab manager and research associate positions
- Teaching institutions: including Instructor/Faculty positions

Selection Process

Admission considers a variety of factors that include

- Cumulative GPA
- Science and Math GPA
- Applicant's prior research experience, personal qualities such as maturity, ethical integrity, ability to handle stressful situations and the applicant's long-term professional goals
- Reference letters
- Written test conducted prior to the interview
- Assessment scores (taken on the date of the interview)
- Ability to meet the School of Health Professions Nonacademic Technical Standards

Race, religion, national origin, veteran status, gender, sexual orientation or disability are not factors considered in the selection process

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Admission to the graduate program is highly competitive. The program accepts an average of approximately 18% of the applicant pool as new students in any given academic year.

Program Admission Requirements

The GPDGG is a full-time two-year program with entry at the post-baccalaureate level and culminating with a Master of Science degree. Application and supporting documents must be submitted in applyUTH.
Applicants to the GPDGG must satisfy the following requirements for admission:

- **Educational requirement** at a minimum is a bachelor’s degree in biological and biomedical sciences with emphasis on molecular biology, genetics, microbiology, cell biology and bioinformatics courses. Applicants with M.S., Ph.D. or M.D. degrees are encouraged to apply.

- **All prerequisite coursework** must be from a regionally accredited college or university. Physical education and military science courses are not acceptable for prerequisite credit.

- **Minimum GPA** of 3.0 on a 4.0 scale is required to be considered for admission. GPA may be evaluated by the following: overall, science and mathematics coursework and last 60 SCH or combinations of all of the above. Special circumstances may be considered, but at the discretion of the Admissions Committee.

- **A minimum of two reference letters** are required from individuals who are in a position to evaluate the applicant’s personal attributes and their academic and laboratory skills.

- **Personal interviews** are conducted on-site or through Zoom. Only out-of-state or international applicants are offered Zoom interviews.

- **Test of English as a Foreign Language**: Applicants from countries where English is not the native language may be required to take the TOEFL. Refer to the TOEFL section of this catalog.

**NOTE:** The Graduate Record Examination (GRE) is **NOT** required for admission.

**Prior Coursework and Experience**

Coursework or prior work experience in the following areas of study is strongly recommended.

- Bioinformatics
- Cell Biology
- Cytogenetics
- Evolution and Biochemistry
- Genetics and Genomics
- Laboratory and/or research experience in cell biology, molecular biology, cytogenetics, genomics or microbiology
- Microbiology/Bacteriology
- Molecular Biology
- Statistics
- Other relevant coursework or work experience

**Graduation**

Each candidate for a master’s degree must complete the following.

- A minimum of 46 SCH of coursework
- Presentation of a poster at a state or national conference and/or publication emanating from research work
- The successful defense of a written research thesis
- At least one-third of the total SCH required must have been earned at the School of Health Professions

Graduation is in August. Upon graduation, students are eligible to take the national certification exam in either molecular biology or cytogenetics administered by the ASCP depending upon the curriculum track for which the student is seeking certification.

**Curriculum**

An integral part of the M.S. curriculum is pursuing laboratory research. Students are required to select and identify their faculty mentors and related research laboratories before the onset of clinical laboratory rotations in the first spring semester. The curriculum includes didactic coursework followed by directed clinical laboratory training at affiliated hospitals and core laboratories. For further details about the curriculum, refer to the Coursework section below or contact the associate program director.

**Accreditation**

Diagnostic molecular sciences programs at the School of Health Professions are accredited and conform their curriculum to the standards published and monitored by NAACLS.

**Affiliations for Clinical Rotation**

In consultation with faculty advisors, students identify their mentors and related research laboratories during the first semester of the program. The curriculum includes didactic coursework followed by directed clinical laboratory training in molecular or cytogenetic diagnostic labs at affiliated institutions listed on the Diagnostic Genetics and Genomics Program page.

**Clinical and Translational Laboratory Research**

The GPDGG aims to make an important contribution to improving health care through applied research. With participating Principal Investigators drawn from several institutions within the Texas Medical Center whose research interests encompass a wide range of research topics, these goals are attainable through collaborative, interdisciplinary and outcome-based clinical research and clinical applications.

**Funding Opportunities**

Working through the financial aid office of UTHealth, prospective students may be funded through a variety of sources including federal, state and departmental funds. These funds come in the forms of loans, grants and scholarships.
**Course Listings**

Students must maintain an overall 3.0 average to graduate.

The semester-by-semester schedules below include all courses needed to graduate, but the sequence and/or course offerings are subject to change.

M.S. in Radiologic Sciences

The Graduate Program in Radiologic Sciences offers two pathways, with options to specialize in administrative or educational leadership. The program provides medical imaging, radiation therapy, and medical dosimetry professionals with the knowledge and skills essential for career advancement within health care and higher education.

Using a specialized program of study, learners develop innovative and dynamic leadership skills that they can demonstrate in any administrative or educational position. The interdisciplinary perspective and cross-functional design of the program prepare learners to be successful in handling multifaceted challenges amid increased expectations and constrained resources in health care or higher education.

Degree Offered
Master of Science in Radiologic Sciences, with Emphases in
• Administrative Leadership
• Educational Leadership
• Medical Imaging Informatics

Program Administration
Program Director of Advanced Imaging Modalities  William Undie, Ed.D., R.T.(R)(T)
Associate Graduate Program Director  Kevin Clark, Ed.D., R.T.(R)(QM)
Executive Advisor  Aziz Benamar, M.B.A., R.T.(R)

Program Information

Mission
The Master of Science program in Radiologic Sciences, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of technologically and academically outstanding graduates prepared to meet the immediate and future needs of diagnostic and therapeutic services in radiologic sciences.

Objectives
The emerging health care environment has created pressures that have heightened the need for innovative and dynamic leadership. There is an urgent need for individuals who embody effective and compassionate care in a cost-efficient and integrated health care system. Further, there is a shortage of qualified educators to fill many job positions in the radiologic sciences profession; the situation is expected to escalate in the next decade as vacancy rates increase due to attrition, retirement, industry growth and limited numbers of academic programs. Thus, this leadership program is intended to enhance your knowledge, expand your critical thinking skills and strategically position you for a leadership position in health care and academic environment.

Program Admission Requirements
Applicants to the Radiologic Sciences program must satisfy the following requirements for admission:
• Bachelor’s degree from an accredited institution
• Credentialed by American Registry of Diagnostic Medical Sonography (ARDMS), American Registry of Radiologic Technologists (ARRT), Medical Dosimetrist Certification Board (MDCB) or Nuclear Medicine Technology Certification Board (NMTCB).
• Official college transcript(s) from each school attended.
• Minimum overall undergraduate GPA of 3.0 on a 4.0 scale.
• Undergraduate course in either math statistics or basic research with a minimum grade of C
• A 500-word statement of purpose outlining your goals for pursuing a graduate degree in Radiologic Sciences. Must include the following elements:
  o The reason for applying to the Administrative or Educational emphasis
  o Describe how this degree program will contribute to advancing your career goals
  o Explain what you have accomplished that demonstrates your initiative and willingness to learn
  o Describe how you will contribute to the program through your research experience
  o Describe your experiences working in teams

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Goals
The goals of the program are to enhance your ability to:
• Synthesize the knowledge gained from radiologic sciences and other academic disciplines to advance strategic planning and operations in health care or higher education.
• Promote the delivery of quality health care by assuming leadership roles in the radiologic sciences professions and health care system.
• Apply the knowledge acquired from independent, collaborative and interdisciplinary empirical research efforts to improve health care services or higher education.

Educational emphasises
• Program director or educational coordinator for radiologic sciences programs

School of Health Professions Academic Catalog 2023-2024

Radiologic Sciences 33
State other relevant attributes or background you think will assist the admission committee evaluate your application

- **The School of Health Professions recommendation form** completed by three professional references to support the applicant’s leadership ability or potential for success
- **Resume** to include education, work history and research experience
- **Test of English as a Foreign Language**: Applicants from countries where English is not the native language may be required to take the TOEFL. Refer to the TOEFL section of this catalog.
- **Competitive applicants** will be invited to an admissions interview

**Graduation**

Each candidate for a master’s degree must complete the following.

- 30 SCH of graduate coursework
- A minimum of 45 hours of supervised internship in an area of health care administration or educational leadership
- Successful presentation and defense of a thesis based on research of a topic related to area of specialization
- At least one-third of the total SCH required must have been earned at the School of Health Professions

Graduation is in August.

**Curriculum**

The Master of Science degree in Radiologic Sciences is a 5-semester program built on a cohort learning model. The cohort consists of applicants with various background in the radiologic sciences profession. The program consists of 12 SCH of programmatic core and 18 SCH of specialization classes, including internship and thesis. The first two semesters are focused on completing the programmatic core component while students devote the remaining three semesters to their program specialty and thesis project.

**Accreditation**

MD Anderson is regionally accredited through SACSCOC.

**Funding Opportunities**

Working through the financial aid office of UTHealth, prospective students may be funded through a variety of sources including federal, state and departmental funds. These funds come in the forms of loans, grants and scholarships.

Undergraduate Degree Programs

B.S. in Clinical Laboratory Science
B.S. in Cytogenetic Technology
B.S. in Cytotechnology
B.S. in Diagnostic Imaging
B.S. in Diagnostic Medical Sonography
B.S. in Health Care Disparities, Diversity and Advocacy
B.S. in Histotechnology
B.S. in Medical Dosimetry
B.S. in Molecular Genetic Technology
B.S. in Radiation Therapy
B.S. in Clinical Laboratory Science

The clinical laboratory scientist is an essential member of the health care team, performing a myriad of laboratory procedures aimed at the diagnosis and treatment of disease.

Degree Offered
Bachelor of Science in Clinical Laboratory Science

Program Administration
Program Director  Brandy Greenhill, Dr.P.H., MLS(ASCP)CM
Executive Advisor  Jeffrey Tarrand, M.D.

Program Information

Mission
The MD Anderson Cancer Center Program in Clinical Laboratory Science, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of technically and academically competent graduates prepared to meet the immediate and future needs of the Clinical Laboratory Science profession.

Goals
The faculty of the Program in Clinical Laboratory Science is committed to:

- Providing the didactic and clinical instruction that offers the graduate the opportunity to prepare to:
  - Perform procedures in all areas of the clinical laboratory
  - Integrate and correlate laboratory data
  - Solve problems relating to the production of laboratory results
- Maintaining an effective program of student development and learning
- Leading the student in developing an understanding and appreciation for a total quality management program, the skills necessary to establish quality control measures, and to making appropriate decisions to maintain accuracy and precision
- Meeting the future needs of the Clinical Laboratory Science profession by including:
  - State-of-the-art procedures and instrumentation
  - Courses that offer career alternatives
  - Opportunities to participate in research and development of molecular techniques
- Developing the framework for the graduate to maintain and grow in professional competence throughout his lifetime by promoting participation in continuing education activities of the laboratory, MD Anderson and the community
- Communicating the necessity of obeying a professional code of conduct toward patients, visitors and all health care professionals and of demonstrating the highest regard for human dignity and life

Objectives
- The Program in Clinical Laboratory Science is designed to prepare students to perform clinical laboratory analysis, make appropriate decisions and solve problems to become successful entry-level clinical laboratory scientists.
  - The program provides instruction and training in all the major areas of the clinical laboratory through both didactic and clinical training. Most students enter the program to pursue a Bachelor of Science degree.
  - The clinical laboratory scientist is an essential member of the health care team, performing a myriad of laboratory procedures aimed at the diagnosis and treatment of disease.
  - The technical procedures and complex instruments used in modern laboratory medicine require well-educated and technically proficient scientists. Clinical laboratory scientists are problem solvers, technologists who use their knowledge and technical skills to operate and repair laboratory instruments, monitor quality control programs, produce high-quality patient test results and correlate test results with disease processes.
  - The primary goal of the Clinical Laboratory Science program is to provide the community with competent, entry-level clinical laboratory scientists (medical laboratory scientists) who are prepared to meet the qualifications for certification in their profession.
  - While many scientists choose to work in hospital laboratories, others opt to develop new testing procedures in diagnostic and research laboratories. Scientists with leadership ability and administrative skills manage the laboratory operations. Those interested in computer technology use their laboratory knowledge and skills in the management of laboratory information systems. Others provide educational programs to prepare the scientists for the future. There are even opportunities for scientists to serve as self-employed consultants.

Program Competencies
The Clinical Laboratory Science curriculum offers the student the opportunity to obtain the following competencies:

- Accurate application of mathematic principles in the clinical laboratory science domain of practice
- Appropriate interpersonal and public speaking skills in the clinical and academic setting
- Appropriate oral and written communication in the clinical and academic setting
- Appropriate computer skills in the clinical and academic setting
- Synthesis of information from primary and secondary sources using recognized research techniques
- Critical reading and writing strategies to evaluate, interpret and analyze non-fiction, academic and professional readings
The Program in Clinical Laboratory Science is a highly intensive course of study composed of didactic and clinical training. Didactic courses are presented in clinical hematology and hemostasis, clinical chemistry, clinical microscopy, microbiology, immunohematology, immunology, molecular diagnostics, human tissue typing and management.

The course of study will offer the student the opportunity to obtain the necessary:

- Fundamental knowledge to enter the profession as a capable medical laboratory scientist

**Prerequisites**

Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

**Texas Core Curriculum**

Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

**Program Admission Requirements**

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree enter at the Junior level. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

**Enrollment Process**

Once accepted into Clinical Laboratory Science, enrollment is dependent on factors that include the following:

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

**Nonacademic Requirements**

Refer to the Nonacademic Technical Standards section of this catalog.

For the Two-Year Program

Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses.

- 8 SCH in Anatomy and Physiology I & II, or Biology I & II
- 4 SCH in General Chemistry I with lab
- 4 SCH in General Chemistry II with lab
- 4 SCH in Organic Chemistry I with lab
- 4 SCH in Organic Chemistry II with lab, or Biochemistry

Refer to the prerequisite sheet (pdf) for details.

**Advanced Placement**

The School of Health Professions may accept and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from School of Health Professions' academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty is consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to School of Health Professions courses with the results being reported to the Registrar.

**Graduation**

Each candidate for graduation with a baccalaureate degree in Clinical Laboratory Science must have completed a minimum of 129 SCH of coursework. Within this requirement, the students must have completed the following:

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must have been earned at the School of Health Professions

Graduation is in August. Upon graduation, students are eligible to take the national certification exam administered by the ASCP. This exam is given throughout the year. Check with the program director for application deadlines.

Upon passing the certification examination, the student is considered a certified Medical Laboratory Scientist. The awarding of the degree is not contingent upon a student passing a national certification examination.

**Curriculum**

The Program in Clinical Laboratory Science is a highly intensive course of study composed of didactic and clinical training. Didactic courses are presented in clinical hematology and hemostasis, clinical chemistry, clinical microscopy, microbiology, immunohematology, immunology, molecular diagnostics, human tissue typing and management.

The course of study will offer the student the opportunity to obtain the necessary:

- Fundamental knowledge to enter the profession as a capable medical laboratory scientist

---

*Clinical Laboratory Science*
• Highly specialized skills that will broaden career opportunities

During the clinical phase of instruction, training and supervision are provided at leading clinical laboratories at sister medical institutions within the Texas Medical Center and beyond, in order that students may develop expertise in a variety of settings and experience the breadth of opportunity available to Clinical Laboratory Scientists.

**Accreditation**

The MD Anderson Program of Clinical Laboratory Science is accredited by and has confirmed its curriculum to the standards published and monitored by NAACLS.

**Current Affiliations**

During the clinical phase of instruction, training and supervision are provided in affiliated clinical laboratories. Visit the Clinical Laboratory Science Program page for a list of current affiliations.

B.S. in Cytogenetic Technology

Cytogenetic technologists study the structure of human chromosomes and the role of specific changes in the diagnosis and monitoring of acquired and inherited abnormalities.

Degree Offered
Bachelor of Science Degree in Cytogenetic Technology

Program Administration

Program Director  Jun Gu, M.D., Ph.D., CG(ASCP)CM
Associate Program Director  Ming Zhao, M.D., CG(ASCP)CM, MB(ASCP)CM
Executive Advisor  Guolin Tang, M.D., Ph.D., FACMG

Program Information

Mission
The MD Anderson Cancer Center Program in Cytogenetic Technology, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of technically and academically competent graduates prepared to meet the immediate and future needs of the Cytogenetic Technology profession.

Objectives
- The Cytogenetic Technology program is designed to prepare students to become entry-level clinical cytogenetic technologists. The program provides instruction in all the major areas of clinical cytogenetics including:
  - Cancer cytogenetics
  - Molecular techniques
  - Prenatal cytogenetics
  - The role of specific changes in the diagnosis and monitoring of acquired and inherited abnormalities
  - The structure of human chromosomes
- Abnormalities of chromosome number and morphology are linked with over 400 syndromes associated with mental retardation and other phenotypic abnormalities. Identification of these chromosomal abnormalities by cytogenetic technologists provides clinicians in prenatal/postnatal clinics with sufficient information to plan for medical complications that may arise from specific gene defects.
- Cancer cytogenetics is a rapidly growing field where the cytogeneticist plays a key role in the diagnosis, prognosis and treatment of both hematological malignancies and solid tumors. World Health Organization (WHO) guidelines require either cytogenetics or molecular genetics for standard workup of leukemias and lymphomas.
- Cytogenetic technologists are leaders in the development of applications for new DNA technologies that are transforming modern-day medicine.
- Cytogenetic technologists have a wide range of career options in cancer centers, pediatric and genetic counseling clinics, chemical industries, biotechnology companies, research laboratories, molecular cytogenetic laboratories, computer imaging sales and development, pathology labs and research and teaching institutions.

Program Admission Requirements

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. The full- or part-time Bachelor of Science degree is either a one-year (face-to-face or online) or two-year program (face-to-face) with entry at either the junior or senior level. Students selecting part-time enrollment will complete their degree beyond the designated length of time, depending on course selections each semester. Qualified students are accepted on a rolling basis. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

A minimum GPA of 2.5 on a 4.0 scale overall and in science and mathematics courses is required to be considered for admission. Special circumstances may be considered at the discretion of the Admissions Committee.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process

Once accepted into Cytogenetic Technology, enrollment is dependent on factors that include the following.

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites

Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum

Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at
any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

**For the Two-Year Program**
Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses.
- 8 SCH in Biological Sciences
- 16 SCH in Chemistry
Refer to the prerequisite sheet (pdf) for details.

**For the One-Year Program (face-to-face and online)**
Students must complete a minimum of 90 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses.
- 16 SCH in Chemistry
- 3 SCH in Microbiology
- 3 SCH in Genetics
- Additional 8 SCH in Biological Sciences
- 11 SCH of upper-level courses

NOTE: International students are NOT eligible for the online option due to U.S. Immigration and Customs Enforcement regulations.

Refer to the prerequisite sheet (pdf) for details.

**Advanced Placement**
The School of Health Professions accepts and/or awards credit through the following examination programs*.
- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to School of Health Professions courses with the results being reported to the Registrar.

**Graduation**
Each candidate for a baccalaureate degree must complete a minimum of 136 SCH of coursework if admitted into the two-year program or a minimum of 139 SCH of coursework if admitted into the one-year program. Within this requirement, students must complete the following at MD Anderson:
- At least 40 SCH of upper-level coursework
- At least 25% of the total required SCH

Graduation is in August. Upon graduation, students are eligible to take the Clinical Cytogenetics Board of Certification exam administered by the ASCP. Check with the program director for application deadlines and exam dates. Upon passing this exam, the student is considered a certified cytogenetic technologist. The awarding of the degree or certificate is not contingent upon a student passing the national certification exam.

**Curriculum**
This intensive program is composed of a didactic phase followed by directed clinical training at affiliated hospitals and laboratories. During the didactic phase, formal lectures are presented on the principles of medical genetics, molecular and biochemical basis of genetic disease, karyotyping, hematology, clinical cytogenetics and molecular genetic technology. Laboratory sessions coordinated with lectures and covering the fundamentals of diagnostic laboratory procedures are included in the didactic phase. Online students are required to attend one week of on-campus laboratory sessions each semester. Graduates of the program are eligible to take the CG(ASCP) Board of Certification exam

**Accreditation**
The Cytogenetic Technology Program is accredited and has conformed its curriculum to the standards published and monitored by NAACLS.

**Current Affiliations**
The Program in Cytogenetic Technology has developed clinical affiliations with leading clinical cytogenetic laboratories in Texas and beyond in order that students may develop expertise in a variety of settings and experience the breadth of opportunity available to Cytogenetic Technologists. Clinical experiences in these laboratories offer students the opportunity to achieve competence and confidence in performing a wide variety of cytogenetic procedures on patients’ specimens. Visit the Cytogenetic Technology Program page for a list of current affiliations.

B.S. in Cytotechnology

A career as a cytotechnologist is both challenging and rewarding. Students are offered training in all major aspects relevant to the practice of cytotechnology as a profession.

Degree Offered
Bachelor of Science in Cytotechnology

Program Administration

Program Director  Catherine Bammert, Ph.D. CT, MB(ASCP)CM
Executive Advisor  Wendong Yu, M.D., Ph.D.

Program Information

Mission
The MD Anderson Cancer Center Program in Cytotechnology, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of technically and academically competent graduates prepared to meet the immediate and future needs of the Cytotechnology profession.

Objectives
The Cytotechnology program is designed to prepare students to become entry-level cytotechnologists.

Working with a microscope, cytotechnologists study specimens from all body sites. Using subtle clues present within the cells, they can detect cancer cells, precancerous lesions, benign tumors, infectious agents and inflammatory processes.

The study consists of:
- Lectures
- Demonstrations at the multi-headed microscope in a tutored setting
- Independent student microscope time with faculty feedback
- Rotations through various cytology laboratories providing experience in routine and specialized procedures

Program Admission Requirements
Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science enter in either Junior (two-year track) or Senior level (one-year track). Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following:
- A minimum GPA of 2.5 on a 4.0 scale both overall and in the biology and chemistry courses is required to be considered for admission.
- Candidates who completed the prerequisite courses seven or more years before their application may need to update their academic skills in biology, with two courses in Anatomy and/or Physiology, (3 SCH each) with a minimum GPA of 2.5. This requirement may be waived at the discretion of the program director.
- Completion of a questionnaire Parts I, II and III.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process
Once accepted into Cytotechnology, enrollment is dependent on factors that include the following.
- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

For the Two-Year Program
Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:
- 4 SCH in General Chemistry I, or higher-level Chemistry
- 4 SCH in General Chemistry II, or higher-level Chemistry
- 4 SCH in Anatomy and Physiology I
- Additional 4 SCH in Biological Sciences

Refer to the prerequisite sheet (pdf) for details.

For the One-Year Program
Students must complete a minimum of 90 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:
- 4 SCH in General Chemistry I, or higher-level Chemistry
- 4 SCH in General Chemistry II, or higher-level Chemistry
- 4 SCH in Anatomy and Physiology I
- Additional 16 SCH in Biological Sciences
- 18 SCH of upper-level courses

Refer to the prerequisite sheet (pdf) for details.

**Advanced Placement**
The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

**Graduation**
Each candidate for a baccalaureate degree must complete a minimum of 136 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must be taken at MD Anderson

Graduation is in August. Upon graduation, students are eligible to take the national certification exam in cytotechnology administered by the ASCP.

Check with the program director for application deadlines and exam dates. Upon passing the exam, the student is considered a certified cytotechnologist. The awarding of the degree is not contingent upon a student passing the national certification exam.

**Curriculum**
This intensive program is composed of a didactic and laboratory phase followed by directed clinical training at affiliated hospitals and cytology laboratories. The primary goal of the Cytotechnology program is to provide the community with cytotechnologists who are prepared to work at the staff level in hospital and private laboratories and university medical centers. With experience, cytotechnologists can perform at the supervisory, educational and administrative levels. The job responsibilities of cytotechnologists are expanding, and research opportunities are increasing with the advancement of new tumor identification techniques and Human Papilloma Virus testing.

**Accreditation**
The program is accredited by and has conform its curriculum to the standards and guidelines published and monitored by the CAAHEP.

**Current Affiliations**
The Program in Cytotechnology has developed affiliations with reference labs and sister medical institutions within the Texas Medical Center and beyond, so that students will develop expertise in a variety of settings and experience the breadth of opportunity available to a certified cytotechnologist. Visit the Cytotechnology Program page for a list of current affiliations.

Diagnostic Imaging is a specialty devoted to the study of routine and advanced imaging procedures. The curriculum includes emerging, advanced technologies in Computed Tomography (CT), CT with Vascular Interventional (CT/VI) and Magnetic Resonance Imaging (MRI). The program prepares the student for various careers in hospitals, clinics, education and management.

Certificate Offered
Certificate in Radiologic Sciences
Note: Upon completion of the DI program radiography curriculum, students must sit for the examination and certification from the ARRT. To qualify to sit for the ARRT exam, the student must have completed an AA degree or higher prior to the 4th semester of the DI Program.

Degree Offered
Bachelor of Science in Diagnostic Imaging, with Emphases in
- Computed Tomography (CT)
- Computed Tomography/Vascular Interventional (CT/VI)
- Education
- Magnetic Resonance Imaging (MRI)
- Management

Program Administration
Program Director of Advanced Imaging Modalities  William Undie, Ed.D., R.T.(R)(T)
Program Director of Education, Management and Radiography  Suzieann Bass, Ed.D., R.T.(R)
Associate Program Director of CT, CT/VI and M  Claudia Tamara, D.D.S., R.T.(CT)(N)(ARRT), CNMT,
Associate Program Director of MRI  Saleha Zafar, M.S., R.T.(R)(MR)
Executive Advisor  Aurelio Matamoros, M.D.

Program Information
Mission
The mission of the Diagnostic Imaging Program is to provide the highest quality of education to diagnostic imaging students through formal didactic and state-of-the-art clinical experiences that prepare our students to be diagnostic imaging professionals who are patient care focused, critical thinkers and engaged in lifelong learning.

Vision
We shall be the premier educational program in Diagnostic Imaging by providing innovative curricular, clinical and continuing education services to the diagnostic imaging community and the patients we serve.

Goals
Fulfillment of the program’s mission is assessed by the program’s effectiveness and the degree to which the program achieves the goals and learning outcomes that will enable our students to succeed academically and professionally.

Objectives
- Develop a patient care focus by providing superior patient care.
- Demonstrate critical thinking skills.
- Adopt a philosophy of life-long learning through continuing education and professional involvement.
- Embrace the MD Anderson core values of caring, integrity and discovery.
- Communicate effectively in a variety of settings.

Emphasis in Magnetic Resonance Imaging
Mission
The mission of the Diagnostic Imaging Program MRI Emphasis is to provide the highest quality education to MRI students through formal didactic and state-of-the-art clinical experiences that prepare our students to be MRI professionals who are patient care focused, critical thinkers and engaged in lifelong learning.

Vision
We shall be the premier educational program in MRI by providing innovative curricular, clinical and continuing
education services to the diagnostic imaging community and the patients we serve.

Goals
Fulfillment of the program’s mission is assessed by the program’s effectiveness and the degree to which the program achieves the goals and learning outcomes that will enable our students to succeed academically and professionally:

- Students will develop patient care focus by providing superior patient care.
- Students will demonstrate critical thinking skills in the clinical environment.
- Students will adopt a philosophy of life-long learning through continuing education and professional development.
- Students will embrace the MD Anderson core values of caring, integrity and discovery.
- Students will communicate effectively in a variety of settings.

Program Admission Requirements
Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Certificate of Radiography enter at the Sophomore level (for five semesters over 20 months). Students pursuing a Bachelor of Science degree enter either at the Sophomore level (three-year track) or Senior level (one-year track). Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

- A minimum overall GPA of 2.5 on a 4.0 scale. Cumulative and prerequisite GPA are factors for admissions.
- Clinical site visit (Certificate Applicants only) 8 hours clinical site observation at MD Anderson and a clinical site visit evaluation.
- CPR certification through the American Heart Association certification.
- Attend one information session during the year of the application process.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process
Once accepted into Diagnostic Imaging, enrollment is dependent on factors that include the following.

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

For the Certificate in Radiography Program
Students must complete a minimum of 30 SCH of the Texas Core Curriculum*. Within these 30 SCH, Anatomy and Physiology I (4 SCH) must be included.

* Full completion of the 42 SCH of the Texas Core Curriculum is recommended.

For the Three-Year Bachelor’s Program: Two-Year Certificate in Radiologic Sciences* + Senior Year
Students must complete a minimum of 42 SCH which includes the Texas Core Curriculum (42 SCH) and Anatomy and Physiology I (4 SCH).

View the prerequisite sheet (pdf) for details.

* Students entering the program with an associate’s degree are eligible to sit for the ARRT(R) certification after completing the first two years of the program.

For the One-Year Bachelor’s Program
All students must complete a minimum of 54 SCH that includes the Texas Core Curriculum (42 SCH) and an additional 12 SCH. Within these 54 SCH, Anatomy and Physiology I (4 SCH) must be included*.

* Students with a minimum of 30 SCH may apply for the Education or Management part-time option.

Students must be certified by

- the ARDMS, ARRT or the NMTCB if applying to the Education, Management or MRI emphases.
- the ARRT in radiography (R), radiation therapy (T) or nuclear medicine (N), or the NMTCB if applying to the CT emphasis
- the ARRT(R) if applying to the CT with VI emphasis.

Advanced Placement
The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

* The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that
cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

**Graduation**

Each candidate for a baccalaureate degree must complete a minimum of 125 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must be taken at MD Anderson

Upon completion of the curriculum, students will have demonstrated the professional skills necessary to work with ionizing radiation, radiopharmaceuticals, sound waves and or magnetic fields to produce medical images in diagnostic imaging or radiology departments of hospitals, and medical clinics or freestanding imaging centers.

Graduation is in August. Upon graduation, students are eligible to take the national certification credentialing examination(s) administered by the ARRT in their chosen emphasis(es).

Check with the program director for application deadlines. Upon passing the certification exam(s), the graduate is considered a Registered Technologist (RT). The awarding of the degree is not contingent upon a student passing the national certification exam.

**Curriculum**

The curriculum meets or exceeds the curriculum recommendations of the American Society of Radiologic Technologists (ASRT). This intensive three-year program is composed of a didactic phase followed by directed clinical training at affiliated hospitals and laboratories.

**Accreditation**

The Diagnostic Imaging Program is accredited by and has conformed its curriculum to the standards and guidelines published and monitored by the JRCERT.

**Current Affiliations**

During the clinical phase of instruction, training and supervision are provided in a variety of clinical sites. Visit the Diagnostic Imaging Program page for a list of current affiliations.
Course Listings
The semester-by-semester schedules below include all courses needed to graduate, but the sequence and/or course offerings are subject to change.

Three-Year Radiography Program 83-89 SCH
All students admitted to the Three-Year Program take the same core Radiography courses the first two years (sophomore and junior years) and choose their emphasis for the third year (senior year).

B.S. in Diagnostic Medical Sonography

Diagnostic Medical Sonography is a non-invasive imaging modality that uses high frequency sound waves to produce a dynamic visual image of the internal organs or tissues in the body including abdominal organs, a developing fetus, male or female reproductive organs and blood flow.

Degree Offered
Bachelor of Science in Diagnostic Medical Sonography

Program Administration

Program Director  
Hady Abdin, M.D., RDMS, RVT, RDMS, RPVI

Executive Advisor  
Aurelio Matamoros, M.D.

Program Information

Mission
The mission of the Diagnostic Medical Sonography Program is to provide the highest quality of education to diagnostic imaging students through formal didactic and state-of-the-art clinical experiences that prepare students to be diagnostic medical sonographers who are focused on patient care, are critical thinkers and are engaged in lifelong learning.

Vision
We shall be the premier educational program in Diagnostic Medical Sonography by providing innovative curricular, clinical and continuing education services to the diagnostic imaging community and the patients we serve.

Goals
Fulfillment of the program’s mission is assessed by the program’s effectiveness and the degree to which the program achieves the goals in which our students will academically and professionally:

- Graduates will develop a patient care focus by providing superior patient care.
- Graduates will adopt a philosophy of lifelong learning through continuing education and professional involvement.
- Graduates will embrace MD Anderson values of caring, integrity and discovery.
- Graduates will be able to communicate effectively in a variety of settings.
- Prepare graduates to successfully challenge the ARDMS boards through didactic education and clinical experience.
- Prepare students to be successful in meeting the challenges of being a Sonographer.
- Provide a high-quality education experience for all students.
- Provide tutoring and online tutoring to all students to help ensure their success in the program.
- Provide students with awareness for the significance of continuing education and instill in them the desire to continue their education after graduation.
- Graduate Sonographers to practice Sonography within an ethical and legal framework consistent with the ARDMS and the Society of Diagnostic Medical Sonography (SDMS) standards.
- Graduate Sonographers to use critical thinking to analyze clinical data and current literature as a basis for decision making in Sonography.
- To prepare competent entry level Sonographers in the cognitive (knowledge), psychomotor (skills) and affective (behavior) learning domains.

Program Admission Requirements

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree enter at the Junior level. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

- A minimum GPA of 2.5 on a 4.0 scale both overall and in science and mathematics courses is required to be considered for admission. Cumulative and prerequisite GPA are factors for admissions. Special circumstances may be considered, but at the discretion of the Admissions Committee.
- Attend one information session during the year of the application process.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process

Once accepted into Diagnostic Medical Sonography, enrollment is dependent on factors that include the following.

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.
**Texas Core Curriculum**
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

**For the Two-Year Program**
Students must complete a minimum of 42 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses.

- 4 SCH College Physics with laboratory.
- 4 SCH in Anatomy and Physiology I
- 4 SCH in Anatomy and Physiology II

View the prerequisite sheet (pdf) for details.

*Note: Students are recommended to complete an associate’s or bachelor’s degree from a regionally accredited institution, but a degree is not required.*

**Advanced Placement**
The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

**Graduation**
Each candidate for a baccalaureate degree must complete a minimum of 120 SCH of coursework. Within this requirement, students must complete at least 40 SCH of upper-level coursework at MD Anderson.

Graduation is in August. Upon graduation, participants will be eligible to take the national registry examination administered by the ARDMS under category 3B. The awarding of the degree is not contingent upon a student passing the national certification exam.

**Curriculum**
Upon completion of the curriculum, students will have demonstrated the professional skills necessary to work sound waves to produce medical images in diagnostic imaging or radiology departments of hospitals and medical clinics or free-standing imaging centers.

**Accreditation Information**
MD Anderson is regionally accredited through SACSCOC. The educational standards of this program are based on the Diagnostic Medical Sonography National Educational Curriculum.

**Current Affiliations**
Students rotate through multiple clinical sites at The Texas Medical Center. The diversity of examination procedures at the respective facilities offers the students broad skills, as well as opportunities for future employment upon graduation. Visit the Diagnostic Medical Sonography Program page for a list of current rotations.

B.S. in Health Care Disparities, Diversity and Advocacy

The Health Care Disparities, Diversity and Advocacy (DDA) program provides specific knowledge and skills related to global health care disparities, diversity and advocacy in health care and in patient experience. This degree presents unique opportunities to learn about disparities, diversity and advocacy in a non-traditional, full- or part-time online format.

Graduates will gain knowledge and experience for employment in health care disparities, diversity or patient experience advocacy roles.

Degree Offered

Bachelor of Science in Health Care Disparities, Diversity and Advocacy

Program Administration

Program Director  Susan K. Lee, Ph.D., R.N., CNE, CPXP, FAAN

Program Advisors
  Jay Bezerra (Advocacy)
  Alba Calzada (Disparities)
  Ranna Parekh (Diversity)

Executive Advisor  Shibu Varghese, M.A.

Program Information

Mission

The mission of the Health Care DDA program is to provide the highest quality of education to students through online didactic and preceptorship experiences in the practice of health care disparities, diversity and patient advocacy.

Vision

The Health Care DDA program shall be the premier provider of education in health care disparities, diversity and patient experience advocacy based on best practices and research in these areas of healthcare.

Objectives

• Health Care DDA students will concentrate on health disparities. The student will
  o Demonstrate awareness of factors contributing to disparities in health care among marginalized populations.
  o Identify resources available for reducing health disparities.
  o Demonstrate health care professionals’ role in eliminating health disparities.
• Health Care DDA students will be culturally competent with diverse populations. The student will
  o Demonstrate cultural sensitivity.
  o Analyze barriers to the delivery of health care in diverse populations.
  o Apply solutions to selected concerns in diverse populations studied.
• Health Care DDA students will be patient advocates. The student will
  o Demonstrate communication techniques in difficult health care situations.
  o Evaluate risks in health care institution-patient experience.
  o Identify federal, state and local regulations related to patient advocacy.

Program Admission Requirements

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree enter at the Junior level. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

  A minimum GPA of 2.5 on a 4.0 scale both overall and in science courses is required to be considered for admission. Cumulative and prerequisite GPA are factors for admissions.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process

Once accepted into Health Care DDA, enrollment is dependent on factors that include the following.

• Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
• Ability to meet the School of Health Professions Nonacademic Technical Standards.
• Proof of current health immunizations.
• Satisfactory completion of a drug screen and background check.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites

Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum

Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at

School of Health Professions Academic Catalog 2023-2024
any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

**For the Online Program**

Students must complete a minimum of 72 SCH that includes the Texas Core Curriculum (42 SCH) and an additional 30 SCH. To fulfill these 30 SCH, applicants have the following options.

1. Transfer 30 SCH of elective courses from regionally accredited colleges and universities. Remedial-level courses will not be accepted.

2. Receive a maximum of 30 SCH, at the discretion of the School of Health Professions Curriculum Committee, for holding a national certification in a health care discipline, e.g. Medical Laboratory Technician, Surgical Technologist, Dental Hygienist.

3. Complete the required 30 SCH of elective courses at the School of Health Professions. Course offerings vary by semester.

Applicants who hold nationally recognized certification in a health profession and are graduates of an accredited program may be awarded a maximum of 30 SCH as elective coursework. SCH given will be evaluated and determined using set criteria developed by the program’s admissions committee.

An applicant who has earned a baccalaureate degree from a regionally accredited college or university may be awarded a second degree by meeting the following requirements:

- Accepted to the School of Health Professions
- Fulfilled all General Education Core curriculum requirements
- Completed a minimum of 48 SCH of the required curriculum
- Provided supporting documents to the Office of the Registrar

**Advanced Placement**

The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

**Graduation**

Each candidate for a baccalaureate degree must complete a minimum of 120 SCH of coursework. Within this requirement, students must complete the following at MD Anderson.

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must be taken at MD Anderson

Graduation is in August.

**Curriculum**

Upon completion of the curriculum, students will have demonstrated the professional skills necessary to function in health care disparities, diversity and advocacy.

**Accreditation**

MD Anderson is regionally accredited through SACSCOC.

B.S. in Histotechnology

Histotechnology is the specialty that plays a fundamental role in detecting abnormalities of tissue cells. The application of theoretical and applied knowledge of biologic and chemical sciences is utilized to prepare tissue specimens for microscopic examination. This is an important part of the intricate process of scientific investigation used in establishing and confirming patient diagnosis and research.

Degree Offered
Bachelor of Science in Histotechnology

Program Administration

Program Director  Mark A. Bailey, M.A., HTL(ASCP)CM
Associate Program Director  Toysha Mayer, D.H.Sc., HT(ASCP)
Executive Advisor  Victor Prieto, M.D., Ph.D.

Program Information

Mission
The mission of the School of Health Professions Program in Histotechnology, in concert with the mission and vision of the University of Texas MD Anderson Cancer center, is to develop and maintain a quality program in which our graduates are academically and technically competent to enter the workforce as entry-level histotechnologists. Therefore, our students and graduates will promote best practices and ethical standards associated with the Histotechnology discipline.

Objectives

The primary objective of the Histotechnology program is to offer entry-level routine histotechnology courses to the program’s students as well as an introduction to advanced laboratory techniques such as:

- Digital Microscope Imaging
- Immunohistochemistry
- Laboratory Management
- Tissue Biopsy Grossing
- Tissue Biorepository

Our graduates are prepared to work in a variety of settings such as hospitals, medical schools, veterinary medicine, research, private independent laboratories, industry and local, state and federal agencies in both urban and rural settings.

Program Admission Requirements

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree enter either at the Junior level (two-year track) or Senior level (one year and professional tracks). Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section.

- Applicants to the program must have completed all core curriculum courses required by the TEC and all biology and chemistry courses required by the Board of Certification of ASCP.
- A minimum GPA of 2.5 on a 4.0 scale both overall and in science courses is required to be considered for admission. Cumulative, science and math GPA are factors for admissions. Special circumstances may be considered, but at the discretion of the Admissions Committee.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process

Once accepted into Histotechnology, enrollment is dependent on factors that include the following.

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites

Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum

Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

For the Two-Year Program

Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 4 SCH in Biology I
- 4 SCH in Biology II
- 4 SCH in General Chemistry I
- Additional 8 SCH in Biology and/or Chemistry

Refer to the prerequisite sheet (pdf) for details.
For the One-Year Program

Students must complete a minimum of 90 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 4 SCH in Biology I
- 4 SCH in Biology II
- 4 SCH in General Chemistry I
- Additional 18 SCH in Biology and/or Chemistry
- 18 SCH of upper-level courses

Refer to the prerequisite sheet (pdf) for details.

For the One-Year Professional Program

Students must complete a minimum of 90 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 4 SCH in Biology I
- 4 SCH in Biology II
- 4 SCH in General Chemistry I
- Additional 18 SCH in Biology and/or Chemistry
- 18 SCH of upper-level courses

In addition, students must meet the following additional requirements.

- Certified with ASCP(HT)
- Minimum of one year working experience in a Histotechnology Service Laboratory
- Currently working in a Histotechnology Service Laboratory that will serve as the clinical affiliate site

Refer to the prerequisite sheet (pdf) for details.

Advanced Placement

The School of Health Professions accepts and/or awards credit through the following examination programs*

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

Graduation

Each candidate for a baccalaureate degree must complete a minimum of 121 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must be taken at MD Anderson

Graduation is in August. Upon graduation, students are eligible to take the national certification exam in histotechnology administered by the ASCP Board of Certification. Check with the program director for application deadlines and exam dates. Upon passing either exam, the student is considered a certified histotechnologist. The awarding of the degree is not contingent upon a student passing the national certification exam.

Curriculum

The comprehensive two-year program is composed of a didactic phase followed by directed clinical internships at affiliated hospitals and laboratories. During the didactic phase, formal lectures, demonstrations and rotations through clinical laboratories provide experience in routine and specialized procedures. Laboratory sessions are coordinated with lectures and cover the fundamentals of diagnostic laboratory procedures and are included in the didactic phase. The program maintains an extensive collection of reference books, microscopic slides and projection slides, Power Point presentations and microscopic digitized images for use in lectures and independent study. Students are expected to maintain high academic performance and display appropriate professional and ethical behavior during all phases of their education and training.

Accreditation

The Histotechnology program is accredited by, and the curriculum conforms to the standards published and monitored by NAACLS.

Current Affiliations

The Program in Histotechnology has developed education affiliations with clinical and research pathology laboratories and medical institutions in the Greater Houston area, so that students will develop expertise in a variety of settings and experience the breadth of opportunity available to a certified histotechnologist. During the clinical phase of instruction, training and supervision are provided in affiliated clinical laboratories. Visit the Histotechnology Program page for a list of current affiliations.

Medical Dosimetrists are vital members of the radiation oncology team, working closely with radiation oncologists, medical physicists, and radiation therapists to create customized radiation treatment plans designed to target cancer while sparing normal tissue. In order to carry out this work, medical dosimetrists must develop a knowledge base that includes, but is not limited to, human anatomy, clinical disease processes, radiation physics, and computer technology.

Medical dosimetrists use multimodality imaging, including CT, MRI, and PET scans, to construct three-dimensional treatment plans that will allow the delivery of high doses of radiation to a tumor while minimizing the risk to sensitive surrounding tissues. In the course of their work, medical dosimetrists also contribute to excellence in patient care by participating in quality assurance and innovative clinical research.

Students are prepared for the technical, theoretical, and psychological aspects of a career in this field and acquire the professional skills of dose calculation, treatment design and quality assurance through intensive classroom, laboratory, and clinical education.

Degree Offered
Bachelor of Science in Medical Dosimetry

Program Administration
Program Director Mahsa Dehghanpour, Ed.D., CMD
Associate Program Director Jamie Baker, Ph.D., CMD
Executive Advisor George Perkins, M.D.

Program Information
Mission
To provide high quality didactic and technologically advanced clinical education in Medical Dosimetry and to graduate professional practitioners who are valued by radiation oncology employers, display excellent treatment planning and assessment skills, and remain active in the professional community and learning throughout their careers.

Vision
We shall be the premier educational program in medical dosimetry by providing innovative curricular, clinical and continuing education services to The University of Texas MD Anderson Cancer Center, the State of Texas and the world.

Goals
• Students will be clinically competent.
• Students will display critical thinking skills.
• Students will demonstrate professionalism.
• Students will display effective communication skills.
• The program will provide the community with entry-level medical dosimetrists.

Objectives
The Program in Medical Dosimetry is designed to prepare students for the technical, theoretical and psychological aspects of a career in this field. Students acquire the professional skills of dose calculation, treatment design and quality assurance through intensive classroom, laboratory and clinical education under the supervision of board-certified medical dosimetrists, physicists and radiation oncologists.

Program Admission Requirements
Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

A minimum GPA of 2.5 on a 4.0 scale both overall and in undergraduate courses is required to be considered for admission.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process
Once accepted into Medical Dosimetry, enrollment is dependent on factors that include the following.

• Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
• Ability to meet the School of Health Professions Nonacademic Technical Standards.
• Proof of current health immunizations.
• Satisfactory completion of a drug screen and background check.

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.
For the Two-Year Program
Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 4 SCH in Anatomy and Physiology I
- 4 SCH in Anatomy and Physiology II
- 4 SCH in General Physics I
- 4 SCH in General Physics II
- 3 SCH in Calculus I
- 3 SCH in Calculus II

Refer to the prerequisite sheet (pdf) for details.

Advanced Placement
The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to School of Health Professions courses with the results being reported to the Registrar.

Graduation
Each candidate for a baccalaureate degree must complete a minimum of 130 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:

- At least 40 SCH of upper-level coursework
- At least 25% of the total SCH required must be taken at MD Anderson

Graduation is in August. Upon graduation, students are eligible to take the national certification exam in Medical Dosimetry administered by the MDCB. Check with the program director or visit the MDCB site for application deadlines and exam dates. Upon passing the exam, the graduate is considered a Certified Medical Dosimetrist (CMD). The awarding of the degree is not contingent upon a student passing the national certification exam.

Curriculum
This intensive two-year program is composed of didactic education and directed clinical training at MD Anderson clinics and affiliated hospitals. During the didactic phase, formal lectures cover dose calculations, treatment design, quality assurance and other field specific topics. Treatment planning laboratory sessions complement the lecture series.

Accreditation
The Program is accredited by and has conformed its curriculum to the standards and guidelines published and monitored by the JRCERT.

Current Affiliations
During the clinical phase of instruction, training and supervision are provided in a variety of locations. Visit the Medical Dosimetry Program page for a list of current affiliations.

**Free Elective Courses**

If a student has taken a course in the Two-Year Curriculum as a prerequisite prior to entering the program, then that student will not be required to repeat the course. However, the student must substitute one of the following Free Electives with equivalent SCH in order to fulfill the minimum required SCH for graduation from the Medical Dosimetry program.

- DI 4310 Teaching Strategies in Health Care Education 3
- DI 4318 Promotional Strategies in Rad Sciences 3
- DI 4320 Current Trends in Health Care Management 3
- DI 4322 Effective Human Resources Management 3
- DI 4323 Management Skills for New Supervisors 3
- HS 3110 Medical Terminology 1
- HS 3340 Research Methods 3
- HS 4111 Medical Law 1
- RT 4199 Special Topics in Radiation Therapy 1
- RT 4309 Special Applications in Radiation Oncology 3

*NOTE: Additional courses may be used as Free Electives with the approval of the program director.*
**B.S. in Molecular Genetic Technology**

Molecular genetic technologists study the role of DNA in oncology, Mendelian genetics, forensic identity, infectious disease, population genetics, and pre-and post-natal diagnosis.

**Degree Offered**
Bachelor of Science in Molecular Genetic Technology

**Program Administration**

**Program Director**  Peter Hu, Ph.D., MLS(ASCP)SM CGCM MB(ASCP)SM, FACSc, FASAHP  

**Associate Program Director**  Vibhuti Srivastava, Ph.D., MB(ASCP)SM  

**Executive Advisor**  Rajyalakshmi Luthra, Ph.D.

**Program Information**

**Mission**
The MD Anderson Cancer Center Program in Molecular Genetic Technology, in concert with the mission and vision of The University of Texas MD Anderson Cancer Center, is committed to the education of technically and academically competent graduates prepared to meet the immediate and future needs of the Molecular Genetic Technology profession.

**Objectives**
The Molecular Genetic Technology program is designed to prepare students to become entry-level clinical molecular genetic technologists. The program provides instruction in major areas of the field such as:

- Cancer molecular genetic testing
- DNA forensic science testing
- Infectious disease testing
- Pre- and Post-natal genetic disorder testing

The curriculum provides didactic training followed by directed clinical training at affiliated hospitals and laboratories. Students may enter the program to pursue a Bachelor of Science degree and program faculty help each student develop a focal point related to the learner’s area of interest. During their training, students learn how to detect DNA polymorphisms and interpret a variety of DNA and RNA assays. They also develop an understanding of the essential elements of statistics and population genetics.

While students study molecular diagnostic procedures such as recombinant DNA technology and its application to the clinical laboratory, their laboratory experiences may include but are not limited to the following:

- DNA and RNA extraction
- Hybridization methods
- Microarray technology
- Next generation sequencing
- PCR, primer design, real-time PCR and Melt Curve Analysis
- Sanger sequencing and fragment analysis

Students also focus on the specific applications of molecular techniques within such disciplines as:

- Bacteriology
- Forensics
- Genetic disease of inheritance
- Infectious disease
- Oncology
- Paternity

Professionals in the field have a wide range of career options. As the Human Genome Project has lead to the discovery of an increasing number of genes important in human disease processes, molecular genetic technologists will play an ever-increasing role in diagnostic patient care.

Employment opportunities include the following:

- Biotechnology companies
- Cancer centers
- Genetic counseling departments
- Forensic laboratories
- Pediatric clinics
- Research and teaching institutions
- Research, molecular cytogenetic and pathology laboratories

Some molecular genetic technologists combine administrative and managerial talent with their technical background to become laboratory or hospital administrators.

**Program Admission Requirements**

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree either enter at the Junior level (two-year track) or Senior level (one-year track). Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

A minimum GPA of 2.5 on a 4.0 scale both overall and in science and mathematics courses is required to be considered for admission. Cumulative and prerequisite GPA are factors for admissions.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

**Enrollment Process**

Once accepted into Molecular Genetic Technology, enrollment is dependent on factors that include the following.
• Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
• Ability to meet the School of Health Professions Nonacademic Technical Standards.
• Proof of current health immunizations.
• Satisfactory completion of a drug screen and background check.

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

For the Two-Year Program
Students must complete a minimum of 60 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 8 SCH in Biological Sciences
- 15 SCH in Chemistry to include Organic Chemistry or Biochemistry

Refer to the prerequisite sheet (pdf) for details.

For the One-Year Program
Students must complete a minimum of 90 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:

- 3 SCH of Microbiology
- 3 SCH of Genetics
- 8 additional SCH in Biological Sciences
- 15 SCH in Chemistry to include Organic Chemistry or Biochemistry
- 12 SCH of upper-level courses

Refer to the prerequisite sheet (pdf) for details.

Advanced Placement
The School of Health Professions accepts and/or awards credit through the following examination programs*.

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty is consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

Graduation
Each candidate for a baccalaureate degree must complete a minimum of 136 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:

- At least 40 SCH of upper-level coursework.
- At least 25% of the total SCH required must be taken at MD Anderson.

Graduation is in August. Upon graduation, students are eligible to take the national certification exam in molecular biology administered by the ASCP Board of Certification.

Check with the program director for application deadlines and exam dates. Upon passing the exam, the student is considered a certified molecular genetic technologist. The awarding of the degree is not contingent upon a student passing the national certification exam.

Curriculum
This intensive two-year program is composed of a didactic phase followed by directed clinical training at affiliated hospitals and laboratories. During the didactic phase, formal lectures are presented on the principles of medical genetics, molecular and biochemical basis of genetic disease, hematology, clinical molecular genetics and molecular genetic technology. Laboratory sessions coordinated to lectures and covering the fundamentals of diagnostic laboratory procedures are included in the didactic phase.

Accreditation
The Molecular Genetic Technology program is accredited and has conformed its curriculum to the standards published and monitored by NAACLS.

Current Affiliations
During the clinical phase of instruction, training and supervision are provided in affiliated clinical laboratories. The locations are subject to change depending on availability on a year-to-year basis. Visit the Molecular Genetic Technology Program page for a list of current affiliations.

B.S. in Radiation Therapy

Radiation therapy involves the administration of ionizing radiation for the treatment of cancer and other related conditions. The field of Radiation Therapy presents the professional with the unique opportunity to blend the knowledge of mathematics, medical science, psychology and critical thinking while providing hands-on patient care.

Degree Offered
Bachelor of Science in Radiation Therapy

Program Administration

Program Director  Shaun T. Caldwell, Ed.D., R.T.(R)(T)
Associate Program Director Sandra John-Baptiste, R.T.(T), CMD
Executive Advisor  Eric A. Strom, M.D., F.A.C.R.

Program Information

Mission
The mission of the Radiation Therapy Program is to provide the highest quality of education to radiation therapy students through formal didactic and state-of-the-art clinical experiences that prepare the student to deliver superior patient care and treatment in all aspects of radiation therapy.

Vision
We shall be the premier provider of education for radiation therapy professionals based on best practices and research in radiation oncology.

Objectives
The MD Anderson Program in Radiation Therapy is designed to prepare students for a challenging career in cancer treatment through formal education including human anatomy, physiology, radiation therapy physics, radiation oncology, pathology, radiation biology, medical dosimetry, quality assurance and patient care.

Goals and Student Learning Outcomes

Our students will
- Be clinically competent.
- Be critical thinkers.
- Be effective communicators.
- Demonstrate professionalism.

Goal: Clinical Competence
Student Learning Outcomes: The student will
- Accurately assess the patient’s status prior to discharge from their care.
- Demonstrate reproduction of the patient’s initial setup.
- Demonstrate superior patient care skills.

Goal: Critical Thinking
Student Learning Outcomes: The student will
- Evaluate and interpret data.
- Recognize discrepancies in treatment.
- Develop solutions to clinical situations.

Goal: Effective Communication
Student Learning Outcomes: The student will
- Communicate with patients
- Demonstrate written communication skills
- Demonstrate oral presentation skills

Goal: Demonstrate Professionalism
Student Learning Outcomes: The student will
- Discuss patient information and setup out of hearing of inappropriate people.
- Assume full responsibility for their actions.
- Accepts constructive criticism.

Program Admission Requirements
Admissions to Radiation Therapy is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing a Bachelor of Science degree enter at the Junior level. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.
- Candidates who completed the prerequisite courses seven or more years before admission may need to update their academic skills. For specific information, contact the program director.
- A minimum GPA of 2.5 on a 4.0 scale for overall, science courses and prerequisites is required to be considered for admission. Cumulative and prerequisite GPA are factors for admissions.
- Clinical site evaluation.
- Assessments to gauge knowledge in anatomy and physiology, math and physics as well as soft skills (e.g., initiative, problem solving, decision making). The assessments will be administered on or prior to the interview date.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the School of Health Professions How to Apply page for application dates.

Enrollment Process
Once accepted into Radiation Therapy, enrollment is dependent on factors that include the following.
- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
• Ability to meet the School of Health Professions Nonacademic Technical Standards.
• Proof of current health immunizations.
• Satisfactory completion of a drug screen and background check.

Nonacademic Requirements
Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites
Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

Texas Core Curriculum
Students must complete the Texas Core Curriculum and prerequisite courses elsewhere prior to transferring into the School of Health Professions. The courses may be taken at any regionally accredited college/university. Refer to the Texas Core Curriculum section of this catalog.

For the Two-Year Program
Students must complete a minimum of 46 SCH that includes the Texas Core Curriculum (42 SCH) and the following courses:
• 3 SCH in Pre-Calculus
• 4 SCH in Anatomy and Physiology I
• 4 SCH in Anatomy and Physiology II
• 4 SCH in College Physics I
• 4 SCH in College Physics II
Refer to the prerequisite sheet (pdf) for details.

Advanced Placement
The School of Health Professions accepts and/or awards credit through the following examination programs*.
• College level examination program of the College Board
• Comprehensive departmental examinations
• Regionally accredited military training programs

*Note: The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to School of Health Professions courses with the results being reported to the Registrar.

Graduation
Each candidate for a baccalaureate degree must complete a minimum of 126 SCH of coursework. Within this requirement, students must complete the following at MD Anderson:
• At least 40 SCH of upper-level coursework
• At least 25% of the total SCH required must be taken at MD Anderson

Upon completion of the curriculum, students will have demonstrated the professional skills necessary to plan, deliver and record a prescribed course of radiation including proton therapy.

Graduation is in August. Upon graduation, students may be eligible to take the national certification exam administered by the ARRT.

All applicants should determine American Registry of Radiologic Technologists website to determine examination eligibility prior to applying to the program. Upon passing the exam, the student is considered a certified Radiation Therapist. The awarding of the degree is not contingent upon a student passing the national certification exam.

Curriculum
The curriculum meets or exceeds the national curriculum of the ASRT. This intensive two-year program is composed of a didactic and directed clinical training at affiliated hospitals. Formal lectures cover human anatomy, physiology, radiation therapy physics, radiation oncology, pathophysiology, radiation biology, treatment planning, dosimetry, quality assurance and patient care.

Accreditation
The Radiation Therapy Program is accredited by and meets the standards and guidelines of the JRCERT.

Current Affiliations
During the clinical phase of instruction, training and supervision are provided in a variety of clinical sites. Visit the Radiation Therapy Program page for a list of current affiliations.

Advanced Technical Certificates

A.T.C. in Mammography
A.T.C. in Mammography

Mammography is a specialized imaging modality that uses ionizing radiation to produce high-quality, multidimensional soft-tissue breast imaging displays. This one-semester program offers radiologic technologists a pathway to expand their knowledge in mammography while completing an Advanced Technical Certificate. The program prepares the student for various careers in hospitals, clinics, and other healthcare organizations.

Certificate Offered

Advanced Technical Certificate in Mammography

Program Administration

Program Director of Advanced Imaging Modalities  William Undie, Ed.D., R.T.(R)(T)

Associate Program Director of CT, CT/VI and M  Claudia Tamara, D.D.S., R.T.(CT)(N)(ARRT), CNMT,

Executive Advisor  Aurelio Matamoros, M.D.

Program Information

Mission

The mission of the Advanced Technical Certificate Program in Mammography is to train and create competent professionals for the performance of diagnostic studies that will have a positive impact on the prevention and management of breast cancer and other related diseases.

Vision

The Advanced Technical Mammography Certificate Program will strive to provide excellence in the academic and clinical training of future professionals while at the same time facilitating compassionate and outstanding patient care.

Program Admission Requirements

Admissions to the program is competitive and holistic. Meeting the minimum requirement does not guarantee acceptance. Students pursuing an Advanced Technical Certificate in Mammography enter as a non-degree seeking student. Application and supporting documents must be submitted in applyUTH.

Applicants must satisfy the General Requirements for admission as listed in the Admissions section in addition to the following.

- A minimum overall GPA of 2.5 on a 4.0 scale. Cumulative and prerequisite GPA are factors for admissions.
- ARRT certification in Radiography (R).
- Associate’s degree or higher.
- CPR certification through the American Heart Association certification.

Applicants should begin the application process three to six months prior to the application deadline to ensure all documents are received and processed by the Office of the Registrar by the due date. Refer to the Mammography How to Apply page for application dates.

Enrollment Process

Once accepted into Diagnostic Imaging, enrollment is dependent on factors that include the following.

- Proof of successful assessment of the Texas Success Initiative (TSI). Refer to the TSI section of this catalog.
- Ability to meet the School of Health Professions Nonacademic Technical Standards.
- Proof of current health immunizations.
- Satisfactory completion of a drug screen and background check.

Nonacademic Requirements

Refer to the Nonacademic Technical Standards section of this catalog.

Prerequisites

Several physical education and military sciences are not acceptable for discipline-specific prerequisites.

For the One-Semester Certificate Program

All students must have earned an associate’s degree or higher to satisfy the ARRT requirements for candidates seeking a certification after 2015.

Students must be certified by the ARRT (R).

Advanced Placement

The School of Health Professions accepts and/or awards credit through the following examination programs*

- College level examination program of the College Board
- Comprehensive departmental examinations
- Regionally accredited military training programs

* The student who is admitted or readmitted will undergo an evaluation process related to awarding course credits, if applicable.

Recommendations from the School of Health Professions’ academic departments are followed regarding minimum score requirements, level of credit and amount of credit to be awarded. Program faculty are consulted to determine if credit recommendations equate to specific School of Health Professions courses. The internal comprehensive departmental examination program provides a local means for establishing knowledge of the School of Health Professions course content in areas not covered by the above examination program. Programs may elect to administer examinations that cover material specific to the School of Health Professions courses with the results being reported to the Registrar.

Certificate Completion

Each candidate for a certificate must complete 16 SCH of coursework and a two-day Mammography Registry Review, all of which must be taken at MD Anderson.

The Registry Review is preparation for the national credentialing ARRT Mammography examination. The training grants 16 continuing education credit hours (CECH) that can be used as part of the structured education requirement for ARRT. The course meets the final two days of the semester.

Upon completion of the curriculum, students will have demonstrated the professional skills necessary to work with ionizing radiation to produce medical images in diagnostic imaging or radiology departments of hospitals, and medical clinics or freestanding imaging centers.

Curriculum
The curriculum meets or exceeds the curriculum recommendations of the American Society of Radiologic Technologists (ASRT). This intensive one-semester program is composed of a didactic phase followed by directed clinical training at affiliated hospitals.

**Accreditation**

The Diagnostic Imaging Program is accredited by and has conformed its curriculum to the standards and guidelines published and monitored by the JRCERT.

**Current Affiliations**

During the clinical phase of instruction, training and supervision are provided in a variety of clinical sites. Visit the Diagnostic Imaging Program page for a list of current affiliations.

**Course Listings**

The semester schedule below includes all courses needed for completion, but the sequence and/or course offerings are subject to change.

**One-Semester Program  16 SCH + 16 CECH**

**Course Descriptions**

**Cytogenetic Technology**

**CC 4120 Introduction to G-band Karyotyping** 1 SCH
A detailed study of human G-banded chromosomes. Includes instruction in banding pattern recognition, polymorphic variation and determination of band level and the International System for Human Cytogenetic Nomenclature (ISCN). Includes classroom instruction and hands-on experience.

*Course Fee: $40.00*

**CC 4152 Prenatal Cytogenetics** 1 SCH
A study of indications for prenatal diagnosis and the procedures used to obtain specimens for such diagnoses: ultrasonography, cordocentesis, amniocentesis and CVS; biochemical assays for metabolic diseases; problems encountered in prenatal chromosome analysis; teratology; and explanations and demonstrations of prenatal cytogenetic techniques and procedures.

**CC 4181 Independent Research Project II** 1 SCH
This course is designed to allow students to have the opportunity to conduct independent research activities with guidance from their faculty advisor. Students are required to submit a formal proposal for review and approval by the program faculty.

*Course Fee: $38.11*

*Prerequisite: CC 4280*

**CC 4210 Molec & Biochem Basis of Genetic Disease** 2 SCH
A comprehensive study of cytogenetic disease using case studies. The relationships between molecular defect and the nature of its clinical pathology will be explored through the examination of biochemical pathways affected such as metabolic, transport, neurological and muscle and bone. In addition, cytogenetic analysis will be examined through the pre-analytical and analytical and post-analytical process. Students will build a foundation of critical decision-making and an understanding of the principles of the molecular and biochemical basis of cytogenetic disease.

**CC 4240 Advanced Cytogenetic Lab Techniques** 2 SCH
A comprehensive study of the cytogenetic analysis of solid tumors. Course includes the study of tumor origin and development, mechanisms of transformation in carcinogenesis and random versus nonrandom findings in human solid tumors. The student will also study the mutagenic effects derived from lifestyle and environmental factors as they relate to malignant disease. This course combines both lecture and laboratory experience into one integrated learning experience.

*Course Fee: $38.11*

**CC 4250 Clinical Cytogenetics** 2 SCH
A comprehensive study of chromosome morphology and terminology, general principles of clinical cytogenetics, abnormalities of chromosome number and structure, disorders of autosomes, sex chromosome disorders, the X chromosome, the Y chromosome, congenital versus acquired abnormalities and the ISCN.

*Course Fee: $35.00*

**CC 4251L Clinical Cytogenetics** 2 SCH
In this laboratory students will perform microscopic slide analysis of peripheral blood and bone marrow cases, and identify chromosome numerical and structural abnormality, applying standard analysis and reporting practices such as band level and ISCN.

*Course Fee: $35.00*

**CC 4280 Independent Research Project I** 2 SCH
This course is designed to provide students with an opportunity to independently explore a research area of interest related to cytogenetic technology. Students will perform a literature review. Class discussions will explore experimental design and searching the research literature.

**CC 4320 Special Topics in Genetics** 3 SCH
This course will introduce the student to the newest methodologies and topics in genetics. Current topics include spectral karyotyping, creation of BAC clone FISH probes, DNA sequencing, array comparative genomic hybridization (aCGH) and use of online genetic databases.

*Course Fee: $30.00*

**CC 4390 Advanced Topics in Cytogenetics** 3 SCH
This will be a capstone course where students work on case studies to develop their problem solving skills in a clinical cytogenetic environment. Students will also participate in a national review in clinical cytogenetics. Finally, students will show mastery of the field of cytogenetics through practice exams and eventually taking a comprehensive cytogenetic exam.

*Prerequisite: GT 4300*

**CC 4521 Clinical Cytogenetic Rotation I** 5 SCH
This laboratory rotation complements, expounds on and practically applies the study of cytogenetic procedures and techniques used in diagnosis of chromosomal disorders. This laboratory rotation also provides the students an opportunity to observe and participate in the testing algorithms and reflex testing that occur in this type of cytogenetic testing environment.

*Course Fee: $38.11*

*Prerequisite: CC 4152 and CC 4250*

**CC 4530 Basic Laboratory Techniques** 5 SCH
A comprehensive study of maintaining laboratory quality control in accordance with federal, state and local regulations, as well as College of American Pathologist on-site inspections and proficiency testing. Also, a study of laboratory skills as they apply to amniotic fluid, chorionic villus sampling, abortus tissue, blood, bone marrow and solid tissue samples with respect to transporting, preparing, culturing, harvesting, banding, analyzing, photographing, karyotyping and reporting final results of specimens. Students will also be instructed in fluorescent in situ hybridization techniques and computer imaging of cytogenetic specimens.

*Course Fee: $40.00*

**CC 4531 Clinical Cytogenetic Rotation II** 5 SCH
This laboratory rotation provides the student with comprehensive practical applications in all aspects of the cytogenetic study of hematological malignant disease: specimen preparation, culture and harvest, banding techniques, microscopic cell analysis, photographic techniques, karyotype preparation, evaluation, probe application and ISCN. Quality control procedures and safety considerations are stressed.

*Course Fee: $35.00*

*Prerequisite: GT 4330*
Clinical Laboratory Science

**CL 4200  Core Laboratory Techniques Laboratory 2 SCH**
Laboratory emphasizes hands-on instruction in analytical and special chemistry procedures used to determine the composition of blood and urine, analytical techniques used to measure coagulation, perform manual procedures to quantify and identify cells in peripheral blood and operate, maintain and problem-solve procedures on a wide range of instruments. 
*Course Fee:* $47.00

**CL 4210  Microbiology Student Laboratory 2 SCH**
Student laboratory emphasizes the utilization of morphological, biochemical and serological characteristics for microorganism identification.

**CL 4231  Immunohematology Laboratory 2 SCH**
Laboratory emphasizes hands-on instruction in basic blood bank techniques, resolution of compatibility problems and advanced antibody identification methods.  
*Corequisite:* CL 4330

**CL 4260  Capstone Seminar 2 SCH**
This course provides an integration of the information obtained by laboratory testing in the various laboratory disciplines.  
*Course Fee:* $45.00  
*Prerequisites:* CL 4320, CL 4330, CL 4345, CL 4400, CL 4440, HS 3330

**CL 4320  Diagnostic Microbiology 3 SCH**
This is a comprehensive study of clinically important aerobic and anaerobic bacteria, protozoan, helminthic, and arthropod parasites, and clinically important viruses of medical significance in humans. Course will also discuss the clinically important fungi and their interaction with the human host and recognized species of mycobacteria that are known to cause disease in human hosts. In addition, the course includes a study of serological techniques such as agglutination, precipitation, enzyme immunoassay, immunofluorescence and the utilization of growth characteristics and biochemical tests to correlate disease to microorganism and evaluate antibiotic susceptibility.

**CL 4321  Clinical Microbiology 3 SCH**
Clinical laboratory study of the utilization of morphological biochemical and serological characteristics for microorganism identification.  
*Course Fee:* $50.0  
*Prerequisite:* CL 4320

**CL 4330  Immunohematology 3 SCH**
An in-depth study of the basic principles of immunology, human blood group systems, blood group genetics and the theory and application of blood bank techniques.

**CL 4332  Clinical Immunohematology 3 SCH**
Clinical laboratory study of the serodiagnostic studies of blood group identification and transfusion service procedures.  
*Course Fee:* $50.00  
*Prerequisite:* CL 4231, 4330

**CL 4345  Hemostasis 3 SCH**
An analysis of the mechanisms of hemostasis, the analytical techniques used to measure coagulation and the correlation of test results with hemostatic disorders.
## Cytotechnology

### CT 4101  Introduction to Cytotechnology  1 SCH
The student is introduced to the ethics and liability of the profession, the use of the light microscope and the professional role of the cytotechnologist. The course also includes lectures on the basic cellular structure and function, cell division, the origins of clinical cytology, evaluation of the cell sample and slide marking.

### CT 4102  Theory & Practice of Cytopreparatory Techniques I  1 SCH
The course consists of the basic study and practice of techniques used for handling cytological specimen preparation and fixation and staining of specimens for cytological study, including compliance with laboratory safety, biohazard precautions and HPV testing.

**Course Fee:** $40.00

### CT 4112  Gynecologic Diagnostic Laboratory III  1 SCH
The course consists of advanced application of cytodagnostic criteria for microscopic analysis (screening, detecting, marking and diagnosing) and reporting cervicovaginal specimens on conventional and Thin Prep monolayer preparations in conjunction with clinical history. Quality control and clinical ethics are included.

### CT 4116  Comprehensive Cytopathology  1 SCH
Medical terminology and comprehensive cytopathology theory review of Gynecological, Non Gynecological and Fine needle aspiration body sites/organs.

### CT 4120  Laboratory Operations  1 SCH
Introduction to quality control and assurance, laboratory regulations, inventory methods, budgeting, information systems and leadership.

### CT 4213  Nongynecologic Diagnostic Laboratory II 2 SCH
The course consists of an advanced study of cytomorphological features of respiratory, gastrointestinal, urinary and central nervous systems and effusions for microscopic and clinical analysis of exfoliative Non-Gynecologic specimens. The students will have hands-on laboratory experience.

**Course Fee:** $38.11

### CT 4303  Gynecologic Cytopathology  3 SCH
Students will study the normal anatomy, physiology and benign and malignant pathology of the female genital tract and corresponding cytomorphological features, as well as the value of cytopathological diagnosis in patient management.

### CT 4306  Nongynecologic Diagnostic Laboratory I  3 SCH
The course consists of the application of cytomorphological features of the respiratory system and gastrointestinal tract for microscopic and clinical analysis of exfoliative Non-Gynecologic specimens from these organs. The students will have hands-on laboratory experience.

**Course Fee:** $40.00

### CT 4307  Nongynecologic Cytopathology II  3 SCH
Students will study the normal anatomy and physiology of the urinary tract, central nervous system and body cavities. They learn cytomorphology of benign and malignant conditions of these organs/sites.

### CT 4308  Gynecologic Diagnostic Laboratory II  3 SCH
The course consists of the application of cytodagnostic criteria for microscopic analysis (screening, detecting, marking and diagnosing) and reporting cervicovaginal specimens in conjunction with clinical history. SurePath preparations are used as study material.

**Course Fee:** $38.11

### CT 4309  Fine-Needle Aspiration Cytopathology  3 SCH
The study of normal anatomy and cytology of benign and malignant pathology and corresponding cytomorphological features of fine-needle aspiration specimens from lung, breast, thyroid, salivary gland, liver, pancreas, kidney, adrenal gland, bone, soft tissue, skin and lymph nodes.

### CT 4310  Fine Needle Aspiration Diagnostic Lab  3 SCH
The students will have hands-on laboratory experience as they learn to apply cytodagnostic criteria and develop practical expertise in microscopic and clinical analysis of fine-needle aspiration specimens from lung, breast, thyroid, salivary gland, liver, pancreas, kidney, adrenal gland, bone, soft tissue, skin and lymph nodes with clinical correlation.

### CT 4404  Gynecologic Diagnostic Laboratory I  4 SCH
The course consists of basic application of cytodagnostic criteria for microscopic and clinical analysis (screening, detecting, marking and diagnosing) and reporting cervicovaginal specimens in conjunction with clinical history. Conventional pap smears and monolayer preparations of gynecologic specimens are used. The students will have hands-on laboratory experience.

**Course Fee:** $40.00

### CT 4405  Nongynecologic Cytopathology I  4 SCH
Students will study the normal anatomy, physiology and benign and malignant pathology with corresponding cytomorphological features of the respiratory system and gastrointestinal tract. The value of cytopathological diagnosis in patient management is included.

### CT 4615  Clinical Rotation I  6 SCH
The student will have the opportunity to continue developing their microscopic and diagnostic skills in various clinical affiliate laboratories.

**Course Fee:** $47.00

### CT 4616  Clinical Rotation II  6 SCH
The student will have the opportunity to continue developing their microscopic and diagnostic skills in various clinical affiliate laboratories.

**Course Fee:** $47.00
Disparities, Diversity and Advocacy

**DDA 4345 Directed Readings**  1-3 SCH
This course provides the student with the skills to read, critically analyze, synthesize, and share findings regarding professional literature in APA 7th Ed. written format.

**DDA 4311 Disparities in Health Care**  3 SCH
This course introduces research and education which identifies determinants of disparities as well as interventions and policies designed to eliminate disparities within health care and treatment.

**DDA 4312 Global Health Practices**  3 SCH
This course introduces the student to the socio-cultural, political and economic determinants of health and health status at a global level; understanding the impact of cultural, ethical, lifestyle, social and economic causational factors that influence disease prevention, research, treatment and post care.

**DDA 4313 Caring for the Aging Population**  3 SCH
This course will define international disability classifications and provide a unifying framework for function and disability.

**DDA 4314 Resources and Support for Accommodating Patients with Special Needs**  3 SCH
Investigation of resources and best practices in accommodating patients with special needs.

**DDA 4316 Telehealth Best Practices and Operations**  3 SCH
This course will provide the foundation science for telehealth practice by comparing and contrasting telehealth with the standards for healthcare delivery. Various applications, benefits and challenges of telehealth delivery will be explored recognizing the provider and facilitator roles within the interdisciplinary team. Course delivery is on-line, interactive, self-paced.

**DDA 4321 Accommodating Differences in Healthcare Setting**  3 SCH
This course explores how the cultural influences that impact patient care. Mental and physical abilities, sexual orientation and gender identity are discussed.

**DDA 4322 Mentoring Across Differences**  3 SCH
This course provides the skills to build successful professional mentoring relationships across cultural differences.

**DDA 4323 Organizational Behavior and Leadership in Healthcare**  3 SCH
This course presents effective strategies in management and leadership across cultural differences within a care centric work environment to create trust, respect and inclusiveness within healthcare teams.

**DDA 4324 Clinical Preceptorship in Diversity**  3 SCH
Students will be assigned to practice with a mentor in a health care diversity setting. The students will demonstrate their knowledge of content areas through projects, presentations and team activities.

**DDA 4331 Patient Advocacy**  3 SCH
This course will provide an understanding of this specialization in health care concerned with advocacy for patients, survivors and other populations.

**DDA 4332 The Role of the Patient Advocate**  3 SCH
This course will allow students to understand the role of an advocate. The primary roles of support, education, liaisons, policy and development of the framework for patient related outcomes.

**DDA 4333 Health Care Policy and Practice**  3 SCH
This course provides an understanding of the critical role of systematic evaluation in assessing the effectiveness of health services programs and policies.

**DDA 4334 Clinical Preceptorship in Patient Advocacy**  3 SCH
Students will be assigned to practice with a mentor in an advocacy setting. The students will demonstrate their knowledge of content areas through projects, presentations and team activities.

**DDA 4345 Capstone**  3 SCH
This course will provide the student an opportunity to demonstrate mastery of the principles and concepts of diversity, disparities and advocacy. Students will complete projects and activities associated with challenges in the current health care environment.

**DDA 4390 Independent Project**  1-3 SCH
This course is designed to provide the student with professional behaviors and performance in the health care setting. Students will explore the complexity of issues related to disparities, diversity, and/or advocacy in the health care setting and the benefits of working on an interdisciplinary team under the guidance of a faculty advisor. Repeatable 2 times. **Prerequisites:** Advisor approval of project and registration.
Diagnostic Genetics and Genomics

DG 6100 Clinical Research Seminar 1 SCH
Seminar based course that covers topics in genetics and related fields.
Course Fee: $35.00

DG 6110 Bioinformatics in Diagnostic Genetics Lab 1 SCH
This course is an introduction to Bioinformatics – rapidly evolving science at the interface of computers and diagnostic genetics and genomics - with emphasis on molecular evolutionary and key algorithmic foundations. Thus, this course provides a conceptual framework underlying much of modern bioinformatics. Moreover, students will gain hands on experience with computer programs useful for context-driven analyses, data mining and discovery and characterization of gene/RNA/protein/genome sequences, evaluation of DNA/RNA/protein molecules as putative diagnostic markers through basic comparative genomic analyses applications based on Dynamic Programming, Hidden Markov Models, Bayesian Probability, Euler and de-Brujin graphs, Burroughs-Wheeler transform etc. Students are assigned an independent project (PICCDIn) to demonstrate their aptitude and active learning skills (theoretical and Lab-based) through development of a bioinformatics pipeline epidemiological surveillance bacterial and viral genome sequences. This course runs in tandem with DG6320 (Bioinformatics in Diagnostic Genetics). This course is a part of the Project-based Integrated Core Curriculum Development Initiative (PICCDIn).
Course Fee: $50.00

DG 6181 Advanced Molecular Biology and Techniques 1 SCH
Comprehensive descriptions of the methods to study the molecular biology of DNA, RNA, small non-coding RNAs, chromatin dynamics, genome structure, function and regulation; advanced molecular biological methods discussed include ddPCR; multiplex-PCR and Realtime-PCR; NGS, including DNA/RNA/snRNA library preparations.

DG 6201 Advanced Practice I C 2 SCH
This is a hypothesis-based original research study. Student must fulfill the requirements of a master’s level applied research work including an approved proposal by the faculty advisor and the Diagnostic Genetics core committee 1 month before the beginning of the term. Graduation with an applied research project is subject to approval by the applied research committee and program core committee requires the student to present their projects to a faculty committee both orally and in writing.
Course Fee: $50.00

DG 6240 Abnormal Case Studies and Comprehensive Review 2 SCH
A continuation of DG6120 Intermediate Karyotyping. This advanced course in G-banded chromosome identification requires students to apply cytogenetic knowledge and karyotyping skills to solve either complex pre/postnatal or oncologic cytogenetic cases. Students will be required to apply the International System for Human Cytogenetic Nomenclature (ISCN) for their analysis and present their case studies.
Course Fee: $38.11

DG 6250 Clinical Cytogenetics I 2 SCH
A combined learning experience of lecture instruction, and class discussion on general principles of clinical cytogenetics. Students will be exposed to the basics of clinical cytogenetics to describe human chromosomes and chromosomal abnormalities associated with human disorders. Variations in autosomal and sex chromosome number and structure associated with multiple congenital anomalies, intellectual disabilities and developmental delay will be studied in detail. The course will also overlap with some of the laboratory techniques and its importance in identifying newer microdeletion and duplication syndromes. Apart from this, mechanisms involved in meiotic outcomes, congenital versus acquired abnormalities, mosaicism will be studied and discussed. Students will gain diagnostic and interpretive skills in a variety of cytogenetic problems.
Course Fee: $50.00

DG 6280 Concepts in Molecular Diagnostics 2 SCH
The primary goal of this course is to familiarize students with the fundamental molecular, pathologic, genetic and genomic concepts that drive the development and practice of ‘diagnostics genetics’. Course discussions held within the framework of evidence-based lab medicine focus on the contributions of diagnostic genetics and genomics in disease diagnosis, prevention and in personalized therapy. Topics comprise four overlapping areas: 1) Theoretical foundations of Molecular Diagnostic Techniques 2) Concepts in Genomics and Transcriptomics; 3) Established Applications of Molecular Methods: Cancer and Infectious Disease Diagnostics; Pharmacogenomics and related topics; and, 4) Development and Evaluation of New Molecular Tests - via PICDIn and critical analyses of recent publications. Where required, appropriate CLIA requirements and CLSI guidelines will be discussed to highlight the implementation of Quality Assessment (QA) and Quality Control (QC) in molecular diagnostic tests.

DG 6290 Diagnostic Molecular Pathology 2 SCH
Focuses on the specific applications of molecular techniques within a variety of disciplines. The disciplines covered include molecular cytogenetics, immunology, infectious diseases, oncology, prenatal and postnatal disorders and transplantation immunology. Participants will be evaluated by both theoretical and application knowledge through exams and a written paper.

DG 6320 Bioinformatics in Diagnostic Genetics I 3 SCH
This course is an introduction to Bioinformatics – rapidly evolving science at the interface of computers and diagnostic genetics and genomics - with emphasis on molecular evolutionary and key algorithmic foundations. Thus, this course provides a conceptual framework underlying much of modern bioinformatics. Moreover, students will gain hands on experience with computer programs useful for context-driven analyses, data mining and discovery and characterization of gene/RNA/protein/genome sequences, evaluation of DNA/RNA/protein molecules as putative diagnostic markers through basic comparative genomic analyses applications based on Dynamic Programming, Hidden Markov Models, Bayesian Probability, Euler and de-Brujin graphs, Burroughs-Wheeler transform etc. Students are assigned an independent project (PICCDIn) to demonstrate their aptitude and active learning skills (theoretical and Lab-based) through development of a bioinformatics pipeline epidemiological surveillance bacterial and viral genome sequences. This course runs in tandem with DG6110 (Bioinformatics Labs). This course is a part of the Project-based Integrated Core Curriculum Development Initiative (PICCDIn).
DG 6333  **Quantitative Research and Biostatistics**  3 SCH  

DG 6340  **Bioinformatics in Diagnostic Genetics II**  3 SCH  
This course will introduce the students to Advanced Bioinformatics toolkits with special emphasis on (i) Molecular Phylogenetic and Population Genetics and (ii) post-Next Generation Sequencing Analytical Strategies pipelines. Students will be introduced to theoretical foundations of advanced phylogenetic hypothesis testing, including model selection, detection of recombination and selection from MSAs, comparison of phylogenies etc. Students will learn to measure fundamental population genetic statistics such as mutation and recombination rates, linkage disequilibrium, gene flow, genetic differentiation with using human and other reference sequence datasets. Students will focus on analyzing and validating SNP and SNVs from whole genome and exome sequencing datasets; will learn to implement the RNA-seq analysis for quantifying gene expression in disease and control cases; and will learn ChIP-seq data analysis using reference sequence data sets. Students will learn to implement advanced molecular phylogenetic tools for testing tumor evolution and other diseases. Students will be assigned an independent project to perform sophisticated bioinformatics analysis on high throughput NGS data, which could be from their own thesis projects (if thesis involves NGS analysis) or assigned by the Faculty (if thesis does not involve NGS analysis).  
*Course Fee: $38.11*

DG 6360  **Clinical Cytogenetics II**  3 SCH  
This course will describe the identification skills of human chromosome by group, size and centromere location. Outline key landmarks using band patterns of each chromosome to master the identification skills in paring chromosomes; describe the principles, application of international standard chromosome nomenclature (ISCN) guidelines for karyotype interpretation; describe the significance of prenatal cytogenetics and outline the stages in embryogenesis including early prenatal and fetal development; describe pregnancy loss, identifying signs, symptoms and outcome with chromosome abnormalities; describe principles of invasive and non-invasive prenatal diagnostic procedures and advances in prenatal cytogenetics. Outline the interpretation of the results, ethical issues and genetic counselling in prenatal diagnosis; describe the significance of cancer cytogenetics in diagnosis of Hematological, Lymphoid neoplasms and solid tumors. Outline the preparation of different samples for cytogenetics and molecular cytogenetic analysis; describe the pathological features of leukemia’s, lymphomas and tumors of different tissues based on histological features and associated chromosomal abnormalities; and describe how to interpret chromosomal and FISH analysis results of simple and complex karyotypes and to write mock case reports.

DG 6401  **Advanced Practice I**  4 SCH  
This is a hypothesis-based original research study. Student must fulfill the requirements of a master’s level applied research work including an approved proposal by the faculty advisor and the Diagnostic Genetics core committee 1 month before the beginning of the term. Graduation with an applied research project is subject to approval by the applied research committee and program core committee, and requires the student to present their projects to a faculty committee both orally and in writing.  
*Course Fee: $40.00*

DG 6470  **Advanced Topics and Case Studies in Clinical Cytogenetics**  4 SCH  
This course will describe the overview and applications of advanced topics associated with the cancer cytogenetics including Flow cytometry, Plasma Cell enrichment studying Plasma Myeloma; describe the principles, application of specialized techniques in molecular cytogenetics including Spectral karyotyping (SKY), Spectral color banding (SCAN) and Multicolor FISH (M-FISH); describe the significance of the guideline recommendations for analyzing and reporting of HER2 and Hematological malignancies; describe the significance of chromosomal arrangements for cancer prognosis and treatment; describe the overview and application of advanced topics like chromosome confirmation capture - HiC and CRISPER and chromosome translocations; describe the principles, application of Optical mapping in present day cytogenetics to solve undiagnosed Genetic defects and complex Hematological Malignancies; describe the significance of the guideline recommendations from American college of Medical genetics and Genomics (ACMG) for analyzing and reporting of Neoplasms, Solid tumors; and describe the significance of the guideline recommendations from American college of Medical genetics and Genomics (ACMG) for analyzing and reporting of Chromosomal microarray (CMA) in prenatal, Postnatal and cancer samples.  
*Course Fee: $38.11*

DG 6501  **Advanced Practice III**  5 SCH  
This is a continuation of DG 6601 Advanced Practice II course. All rules and regulations for completion of the thesis project apply.
DG 6510 Advanced Diagnostic Molecular Laboratory Techniques 5 SCH
This course will provide hands-on opportunities to students to develop and apply their technical skills to aid in the diagnosis, prognosis and management of complex human diseases and hospital-based pathogen outbreaks. Students will conduct and interpret the outcomes of molecular diagnostic tests on archived, PHI-striped, samples from patients, control DNAs and/or otherwise healthy individuals. Students learn, 1) to handle and process human tissues and fluids and infectious pathogens isolated from human patients and extract and purify their DNA and RNA via a variety of methods in a BSL2-safety environment; 2) to perform QA-QC tests on cellular DNA/RNA and synthetic DNA/cDNA molecules via a variety of methods including, conventional (e.g., electrophoresis) and emergent methods like Biochips; 3) to manipulate purified DNA/RNA/cDNA molecules via well-established methods such as PCR and its variations to the recently emerged and rapidly maturing applications and technologies such as MLST and whole genome sequencing using next-generation sequencing technologies; and 4) to diagnose disease, provide disease prognosis and to genotype bacterial pathogens. Students are assigned an independent project to demonstrate their aptitude and active learning skills (theoretical and Lab-based) through execution of experimental and bioinformatics workflows involved in epidemiological surveillance of bacterial and viral genome and transcriptome sequences. This course is a part of the Project-based Integrated Core Curriculum Development Initiative (PICCDIn).
Course Fee: $45.00

DG 6521 Clinical Cytogenetics Rotation I 5 SCH
This laboratory rotation involves in-depth study of the different cytogenetic techniques and methods used in constitutional chromosome disorders diagnosis. This laboratory rotation also provides the students an opportunity to observe and participate in the testing algorithms and reflex testing that occur in prenatal and postnatal cytogenetic testing environment. Student is required to perform case studies and prepare a presentation to the laboratory host rotation.
Course Fee: $35.00

DG 6530 Clinical Cytogenetic Laboratory Techniques 5 SCH
This course will provide a comprehensive overview of all types of traditional cytogenetic techniques as well as molecular cytogenetic studies by fluorescence in situ hybridization. The course goal is to achieve entry-level competency in the workup of patients with constitutional chromosome abnormalities through both didactic and hand-on instruction. Various aspects of quality control and assurance associated with good laboratory practice for most routine cytogenetic methods will be performed and discussed. Students will maintain laboratory notebooks documenting the standard operating procedures with troubleshooting notations.
Course Fee: $50.00

DG 6531 Clinical Cytogenetics Rotation II 5 SCH
This laboratory rotation provides the student with intensive study of test procedures and practical application of theory topics in all aspects of the hematological malignant cytogenetic study. Analytical methodologies, as well as the correlation of cytogenetic and molecular cytogenetic tests with hematologic disorders are emphasized. Quality control procedures and safety considerations are incorporated to the process of problem solving and troubleshooting. The course also competency tests students regarding to microscopic cell analysis, photographic techniques, karyotype preparation, evaluation, FISH signal quantitation and ISCN issues. Student is required to perform case studies and prepare presentations to the laboratory host rotation.
Course Fee: $35.00

DG 6560 Clinical Molecular Rotation I 5 SCH
This clinical laboratory rotation includes the study of molecular diagnostic procedures utilizing recombinant DNA technology and its application to the many aspects of the clinical laboratory. Laboratory experiences may include but not limited to DNA specimen handling and processing, DNA extraction, DNA purification, Southern blot analysis, probe preparation and utilization, PCR, primer design, Real-Time PCR, microarray, FISH and DNA sequencing.
Course Fee: $35.00

DG 6570 Clinical Molecular Rotation II 5 SCH
This clinical laboratory rotation is a continuation of DG6560. This clinical laboratory rotation includes the study of molecular diagnostic procedures utilizing recombinant DNA technology and its application to the many aspects of the clinical laboratory. Laboratory experiences may include DNA specimen handling and processing, DNA extraction, DNA purification, Southern blot analysis, probe preparation and utilization, PCR, primer design, Real-Time PCR, microarray, FISH and DNA sequencing.
Course Fee: $35.00

DG 6601 Advanced Practice II 6 SCH
This is a continuation of DG 6401 Advanced Practice I course. All rules and regulations for completion of the thesis project apply.
Course Fee: $38.11

DG 6701 Advanced Practice II C 7 SCH
This is a continuation of DG 6401 Advanced Practice I course. All rules and regulations for completion of the thesis project apply.
Course Fee: $38.11
Diagnostic Imaging

DI 2200   Introduction to Radiologic Sciences  2 SCH
This course provides a professional overview of the program, including elementary radiation protection and medical terminology. Students are required to complete hands-on laboratory assignments.

DI 2221   Patient Care in Radiologic Sciences  2 SCH
The course presents the student with information about patient care and management in radiology. CPR certification and psychosocial aspects of patient care are also introduced.

DI 2261   Clinical Education I  2 SCH
This course provides the student with clinical experience in radiography. Students must demonstrate ARRT and program competencies.
Course Fee: $35.00

DI 2262   Clinical Education II  2 SCH
This course is a continuation of DI 2261.
Course Fee: $47.00

DI 2301   Principles of Radiographic Exposure I  3 SCH
The student will learn darkroom procedures, theory of radiation production, image production and radiographic equipment. Students are required to complete hands-on laboratory assignments.
Course Fee: $40.00

DI 2331   Radiographic Anatomy & Positioning I  3 SCH
The student is introduced to radiographic anatomy, proper positioning, radiographic protocols and radiographic production in the laboratory. Students are required to complete hands-on laboratory assignments.
Course Fee: $40.00

DI 2332   Radiographic Anatomy & Positioning II  3 SCH
This course is a continuation of DI 2331. Students are required to complete hands-on laboratory assignments.
Course Fee: $38.11

DI 2333   Radiographic Anatomy & Positioning III  3 SCH
This course is a continuation of DI 2332. Students are required to complete hands-on laboratory assignments.

DI 2342   Principles of Radiographic Exposure II  3 SCH
This course continues the study of radiographic imaging, instrumentation, image production and factors affecting image quality. Students are required to complete hands-on laboratory assignments.
Course Fee: $38.11

DI 3100   Capstone: Registry Review  1 SCH
This course presents the student with a review of didactic and clinical applications in radiography.

DI 3235   Radiographic Anatomy and Positioning V  2 SCH
This course is a continuation of DI 3334. Students are required to complete hands-on laboratory assignments.
Course Fee: $38.11

DI 3322   Critical Care in Radiologic Sciences  3 SCH
This course focuses on imaging the trauma patient. Topics include critical care of patients in the imaging department, pathology and patient prognosis.

DI 3334   Radiographic Anatomy & Positioning IV  3 SCH
This course is a continuation of DI 2333. Students are required to complete hands-on laboratory assignments.
Course Fee: $45.00

DI 3343   Digital Imaging & Quality Management in Radiology  3 SCH
This course will instruct the student in the development of a quality management program in Radiology.
Course Fee: $45.00

DI 3345   Directed Readings  1-3 SCH
Directed reading and research, followed by the writing of a report or the creation of a project. SCH are based on size, length and depth of paper or project.

DI 3346   Professional Development Independent Study  1-3 SCH
Attendance of educational sessions at district, state, regional or national conferences. Consent of instructor required. 12 documented contact hours per each (32 CE) credit for a maximum of 3 credits. Repeatable

DI 3360   Clinical Education III  2 SCH
This course is a continuation of DI 2262.
Course Fee: $35.00

DI 3361   Clinical Education IV  3 SCH
This course is a continuation of DI 3360.
Course Fee: $47.00

DI 4201   Radiation Safety and Protection  2 SCH
This course requires the student to demonstrate a detailed understanding of atomic structure, types of ionizing radiation, radiation detection devices, units of measurement, personal and public radiation safety practices and dose limitations from brachytherapy sources and external beam radiation devices. The course identifies radiation regulatory and advisory agencies and the specific requirements of each.

DI 4210   Radiobiology  2 SCH
This course presents the students with cellular, subcellular and tissue biology. The course requires the students to discriminate between types of cellular damage caused by ionizing radiation. Additionally, students are exposed to proliferation kinetics, fractionated radiotherapy, acute and chronic effects of radiation on human cells and body systems, principles of linear energy transfer and relative biologic effectiveness and the impact of radiosensitizers and radioprotectors on patient treatment.
Course Fee: $38.11

DI 4300   Research Techniques in Radiologic Sciences  3 SCH
This course will teach the student the principles and methods of conducting practical research in health care.
Course Fee: $45.00

DI 4301   Research Project  3 SCH
This course will prepare the student to complete a research project.

DI 4304   Sectional Anatomy  3 SCH
This course will provide a review of the gross anatomy of the entire body. Detailed study of gross anatomical structures will be conducted systematically for location, relationship to other structures and function. Structures are located and identified in axial (transverse), sagittal, coronal and orthogonal (oblique) planes. Illustrations and anatomic images will be compared with MR, ultrasound and CT images in the same imaging planes and at the same level when applicable. The characteristic appearance of each anatomical structure as it appears on CT, MR and ultrasound, when applicable, will be stressed.
Course Fee: $45.00
DI 4310  Teaching Strategies in Health Care Education  3 SCH
This course will teach the student how to analyze learning theories with an emphasis on adult learners and the elements of quality education.  
Course Fee: $38.11

DI 4311  Instructional Design  3 SCH
This course will instruct the student in the theory and application of instructional design in health care education and training.

DI 4312  Patient Education  3 SCH
This course will teach the student how to plan, develop and assess patient education products and methods.

DI 4313  Education Internship I  3 SCH
In this course the student applies advanced technical skills as well as concepts in the area of professional elective major.  
Course Fee: $47.00

DI 4314  Education Internship II  3 SCH
This course is a continuation of DI 4313.
Course Fee: $35.00

DI 4315  Issues in Health Care Education  3 SCH
This course will introduce the student to the current trends and issues related to Health Science Education.

DI 4316  Leadership in Radiologic Sciences  3 SCH
This course will prepare the student for technical and professional involvement, defusing emotionally charged situations, coaching, team building, setting and reaching goals.  
Course Fee: $38.11

DI 4317  Staff Development  3 SCH
Topics covered in this course include: building trust, establishing expectations, performance evaluation and reviews, giving constructive criticism and principles of motivation.

DI 4318  Promotional Strategies in Rad Sciences  3 SCH
This course will teach the student how to develop patient, physician and community programs to promote health care services.

DI 4319  Fiscal Analysis in Health Care  3 SCH
This course will provide the student with the skills necessary for managing the financial and technical aspects of radiology and radiation oncology.

DI 4320  Current Trends in Health Care Management  3 SCH
This course will prepare the student to analyze and manage trends in health care management and delivery systems.

DI 4321  Operations Management  3 SCH
This course introduces the student to current practices in billing and reimbursement for health care services.

DI 4322  Effective Human Resources Management  3 SCH
This course will teach the student about staff recruitment, retention techniques and laws related to resource management. Topics include hiring and terminating personnel and issues of harassment and discrimination.  
Course Fee: $38.11

DI 4323  Management Skills for New Supervisors  3 SCH
This course will teach the student about transitioning from a Professional Employee to a Supervisor.

DI 4324  Management Internship I  3 SCH
In this course, the student applies advanced technical skills as well as concepts in the area of professional elective major.  
Course Fee: $47.00

DI 4326  Individual Projects  3 SCH
This course consists of special research projects assigned to the students.

DI 4328  Management Internship II  3 SCH
Course Continuation of DI 4314.  
Course Fee: $50.00

DI 4350  Introduction to CT  3 SCH
This course will teach the student about digital imaging in routine and specialized 2-D and 3-D images, data management and fusion practices.

DI 4351  CT Physics I  3 SCH
Course content will deliver a basic understanding of the physical principles and instrumentation involved in CT. The historical development and evolution of CT will be reviewed. A brief introduction to computer systems will be covered which will include a review of digital image fundamentals and computers in diagnostic imaging. CT image processing will be examined and will include image formation, digitization processing techniques and hardware. CT systems and operations will be studied and will include CT x-ray tube technology; collimators and filters; gantry and detectors, characteristics and function. CT image reconstruction will be studied and will include image reconstruction from projections and reconstruction algorithms. CT image formation, processing and presentation will be included. Content will delve into image manipulation, image quality and factors affecting quality. Radiation safety and patient dose reduction techniques will be introduced.
Course Fee: $50.00
Prerequisites: Admission to the CT or CT/VI program

DI 4352  CT of the Nervous System  3 SCH
Content provides detailed coverage of procedure protocols for CT imaging of the Nervous System. Protocols include, but are not limited to, indications for the procedure, patient education, preparation, orientation and positioning, patient history and assessment, contrast media usage, scout image, selectable scan parameters and archiving of the images. Protocols will be taught for differentiation of specific structures, patient symptomology and pathology. Images studied will be reviewed for quality, anatomy and pathology. Procedure protocols vary from facility to facility and normally are dependent on the preferences of the radiologists. Content provides thorough coverage of common diseases diagnosable via CT. Each disease or trauma process is examined from its description, etiology, associated symptoms and diagnosis with appearance on CT images.
Course Fee: $50.00
Prerequisites: Admission to the CT or CT/VI program

DI 4353  CT Physics II  3 SCH
This advanced course in CT is designed to assist the technologist in understanding the key concepts of advanced scanning techniques, provide an in-depth study of contrast agents used in CT and quality assurance. This course will include the physical principles, instrumentation, image quality considerations, patient dose considerations and clinical applications of the following advanced practices: Mobile CT, Helical CT, Real-time Fluoroscopic CT, 3D CT, CT Angiography, Endoscopy (Virtual) CT, Cardiac CT, Positron Emission CT (PET-CT), Single Photon Emission CT -CT (SPECT-CT) and Functional CT.
Course Fee: $38.11
Prerequisite: DI 4351

Course Descriptions 82
DI 4354 CT of the Chest, Abdomen & Pelvis 3 SCH
The course content provides detailed coverage of procedure protocols for CT imaging of the chest (to include thorax), abdomen and pelvis (male and female). Protocols include, but are not limited to, indications for the procedure, patient education, preparation, orientation and positioning, patient history and assessment, contrast media usage, scout image, selectable scan parameters, filming and archiving of the images. Protocols will be taught for differentiation of specific structures, patient symptomology and pathology. Images studied will be reviewed for quality, anatomy and pathology. Procedure protocols vary from facility to facility and normally are dependent on the preferences of the radiologists. Terms associated with these pathologies will be included.
Course Fee: $38.11
Prerequisite: DI 4304

DI 4355 Special Topics in CT & VI 3 SCH
Advances in Vascular and Nonvascular Interventional techniques and procedures for diagnostic imaging and therapeutic treatment will be discussed. New and emerging equipment and imaging modalities/options will be discussed.
Prerequisite: Admission to the CT or CT/VI Program

DI 4356 CT of the Extremities 3 SCH
Content provides detailed coverage of procedure protocols for CT imaging of the upper and lower extremities. Protocols include, but are not limited to, indications for the procedure, patient education, preparation, orientation and positioning, patient history and assessment, contrast media usage, scout image, selectable scan parameters, filming and archiving of the images. Protocols will be taught for differentiation of specific structures, patient symptomology and pathology. Images studied will be reviewed for quality, anatomy and pathology. Procedure protocols vary from facility to facility and normally are dependent on the preferences of the radiologists. Terms associated with these pathologies will be included.
Course Fee: $38.11

DI 4357 CT Comprehensive Review 3 SCH
Course content will integrate clinical skills and classroom theories in a comprehensive study of CT physics, instrumentation, safety, contrast agents, procedures and quality assurance.

DI 4358 Vascular/Nonvascular Interventional Procedures 3 SCH
Course content is designed to present a systematic approach to the techniques and procedures technologists use in the performance of select vascular and nonvascular interventional procedures.
Course Fee: $38.11
Prerequisite: Admission to the CT or CT/VI program

DI 4359 VI Comprehensive Review 3 SCH
Exam-specific content components that outline the ARRT Registry will be covered. Course content will include equipment and instrumentation, patient care, vascular and interventional procedures to include neurologic, thoracic, abdominal, GI and GI nonvascular, peripheral, dialysis management and venous access.
Course Fee: $38.11

DI 4361 MRI Physics I 3 SCH
Course content introduces the student to the physics and instrumentation of MRI. The historical evolution of MRI is discussed. Students will be presented with the concepts of MRI including components of a system, MR imaging principles and an understanding of basic MR pulse sequences and introduction to MR angiography. Imaging parameters, tissue characteristics and artifact reduction techniques will be presented. Content includes an in-depth study of MRI safety.
Course Fee: $50.00
Prerequisite: Admission to the MRI program

DI 4362 MRI Procedures III 3 SCH
Content is designed to provide students with a review of the anatomy of the central nervous system (brain and spine) and its MR tissue characteristics. The student will review various imaging techniques and the design of specialized receiver coils. Magnetic resonance angiography of brain vasculature will be introduced. Spectroscopy and Functional Imaging of the nervous system will be introduced. Field strength specific optimization of neuro protocols will be covered. Common pathology seen on MR images of the central nervous system will be presented.
Prerequisite: Admission to the MRI program

DI 4363 MRI Physics II 3 SCH
Content covers evaluation of organ function and diagnosis of disease processes using advanced MRI procedures with emphasis on spectroscopy, functional MR, perfusion/diffusion and parallel imaging. Course content will also include an in-depth study of MRI contrast agents and quality assurance in MR imaging, including requirements for ACR accreditation in MRI. An introduction to MRI site planning and administration will be included.
Course Fee: $38.11
Prerequisite: DI 4361

DI 4364 MRI Procedures I 3 SCH
This course will focus on MR imaging and angiography of the extremities that will include a review of the musculoskeletal system anatomy and an understanding of the MR tissue characteristics. Pathology of the musculoskeletal system will be discussed. Differences in anatomy between adult and pediatric patients and how these differences will affect the MR tissue characteristics will be presented. Content will include a review of specialized coils and optimal scanning techniques for use with children and adults, including field strength specific extremity protocol optimization. Differences in pathology and specific pediatric pathology also will be discussed.
Corequisite: DI 4361

DI 4365 Special Topics and Future Directions in MRI 3 SCH
Course content will cover current topics and future directions in MR Imaging: such as interventional MRI including surgery, biopsy and MR-guided minimally invasive treatment delivery. This includes a review of anatomy, pathology and imaging protocols for MRI. Content will include in-depth study of magnet safety, pharmacology, patient care and assessment that will include magnet-related emergencies in relation to MRI. MRI quality assurance as it relates specifically to MRI will be discussed.
Prerequisite: DI 4361
DI 4366  MRI Procedures II  3 SCH
Content is designed to provide students with a review of the anatomy of the thorax, mediastinum, abdomen and the pelvis including the male and female reproductive systems with an understanding of the MR tissue characteristics. The student will review motion suppression techniques, such as respiratory and cardiac triggering and the design of specialized receiver coils. The use of magnetic resonance angiography to visualize the blood vessels will be discussed, as well as field strength specific optimization of body imaging protocols. Pathology of the thorax, mediastinum, abdomen and pelvis as demonstrated through MR imaging will be presented.
Course Fee: $38.11

DI 4367  MRI Comprehensive Review  3 SCH
Course content will integrate clinical skills and classroom theories in a comprehensive capstone of key MRI concepts in physics, instrumentation, safety, contrast agents, procedures and quality assurance.
Course Fee: $50.00
Prerequisites: DI 4361, 4363, 4364, 4366

DI 4390  MRI Internship I  3 SCH
In this course the student applies advanced technical skills as well as concepts in the area of MRI. Students will be introduced to the MR imaging suite, equipment and coils. Students will be familiar with MR imaging procedures with consideration to MR safety, preparation of the exam room, scanner interface, selection of coils, patient care and preparation.
Course Fee: $47.00
Prerequisite: Admission to the MRI program

DI 4391  MRI Internship II  3 SCH
Course continuation of DI 4390
Course Fee: $35.00
Prerequisite: Advisor approval

DI 4392  MRI Internship III  3 SCH
Course continuation of DI 4391.
Course Fee: $50.00
Prerequisite: Admission to the MRI program

DI 4393  CT Internship I  3 SCH
In this course the student applies advanced technical skills as well as concepts in the area of professional elective major. Content is designed to provide an overview of CT use in the clinical setting. Understanding the equipment, protocols, patient care and patient positioning will be studied and practiced as they relate to successful CT imaging. The clinical internship will focus on image critique, sectional anatomy and pathology as seen on images. Internship course progression will be based on competencies completed with the previous internship.
Course Fee: $47.00
Prerequisite: Admission to the CT or CT/VI program and Advisor approval

DI 4394  CT Internship II  3 SCH
Course Continuation of DI 4393.
Course Fee: $35.00
Prerequisite: Advisor approval

DI 4395  CT Internship III  3 SCH
Course Continuation of DI 4394.
Course Fee: $47.00
Prerequisite: Advisor approval
Diagnostic Medical Sonography

**DS 3103 Intro to Vascular Sonography** 1 SCH
Introduction to basic non-invasive vascular theories. Emphasizes image orientation, transducer handling and identification of anatomic structures.

**DS 3201 General Ultrasound** 1 SCH
An introduction to the profession of sonography and the role of the sonographer. Emphasis on medical terminology, ethical/legal aspects, written and verbal communication and professional issues relating to registry, accreditation, professional organizations and history of the profession. 
Course Fee: $45.00

**DS 3211 Clinical Internship I** 2 SCH
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional.
Course Fee: $35.00

**DS 3221 Sonography Physics I** 2 SCH
Basic acoustical physics and acoustical waves in human tissue. Emphasis on ultrasound transmission in soft tissues, attenuation of sound energy, parameters affecting sound transmission and resolution of sound beams.

**DS 3222 Sonography Physics II** 2 SCH
Continuation of Sonography Physics I. Includes interaction of ultrasound with tissues, mechanics of ultrasound production and display, various transducer designs and construction, quality assurance, bioeffects and image artifacts. May introduce methods of Doppler flow analysis.

**DS 3262 Gynecological Pathology** 2 SCH
Detailed study of normal and pathological gynecology as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols.

**DS 3264 Sonography of Superficial Structures** 2 SCH
Detailed study of normal and pathological superficial structures as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols.

**DS 3312 Clinical Internship II** 3 SCH
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional.
Course Fee: $47.00

**DS 3341 Abdominal Ultrasound** 3 SCH
Normal anatomy and physiology of the abdominal and pelvic cavities as related to scanning techniques, transducer selection and scanning protocols 3 credits

**DS 3343 Obstetrics Sonography** 3 SCH
Detailed study of obstetrics as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols.

**DS 3361 Abdominal and Pelvic Pathology** 3 SCH
Pathologies and disease states of the abdomen and pelvis as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols. Emphasizes endocavitary sonographic anatomy and procedures including pregnancy.

**DS 3363 Neurosonology** 3 SCH
Detailed study of the normal and pathological neonatal head structures.

**DS 3371 Sonography Lab I** 3 SCH
Practical application in the lab identifying the sonographic appearances of normal abdominal and pelvic structures small parts or superficial structures; apply the appropriate scanning techniques, transducer selection and scanning protocols. 
Course Fee: $50.00

**DS 3372 Sonography Lab II** 3 SCH
Practical application in the lab identifying the sonographic appearances of normal abdominal and pelvic structures small parts or superficial structures; apply the appropriate scanning techniques, transducer selection and scanning protocols. 
Course Fee: $38.11

**DS 3373 Sonography Lab III** 3 SCH
Practical application in the lab identifying the sonographic appearances of normal abdominal and pelvic structures small parts or superficial structures; apply the appropriate scanning techniques, transducer selection and scanning protocols. 
Course Fee: $35.00

**DS 4100 Registry Review** 1 SCH
Prepare the student for the registry through mock registry. 
Course Fee: $38.11

**DS 4142 Special Topics in DMS** 1 SCH
Topics address recently identified current events, skills, knowledge and/or attitudes and behaviors pertinent to the technology or occupation and relevant to the professional development of the student. This course was designed to be repeated multiple times to improve student proficiency.

**DS 4246 Sonography of Small Parts** 3 SCH
Detailed study of normal and pathology of the breast and muscular skeletal system as related to scanning techniques, patient history and laboratory data, transducer selection and scanning protocols.

**DS 4265 Pediatric Sonography** 2 SCH
Normal and pathological pediatric sonography.

**DS 4302 Principles of Vascular Technology** 3 SCH
Introduction to non-invasive vascular technology modalities. Includes 2D imaging, Doppler, plethysmography and segmental pressures. Emphasis on performing basic venous and arterial imaging and non-imaging exams.

**DS 4303 Advanced Non-Invasive Vascular Technology** 3 SCH
Non-invasive vascular concepts. Includes harmonics, contrast, power Doppler, digital intraoperative, intravascular, abdominal vascular, graft surveillance, vascular interventions and research. Emphasizes extensive review of case studies, technical reporting, preliminary interpretation and registry review.

**DS 4311 Clinical Internship III** 3 SCH
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional.
Course Fee: $47.00

**DS 4312 Clinical Internship IV** 3 SCH
A health-related work-based learning experience that enables the student to apply specialized occupational theory, skills and concepts. Direct supervision is provided by the clinical professional.
Course Fee: $35.00

**DS 4345 Sonography of High Risk Obstetrics** 3 SCH
Maternal disease and fetal abnormalities. Includes scanning techniques, patient history and laboratory data, transducer selection and scanning protocols.
DS 4351  Doppler Ultrasound  3 SCH
Doppler and hemodynamic principles relating to arterial and venous imaging and testing.
Course Fee: $38.11

DS 4374  Sonography Lab IV  3 SCH
Practical application in the lab identifying the sonographic appearances of normal abdominal and pelvic structures small parts or superficial structures; apply the appropriate scanning techniques, transducer selection and scanning protocols.
Course Fee: $50.00

DS 4375  Sonography Lab V  3 SCH
Practical application in the lab identifying the sonographic appearances of normal abdominal and pelvic structures small parts or superficial structures; apply the appropriate scanning techniques, transducer selection and scanning protocols.
Course Fee: $38.11
Genetic Technology

GT 4300  Advanced Medical Genetics  3 SCH
A study of the role of genetics in medicine. This course will allow the students to understand the basic genetic principles and their applications in clinical genetics. This course focuses on applying genetic principle in real clinical situations.

GT 4330  Genetics of Hematology Malignancies  3 SCH
This course is a comprehensive study of the principles and procedures used in the cytogenetic analysis of peripheral blood and bone marrow in the study of malignant processes, especially hematological ones. The course emphasizes the chromosome abnormalities and the affected gene/s occurring in leukemias and lymphomas and their clinical significance.
Health Science

HS 3101 Basic Techniques Lab 1 SCH
An introduction to basic clinical laboratory skills common to all diagnostic programs. Emphasis on laboratory safety, chemical storage, solution preparation, serial dilutions, proper waste disposal, proper use of pipettes and micropipettes, and proper use of balances, centrifuges, vortexes, pH meters and spectrophotometers. Also included in this course are various applications related to other laboratory science disciplines such as basic microscopy, slide preparation and hematological cell identification.
Course Fee: $50.00

HS 3102 Molecular Techniques Lab 1 SCH
This course serves a dual purpose in solidifying the basic laboratory fundamentals before introducing the student to the basic techniques of the molecular lab. First, the student is provided with a practical foundation in proper laboratory safety practices, pipetting, micropipetting, serial dilution and solution preparation before introducing the student to thebasic molecular techniques of genomic DNA extraction, quantitation and gel electrophoresis. Also included in this course are various applications related to other laboratory science disciplines such as basic microscopy, slide preparation, hematological cell identification, as well as an introduction to karyotyping and commercial FISH. Effectively, the student sees a more comprehensive introduction to the basic lab with an emphasis on those bench skills foundational to performing the most basic techniques of the molecular lab.
Course Fee: $38.11

HS 3110 Medical Terminology 1 SCH
This course is an introduction to medical terminology. Emphasis is on word roots, prefixes, suffixes, spelling and analysis of unfamiliar terms. Additional background information on the anatomy that relates to various body systems will be discussed. Included is a review of the principles of mathematics and statistics used in clinical laboratories. Course presentation includes introduction to the operation of a laboratory information system. Course delivery is on-line, interactive, self-paced.

HS 3120 Introduction to Cytogenetics 1 SCH
A detailed study of human G-banded chromosomes. Includes instruction in banding pattern recognition, polymorphic variation, determination of band level and a brief touch on the International System for Human Cytogenetic Nomenclature (ISCN). Includes classroom instruction, hands-on experience and online practice.

HS 3203 Advanced Molecular Techniques 2 SCH
A continuation of the HS3101 Basic Techniques Laboratory I course where basic techniques introduced in the previous course are reinforced and built upon through an objective based approach schema in which students presented with a scenario simulating either the clinical or research molecular lab are required to process samples from receipt to report. At the bench, students learn the effective organizational and technical skills for processing multiple samples for gDNA extraction from a variety of specimen types, DNA quantitation, PCR amplification, gel electrophoresis and proper visualization and documentation of results. There is a greater focus on carrying out experimental objectives in accordance with proper quality assurance and quality control guidelines while placing a stronger emphasis on delivering timely, accurate and reproducible results. Proper documentation habits are adhered throughout the experimental process from sample receipt to final analysis and reporting of experimental results. PCR troubleshooting basics, restriction digestion and restriction mapping, as well as an introduction to molecular cloning. Effectively, the student solidifies a very strong foundation in all the basic techniques of the molecular lab with an introduction to those further applications that will be reinforced and built upon in the Senior Year.
Course Fee: $38.11

HS 3210 Laboratory Mathematics 2 SCH
The basic principles and theory of clinical, biochemical and analytical laboratory math related calculations. It includes basic operations such as problem solving using percentages, rates, ratios, mole ratios, moality, pH, conversions, solving for proportions and more.

HS 3254 Immunohistochemistry 2 SCH
A comprehensive course that deals with the fundamentals of immunohistochemistry as applied to the theory and practical techniques in histopathology. The students acquire basic knowledge of how immunology is applied in the development of immunohistochemistry reagents and techniques. The course provides hands-on experience in performing immunohistochemistry staining procedures using different detection systems to localize and visualize reactions in histological and cytologic preparations. Emphasis will be placed on the clinical significance of diagnostic and prognostic indicators used in immunohistochemistry techniques. Troubleshooting and standardization of reagents are emphasized in this course.
Course Fee: $38.11

HS 3270 Fundamentals of Writing and Critical Thinking 2 SCH
This course is designed to provide health professions students with resources for improving critical thinking skills. The course will introduce basic concepts of critical thinking through integration into interactive case studies, problem based scenarios and project design assignments. The specific objectives of this course coincide with the School of Health Professions’ definition of critical thinking.

HS 3300 Medical Immunology 3 SCH
This course focuses on the basic concepts in immunology and covers general properties of immune responses; cells and tissues of immune system; lymphocyte activation and specificity; effector mechanisms: immunity to microbes; immunodeficiency and AIDS; autoimmune diseases; transplantation. Course delivery is a blend of lecture and on line, self-paced activities.
Course Fee: $38.11
HS 3310  Introduction to Quality Healthcare  3 SCH
This course will provide an overview of the history, development and application of quality concepts. The components of quality management, quality assurance and quality control will be addressed through discussions and assignments on the history of quality, the different approaches to quality, such as Six Sigma and ISO standards and how to define, implement and ensure compliance to the quality assurance and quality control process.

HS 3320  Medical Genetics  3 SCH
This course is a study of the role of genetics in medicine including: Mendelian genetics, multifactorial inheritance, DNA structure, chromosome structure, population genetics, mutation rates, ethnicity of disease and genetic mapping. A comprehensive review of the cell cycle, mitosis and meiosis and pedigree analysis is incorporated as well.
Course Fee: $38.11
Prerequisite: Admission to CGT, CT, HTL or MGT Program

HS 3330  Pathology of Body Fluids  3 SCH
This course is a study of the anatomy and physiology of the kidney and the formation, elimination and composition of urine. Various body fluids (CSF, Synovial, Pleural, Serous, etc.) will be studied and associations made with various disease states. Interpretation of urinary and body fluids elements, chemical assays and the correlation with normal and abnormal physiology: Course delivery is a blend of lecture and on-line, self-paced activities.
Prerequisite: Admission to the CLS, CGT, CT or MGT Program

HS 3333  Statistics  3 SCH
This course provides an introduction to statistical techniques. Emphasis will be placed on probability and probability distributions, sampling and descriptive measures, inference and hypothesis testing, linear regression and analysis of variance.

HS 3340  Research Methods  3 SCH
This research methods course will introduce the basic language and concepts of empirical research with emphasis on the applicability of research methodology in health care.
Students will have the opportunity to learn how to search the peer-reviewed journal databases available to them through the Research Library. They will then critique and review their references, learn how to make an outline and write a literature review on their assigned topic. Curriculum will include a blend of lectures, group work, presentations by guest researchers and development of a group research poster.

HS 4100  Health Care Ethics  1 SCH
This course content is designed to establish a foundation and set parameters of professional practice for health care professionals. The emphasis will be on developing the background for the resolution of ethical dilemmas through ethical reasoning, ethical obligations in health professional-patient relationships and just allocation of scarce health care resources.

HS 4101  Diversity & Cultural Competence  1 SCH
This course is designed to provide each student with a fundamental understanding of the concepts of cultural competency, diversity and inclusion. The course content of each module emphasizes the following seven culturally competent areas of diversity: Building Relationships across Culture; Communication Across Differences; Conflict resolution Across Cultures; Microinequities within the Workplace; Diversity and Inclusion; Abilities: A Journey from Exclusion to Inclusion; Spirituality and health care practices.

HS 4110  Molecular Genetics Technology  1 SCH
The study of clinical laboratory molecular diagnostic procedures utilizing recombinant DNA technology and its application to the many aspects of the clinical laboratory.
Course Fee: $38.11

HS 4111  Medical Law  1 SCH
This course introduces the student to medical law and case studies in health care practice.

HS 4111L  Medical Microbiology Lab  1 SCH
The course utilizes biochemical, morphological and serological techniques to illustrate concepts from the lecture course relating to microbial structure, metabolism, virulence and transmission. Students also receive instruction on proper technique and procedures for a number of different tests, including culturing, staining, carbohydrate utilization, immunoassays and microscopy.
Course Fee: $50.00

HS 4160  Critical Scientific Analysis  1 SCH
Students will analyze current scientific publications for research questions, hypothesis, study design and statistical analysis and the application of proper scientific formats in the clinical laboratory professions. Students will complete pre-session assignments, participate in group discussion and present their group findings.

HS 4161  Seminar in Healthcare  1 SCH
Seminar-based course covering topics in the clinical laboratory sciences.

HS 4170  Special Topics I  1 SCH
A review of the principles of mathematics and statistics used in the clinical laboratories, this course presentation includes an introduction to the selection and operation of a laboratory information system.

HS 4300  Pathophysiology for Health Professions  3 SCH
This course is designed to provide basic knowledge in pathophysiology in preparation for professional studies in the health sciences. Topics covered include central concepts of pathophysiology of the cells and tissues and alterations in organs and systems with an emphasis on carcinogenesis. Appropriate diagnostic and treatment procedures are covered.

HS 4303  Advanced Pathophysiology for Radiation Therapy  3 SCH
This course provides the knowledge in pathophysiology by organ and systems. A focus on diseases and treatment of the radiation therapy patient are emphasized.

HS 4310  Medical Microbiology  3 SCH
This course is the study of the utilization of morphological, biochemical, serological, disease inducing characteristics for microorganism, fungi, mycobacterium and virus identification. Course delivery a blend of lecture and on-line, self-paced activities.

HS 4371  Management and Education  3 SCH
This course covers laboratory management and educational methodologies. It includes management and motivational theories, communication skills, regulatory and accreditation requirements, budget and strategic planning, curriculum design and examination instruction. Course delivery is on-line, interactive, self-paced.
Histotechnology

**HT 4241 Histotechnology Lab Operations I 2 SCH**
In this course, students will study the applications of laboratory operations. This course will review the metric system as utilized and applied to histotechnology. General staining considerations, cytotechnology specimen preparation, decalcification, solution preparations and safety in the laboratory will be emphasized.

**HT 4242 Histotechnology Lab Operations II 2 SCH**
This course is a continuation of HT 4241 with emphasis on the laboratory operations as applied to special staining techniques in the microscopic identification of carbohydrates, lipids, nucleic acids, enzymes, amyloid, pigments and minerals and cytotechnology staining. Students will prepare reagents to use in performing these special staining techniques. Laboratory management principles will also be discussed.
*Course Fee: $38.11*

**HT 4312 Theory & Practice of Histotechniques I 3 SCH**
This course consists of the principles of routine histologic techniques and the basic principles, components and use of instruments in the histopathology laboratory. The students will acquire basic knowledge in the theory of fixation and processing/embedding for routine tissue processing staining. Students will also acquire basic knowledge in the theory and practical application of microtomy, cryosectioning and routine staining. Students will learn to use various chemicals and equipment. Preventive maintenance, troubleshooting and comparison of types of equipment are also discussed. Principles and establishment of quality control methods and maintenance of records are presented. Current federal regulations dealing with accreditation of laboratories and safety procedures are also discussed.

**HT 4390 Histotechnology Capstone Review 3 SCH**
The course is a Capstone review course that will review all aspects of histological techniques inclusive of fixation; processing & embedding; microtomy; cryosectioning; routine, special, enzyme, and IHC staining; solution preparation laboratory math; microscopy; and laboratory management and safety.

**HT 4413 Theory & Practice of Histotechniques II 4 SCH**
The course is a continuation of HT 4312 and consists of the principles of routine histologic techniques and the basic principles, components and use of instruments in the histopathology laboratory. The students will acquire intermediate to advanced knowledge in the theory of fixation and processing/embedding for routine tissue processing. Students will also acquire intermediate to advanced knowledge in the theory and practical application of microtomy, cryosectioning and routine staining. Students will learn to use various chemicals and equipment. Preventive maintenance, troubleshooting and comparison of types of equipment are also discussed. Principles and establishment of quality control methods and maintenance of records are presented. Current federal regulations dealing with accreditation of laboratories and safety procedures are also discussed.

**HT 4444 Theory of Special Stains 4 SCH**
This course studies the theory underlying the principles and techniques of special staining as applied to microscopic identification of connective tissue, muscle, neurological tissues, carbohydrates, lipids, proteins, blood elements, pigments and minerals. The clinical significance of these stains in diagnoses will be discussed.

**HT 4521 Histotechniques Laboratory Rotation I 5 SCH**
This course consists of supervised beginning-level clinical practice in the histopathology student laboratories. Students will rotate through selected areas of the histopathology laboratory to include tissue processing, embedding, microtomy, routine and special staining.
*Course Fee: $50.00*

**HT 4522 Histotechniques Laboratory Rotation II 5 SCH**
This course involves supervised intermediate-level internship at MD Anderson or affiliate site in selected areas of histopathology to include frozen sectioning, tissue processing and embedding, decalcification, transmission electron microscopy, microtomy and routine and special staining.
*Course Fee: $35.00*

**HT 4523 Histotechniques Laboratory Rotation III 5 SCH**
This course involves supervised advanced-level internship at MD Anderson or affiliate site in specialized areas of histopathology including frozen sectioning, special staining, in situ hybridization, microtissue arrays and cytotechnology.
*Course Fee: $35.00*
Medical Dosimetry

MD 3201 Introduction to Radiation Treatment 2 SCH
This course will introduce students to different aspects of radiation treatment including machine parameters, treatment administration and patient care issues.
Course Fee: $35.00

MD 3302 Introduction to Treatment Planning I 3 SCH
This is a lab based course which provides students with the hands on experiences. In this course, junior students will be taught about the treatment planning system and learn the procedures needed to develop radiation treatment plan for different disease sites.
Course Fee: $35.00

MD 3303 Introduction to Treatment Planning II 3 SCH
This course is a continuation of MD 3302. In this course students learn the procedures to develop more complex treatment planning for different disease sites.
Course Fee: $38.11
Prerequisite: MD 3302

MD 3304 Introduction to Clinical Medical Dosimetry 3 SCH
In this course students learn about different aspects of the medical dosimetry profession including treatment planning, image fusion, verification calculation and plan presentation.

MD 4102 Anatomy for Radiation Oncology 1 SCH
This course presents each student with an anatomical study of the human body in topographical, sagittal, transverse and coronal planes. Treatment planning techniques for the body sections are discussed.

MD 4204 Aspects of Radiation Oncology 2 SCH
This course presents the students with various aspects of radiation oncology. Students are presented with different aspects of medical dosimetry practice other than treatment planning, which include electronic charting, treatment error corrections and other professional responsibilities and opportunities.

MD 4210 Radiation Biology 2 SCH
This course presents the students with cellular, subcellular and tissue biology. The course requires the students to discriminate between types of cellular damage caused by ionizing radiation. Additionally, students are exposed to proliferation kinetics, fractionated radiotherapy, acute and chronic effects of radiation on human cells and body systems, principles of linear energy transfer and relative biologic effectiveness and the impact of radiosensitizers and radioprotectors on patient treatment.
Course Fee: $38.11

MD 4300 Intro to Medical Dosimetry 3 SCH
This course is an introduction to medical dosimetry which includes introduction to terms used in radiation oncology, math review, characteristics of radiation used for treatment, SSD and SAD techniques of dose calculation, and verification calculation. Students are assigned to work individually on a case study and present their findings to their peers in the classroom setting.

MD 4301 Medical Dosimetry Physics I 3 SCH
This course teaches basic theories and calculations for radiation oncology including the structure of matter, nuclear transformation, x-ray production and quality, radiation generators, interaction and measurement of ionizing radiation and absorbed dose measurement.

MD 4302 Brachytherapy Dosimetry 3 SCH
This course teaches the physics of brachytherapy including source characteristics, dosimetry systems and dose calculations.

MD 4303 Research in Radiologic Sciences I 3 SCH
This course is an introduction to basic research concepts. Development of a research project begins. Students conduct literature review and construct their introduction and literature review sections of their final paper.
Course Fee: $35.00

MD 4305 Medical Dosimetry Physics II 3 SCH
This course is a continuation of MD 4301 that teaches basic theories and calculations for radiation oncology and includes classical and modern radiation therapy.
Prerequisite: MD 4301

MD 4306 Research in Radiologic Sciences II 3 SCH
This course is a continuation of MD 4303, with projects finalized. Students complete data collection and analysis and construct their final manuscript.
Course Fee: $38.11
Prerequisite: MD 4303

MD 4309 Interstitial & Intracavitary Dosimetry 3 SCH
This course focuses on interstitial and intracavitary brachytherapy such as GYN malignancies, prostate seed implant, eye plaque, accelerated partial breast irradiation and manual and after loading interstitial implants. Patient care in brachytherapy and sterile procedures will also be discussed.
Course Fee: $38.11
Prerequisite: MD 4302.

MD 4313 Clinical Radiation Oncology 3 SCH
This course presents an in-depth study of multidisciplinary treatment of the cancer patient from the clinician's viewpoint. Students are required to master concepts specific to site-specific disease including histopathology, etiologic and epidemiology factors, detection and diagnosis, tumor stage and grade, routes of metastases, dose fractionation and prognostic factors. This course is designed to approach each cancer type by anatomic system, addressing treatment factors with increasing degrees of complexity.
Course Fee: $35.00

MD 4331 Clinical Education I 3 SCH
In this course students are supervised in a clinical practice setting and learn different aspects of advanced medical dosimetry. Students are involved in hands-on activities in the clinical practice setting.
Course Fee: $50.00
Prerequisite: MD 3304

MD 4332 Clinical Education II 3 SCH
In this course students are supervised in a clinical practice setting and learn different aspects of advanced medical dosimetry. Students are involved in hands-on activities in the clinical practice setting.
Course Fee: $50.00
Prerequisite: MD 3304

MD 4333 Clinical Education III 3 SCH
In this course students are supervised in a clinical practice setting and learn different aspects of advanced medical dosimetry. Students are involved in hands-on activities in the clinical practice setting.
Course Fee: $50.00
Prerequisite: MD 3304
MD 4334  Clinical Education IV 3 SCH
In this course students are supervised in a clinical practice setting and learn different aspects of advanced medical dosimetry. Students are involved in hands-on activities in the clinical practice setting.
Course Fee: $50.00
Prerequisite: MD 3304

MD 4335  Internship in Radiation Oncology 3 SCH
In this course students are supervised in a clinical practice setting and learn different aspects of advanced medical dosimetry. Students are involved in hands-on activities in the clinical practice setting.
Course Fee: $50.00
Prerequisite: MD 3304

MD 4401  Radiation Physics 4 SCH
In this course, students will learn about applications of radiation in medicine. Radiation measurement, different types of radiation detectors, late effects of radiation, dose to non-target structures, impact of treatment modifiers, fetal dose consideration, electronic risk following pace maker irradiation and different imaging modalities will be discussed.

MD 4508  External Beam Dosimetry 5 SCH
This is a continuation of MD 4301 and MD 4305 that teaches basic theories and calculations for radiation oncology.
Prerequisites: MD 4301, 4305
Molecular Genetic Technology

MG 4111  Bioinformatics for Clinical Diagnostics Lab  1 SCH
This is the lab course to MG 4200 Bioinformatics for Clinical Diagnostics I course. Students will learn how to access, manage, and analyze biological information using computer applications for purposes such as obtaining biological sequences and performing clinical research and development, assay design, and data analysis.

Course Fee: $45.00

MG 4160  Genetic Technology Journal Club I  1 SCH
Seminar-based course that covers topics in genetics and related fields.

MG 4200  Bioinformatics for Clinical Diagnostics  2 SCH
This course will introduce the students to the clinical applications of information technology and computer-based science. Students will learn how to access, manage and analyze biological information using computer applications for purposes such as obtaining biological sequences and performing clinical research and development, assay design and data analysis.

MG 4211  Molecular Diagnostic Techniques  2 SCH
This course will provide participants with a didactic understanding of laboratory process and procedures. The topics covered may include information related to sample storage and transport requirements for integrity, purpose of reagents and parameters used in molecular applications and theoretical understanding of platform methodologies, data analysis and trouble shooting.

Course Fee: $38.11

MG 4280  Concepts in Molecular Diagnostics  2 SCH
This course focuses on the role of genetics in medicine and related molecular testing methodologies. The course aims to highlight the importance of genetics and its role in disease by providing a link between disease diagnosis, prognosis, prevention and treatment with molecular testing options and applications through case-based analysis. Topics may include diseases or disorders in the areas of oncology, inherited and infectious disease and oncology as well as applications including pharmacogenomics and next generation sequencing.

MG 4281  Advanced Concepts in Molecular Diagnostics  2 SCH
This course is a continuation of both MG 4200 Bioinformatics for Clinical Diagnostics and MG 4280 Concepts in Molecular Diagnostics courses, focusing on the role of genetics in medicine and related bioinformatic methodologies. The course aims to examine in greater detail the role of clinical molecular testing in refining diagnosis, prognosis and treatment decisions by learning and applying bioanalytical tools.

MG 4290  Clinical Disease Applications of Molecular Genetics  2 SCH
Focuses on the specific applications of molecular techniques within a variety of medical disciplines. The disciplines covered may include but not limited to molecular oncology, molecular pre/post-natal testing and molecular infectious disease testing.

MG 4310  Molecular Diagnostic Techniques Laboratory II  3 SCH
This lecture/laboratory course will introduce the student to human identity testing. The course provides an application of skills such as serology, DNA extraction, amplification, quantitation, capillary electrophoresis, fragment analysis and population genetics for forensic DNA analysis and / or paternity testing as well as basic genetic genealogical approaches.

Course Fee: $38.11

MG 4320  Molecular Diagnostic Techniques Laboratory III  3 SCH
This course will provide participants with in-depth understanding of advanced laboratory processes and procedures. The topics covered include a practical and theoretical understanding of platform methodologies including real-time PCR expression analysis, microsatellite instability, methylation-specific PCR, Sanger sequencing and Next Generation sequencing. Data analysis, statistical evaluation and troubleshooting are also covered.

Course Fee: $38.11

MG 4510  Molecular Diagnostic Techniques Laboratory I  5 SCH
The course will provide participants with hands on laboratory experience in: performing molecular techniques such as DNA extraction, purification and quantification; preparing and viewing gel electrophoresis; conducting PCR and Real-Time PCR experiments; and designing primers and performing Sanger sequencing with assay optimization and troubleshooting.

Course Fee: $50.00

MG 4560  Molecular Diagnostics Clinical Rotation I  5 SCH
This clinical laboratory rotation includes the study of molecular diagnostic procedures utilizing recombinant DNA technology and its application to the many aspects of the clinical laboratory. Laboratory experiences include DNA specimen handling and processing, DNA extraction, DNA purification, Southern blot analysis, probe preparation and utilization, PCR, primer design and Real-Time PCR.

Course Fee: $50.00

MG 4570  Molecular Diagnostics Clinical Rotation II  5 SCH
This clinical laboratory rotation is a continuation of MG 4560. This clinical laboratory rotation may include the study of molecular diagnostic procedures utilizing recombinant DNA technology and its application to the many aspects of the clinical laboratory. Laboratory experiences may include DNA specimen handling and processing, DNA extractions, DNA purification, Southern blot analysis, probe preparation and utilization, PCR, primer design and Real-Time PCR.

Course Fee: $50.00
**Mammography**

**MM 4400  Patient Care**  4 SCH  
The content of this course is intended to provide the student with an overall understanding of patient interactions and management. This includes general patient communication regarding the mammographic procedure protocols as well as patient education including guidelines for mammographic screening and patient radiation dose. This course also provides extensive information on patient assessment and breast cancer treatment options including surgical, nonsurgical, and reconstruction options.

**MM 4401  Image Production**  4 SCH  
This course is designed to assist the student in understanding the basic principles of Mammography imaging acquisition and quality assurance. This includes digital acquisition and display, mammographic imaging system characteristics, medical informatics, procedure imaging techniques, and image evaluation. In addition, the content provides detailed information regarding accreditation, certification, and the Mammography Quality Standards Act (MQSA) regulations.

**MM 4402  Procedures**  4 SCH  
This course is designed to teach the student anatomy, physiology, and pathology of the breast. In addition, the content of this course provides comprehensive instruction in mammographic positioning, special needs, and imaging procedures. The course provides the general protocol guidelines as established by the American College of Radiology (ACR). These procedures include both mammography screening and diagnostic imaging examinations as well as special procedures such as breast ultrasound, breast MRI, molecular breast imaging, and interventional procedures.

**MM 4403  Internship**  4 SCH  
This course allows the student to apply all aspects of mammographic imaging while in the clinical setting. This experience enhances the student’s understanding of routine screening and diagnostic mammographic protocols as well as that of special procedures. In addition, clinical rotations allow the student to complete experience requirements set by the American Registry of Radiologic Technologists (ARRT) for those seeking accreditation and certification in this advanced imaging modality.
Radiologic Sciences

RS 5310  Fundamentals of Health Care Systems  3 SCH
The purpose of this course is to provide students with an overview of the U.S. health care structure and components of health services delivery. The course reviews the evolution, structure and current issues in the health care system and examines the unique features of health care as a product including the changing relationships between patients, healthcare professionals, public and private third-party payers, regulators, reimbursement methods and technology. It also reviews legislative reforms, budget debates in the U.S. Congress and the financing of health care programs including the Affordable Care Act, Medicare and Medicaid.

RS 5311  Strategic Management and Business Policy  3 SCH
The purpose of this course is to explore and selectively apply modern concepts of strategic management skills and techniques to simulate various strategic situations. Students explore the role of strategic planning in achieving organizational performance and key concepts in strategic planning, including identifying the relationship of the plan to the organization's mission, values and vision; assessing the competition; identifying external influences and resources; forecasting trends in organization performance and setting goals. Students apply course concepts, including strengths, weaknesses, opportunities and threats (SWOT) analysis as they research and develop components of strategic plan for a specific health care organization. The course also examines how policies in each functional area are integrated into an overall competitive strategy.

RS 5312  Research Methodology  3 SCH
This course provides an opportunity for students to establish or advance their understanding of research through critical exploration of social or clinical issues. Students will develop statistical vocabulary and the elements of the research process within quantitative and qualitative approaches. They will use these theoretical underpinnings to critically review literature relevant to their field of interests.

RS 5313  Legal and Ethical Fundamentals of Healthcare  3 SCH
This class is designed to provide a general introduction to the legal and ethical environment of health services administration. It examines principles and practical applications of the laws that affect the operational decisions of health care providers, payors and administrators. The course focuses on required knowledge of laws and regulations developed by policymakers that impact healthcare organizations. Also examined, are key laws that govern patient care delivery, employee relations, contracts and fraud. Emphasis is placed on legal and regulatory guidelines that administrators must follow as they design and implement policies and practices within the healthcare organizations.

RS 6125  CIIP Examination Review  1 SCH
This course reviews the objectives for the American Board of Imaging Informatics (ABII) examination to become a Certified Imaging Informatics Professional (CIIP) and allows students to become familiar with the ABII and the Society for Imaging Informatics in Medicine (SIIM) and prepare for the ABII CIIP certification examination.

RS 6219  Project Management Internship  2 SCH
This course requires completion of a supervised practical experience related to imaging informatics.

RS 6311  Health Care Financial Management  3 SCH
This course is an introduction to health care finance and description of the current financial environment in which health care organizations function. It explores the basics of financial and managerial accounting and presents concepts that are critical to making thorough financial decisions to improve the cost effectiveness of the organization. Students interpret and analyze the financial statements of a business, use and analyze financial ratios, utilize variance analysis, understand and implement operating and capital budgeting and develop knowledge of the business planning process.

RS 6312  Human Resource Management in Health Professions  3 SCH
The purpose of this course is to provide a foundation of knowledge and skills applicable to the current issues and challenges in health care human resource management. It focuses on developing human resources management and leadership strategies that can be utilized to solve various management and operational issues. These include recruitment and selection of employees, benefits and compensation management, privileging and credentialing of health professionals, performance evaluations, staffing plans, labor relations and labor laws relevant to health care organizations. Students examine the theory and practice of managing individuals and groups through motivation, communication, teamwork, collaboration, leadership, organizational change, negotiation, conflict management and resolution.

RS 6313  Adult Learning and Instruction  3 SCH
This course will discuss the recent research concerning the concept of adult learning and how this can be applied in design and implementation of effective adult instruction. The learning theories, principles and practices of adult learning and how they can be incorporated into adult instruction will also be discussed.
Course Fee: $40.00

RS 6314  Critical Thinking Strategies in Higher Education  3 SCH
This course will provide a foundation of knowledge on theories of critical thinking and how they can be applied in higher education curriculum. Students will learn a variety of critical thinking strategies to incorporate into their lesson plans in order to create an active learning environment for their adult learners.
Course Fee: $40.00

RS 6315  Curriculum Development and Evaluation  3 SCH
This course provides the essential processes of curriculum development in higher education and the evaluation process for its continuous improvement. The course will also discuss the challenges of administering curriculum and the roles of leadership and administration.

RS 6316  Health Resources and Policy Analysis  3 SCH
This course examines factors that affect performance outcomes within healthcare organizations; methods to monitor, adjust and improve performance; techniques and tools of quantitative analysis of operations and decision making. Additional emphasis is also placed on staffing, scheduling, productivity and supply chain and reengineering of work processes using flowcharts. Students explore performance data to identify trends and variation based on current operations and those resulting from changes and improvements.
RS 6317  Thesis  3 SCH
This course provides an opportunity for the students to research a topic related to their area of specialization and present and defend it before their faculty members. As a result of this course, students will enhance their understanding of the topic based on the latest research studies and their own experiences.
Course Fee: $38.11

RS 6318  Health Informatics and Technology Management  3 SCH
This course examines the realm of Health Care Information Systems (HCIS) and provides the student with the opportunity to develop an understanding of basic information technology, clinical and administrative applications of health care information systems. Emphasis is placed on how these platforms make available information that facilitate patient care, improved management of medical records, enhancement of supply inventory management and improve vendor contracting and management. Students also explore Web-based systems for increasing consumer knowledge, confidentiality of information systems, organizational compliance and data sets. Additional topics relating to patient confidentiality are also discussed including HIPAA and electronic health records.

RS 6319  Internship  3 SCH
This course consists of a minimum of two weeks of supervised internship in an area of health care administration or educational leadership. Students will receive academic credit for supervised professional training and experience in an actual work environment. The practicum is an ongoing seminar between the student, faculty and employment supervisor, and requires submission of progress material as established in the Internship Application and Learning Agreement.
Course Fee: $50.00

RS 6320  Revenue Cycle Management and Coding Strategies  3 SCH
This course is designed to provide students the opportunity to understand the basic processes of revenue cycle management and coding strategies in healthcare organizations. The course emphasis will focus primarily in specific areas, such as Radiology, Nursing, Public Health, and Clinical Lab Science.

RS 6321  Image Management and Clinical Engineering  3 SCH
This course focuses on medical imaging informatics management, including the requirements and ergonomics of a viewing room, workflow processes, quality control, import and export of images in PACs and support for imaging modalities.

RS 6322  Systems Management  3 SCH
This course details the requirements for an optimal, cost-effective system capacity, including disaster plan recovery and business continuity strategies, data migration procedures, security and privacy maintenance and user feedback mechanisms.

RS 6324  Procurement and Operations  3 SCH
This course explores procuring a system and implementing policies and procedures, including conducting a needs assessment, selecting a vendor, negotiating contracts with vendors and ensuring compliance with federal regulations.

RS 6330  Accreditation of Radiologic Science Educational Programs  3 SCH
This course provides a comprehensive overview of programmatic accreditation of radiologic science educational programs, including the purpose of accreditation, standards for quality learning and student outcomes/assessment plans.
Radiation Therapy

RT 3101  Simulation and Treatment Techniques I  1 SCH
This course is taught in the clinical and virtual settings. Students are required to demonstrate accurate simulation and/or treatment set-up procedures and patient immobilization for basic to intermediate radiation therapy treatment protocols. Course Fee: $38.00

RT 3103  Simulation and Treatment Techniques II  1 SCH
Continuation of RT 3101. This course is taught in the clinical and virtual settings. Students are required to demonstrate accurate simulation and/or treatment set-up procedures for intermediate to advanced radiation therapy treatment protocols.

RT 3220  Clinical Education I  2 SCH
This course provides supervised clinical education in which students are assigned to a specific patient. The student will observe the patient from consultation through treatment. Students are required to present in a formal setting the educational findings related to their patient’s treatment regimen. Students must demonstrate competency in block fabrication, patient immobilization, patient transfer techniques, bolus, vital signs and basic patient care. Students are assigned a mentor for the development of a master-apprentice relationship. Course Fee: $47.00

RT 3221  Clinical Education II  2 SCH
Continuation of RT 3220. Course Fee: $35.00
Prerequisite: RT 3220

RT 3222  Clinical Education III  2 SCH
Continuation of RT 3221. Course Fee: $50.00
Prerequisite: RT 3221

RT 3345  Directed Readings  1-3 SCH
Directed reading and research, followed by the writing of a report or the creation of a project. SCH are based on size, length and depth of paper or project.

RT 4101  Radiation Safety & Protection  1 SCH
This course requires the student to demonstrate a detailed understanding of atomic structure, types of ionizing radiation, radiation detection devices, units of measurement, personal and public radiation safety practices and doses of external beam radiation devices. The course identifies radiation regulatory and advisory agencies and the specific requirements of each.

RT 4156  Individual Projects  1 SCH
This course is designed to provide a review of knowledge in clinical oncology in preparation for the registry examination. Topics cover the concepts of various cancers, staging and treatment techniques. Appropriate diagnostic and treatment procedures are also covered. Students are required to design, develop and present specific individualized projects.

RT 4199  Special Projects in Radiation Therapy  1 SCH
This course is designed for individual projects, research, special seminars, or further investigation of topics in radiation oncology.

RT 4210  Radiobiology  2 SCH
This course presents the students with cellular, subcellular and tissue biology. The course requires the students to discriminate between types of cellular damage caused by ionizing radiation. Additionally, students are exposed to proliferation kinetics, fractionated radiotherapy, acute and chronic effects of radiation on human cells and body systems, principles of linear energy transfer and relative biologic effectiveness and the impact of radiosensitizers and radioprotectors on patient treatment.

RT 4295  Capstone  2 SCH
This course is capstone preparation for national certification and licensure.

RT 4302  Anatomy for Radiation Oncology  3 SCH
This course addresses the anatomical study of the human body in topographical, sagittal, transverse and coronal planes.

RT 4305  Patient Care in Radiation Oncology  3 SCH
The focus of this course is providing the student with advanced skills in oncologic patient care and assessment. Students are required to demonstrate, under varying patient conditions, physical and psychological assessment, cause and effect of clinical laboratory values, management of oncologic emergencies and treatment regimens of radiation induced site-specific treatment side effects. This course contains a laboratory component. Course Fee: $38.00

RT 4306  Technical Radiation Oncology  3 SCH
Students master basic concepts of radiation therapy and the technical aspects of radiation oncology, including custom block, mold and immobilization fabrication, intensity modulated radiation therapy, stereotactic radiosurgery, intraoperative radiotherapy and brachytherapy. Principles of surgery and oncology are presented. Students are required to participate in hands-on simulation laboratory activities. A detailed study is presented of the operation and function of radiotherapeutic equipment to include linear accelerators, cobalt units, superficial and orthovoltage units. Students are required to identify equipment faults and the appropriate responses to clearing faults.

RT 4309  Special Applications in Radiation Oncology  3 SCH
This course presents principles of advanced practice, such as fusion imaging, respiratory gating and stereotactic radiosurgery, as well as current advancements in treatment techniques.

RT 4310  Radiation Therapy Physics  3 SCH
This course reviews atomic structure, interactions with matter and inverse square law. Equivalent Square and interpolation of data are introduced. Acquisition of radiation beam data, parameters required in accurate dose calculation, the effects of wedges, blocking, filters and beam configuration are discussed. Students are required to demonstrate accurate dose calculations for various beam configurations.
RT 4311  Radiation Therapy Treatment Planning and Dosimetry  3 SCH
This course stresses the application of brachytherapy calculative techniques, evaluation of distributions to calculate implant duration, analysis of emerging technology and terminology as they relate to current practice, comparing and contrasting hand calculations and combinations to computer output and applying formula calculations to advanced and complex treatment problems. Specific disease and site-specific concepts of treatment planning and medical dosimetry are presented. Students demonstrate their understanding of external photon and electron beam treatment planning in the production and analysis of treatment plans for head and neck, central nervous system, thoracic, breast, abdominal and pelvic tumors.
Prerequisite: RT 4310

RT 4312  Quality Management in Radiation Therapy  3 SCH
This course is an in-depth study of quality management and quality assurance components in radiation oncology. Students are required to demonstrate the knowledge and skills to develop a quality management program that includes allocation of human and physical resources; quality assurance and acceptance testing of linear accelerators, simulators and brachytherapy sources; patient and personnel protection policies; and patient and professional satisfaction. Data collection and analysis of quality indicators are required. Students are required to complete a hands-on laboratory component.

RT 4314  Clinical Radiation Oncology  3 SCH
This course presents an in-depth study of multidisciplinary treatment of the cancer patient from the clinician’s viewpoint. Students are required to master concepts specific to site-specific disease including histopathology, etiologic and epidemiology factors, detection and diagnosis, tumor stage and grade, routes of metastases, dose fractionation and prognostic factors. This course is designed to approach each cancer type by anatomic system, addressing treatment factors with increasing degrees of complexity.
Course Fee: $35.00

RT 4320  Clinical Education IV  3 SCH
This course provides supervised clinical education in which students are required to demonstrate ARRT competency in treatment planning and delivery, quality assurance, patient care, block and mold fabrication, brachytherapy procedures along with advanced program competencies and professional growth. Students are assigned a mentor for the development of a master-apprentice relationship.
Course Fee: $47.00

RT 4321  Clinical Education V  3 SCH
This course provides supervised clinical education in which students are required to demonstrate ARRT competency in treatment planning and delivery, quality assurance, patient care, block and mold fabrication, brachytherapy procedures along with advanced program competencies and professional growth. Students are assigned a mentor for the development of a master-apprentice relationship.
Course Fee: $35.00
Prerequisite: RT 4320

RT 4322  Clinical Education VI  3 SCH
This course is a continuation of RT 4321. Students are assigned a mentor for the development of a master-apprentice relationship and will be responsible for a demonstration of final competency.
Course Fee: $50.00
Prerequisite: RT 4321

RT 4340  Independent Research Project  1-3 SCH
This course is designed to allow students to have the opportunity to conduct independent research activities with guidance from their faculty advisor. Students are required to submit a formal proposal for review and approval of the program faculty.
Repeatable up to 3 times

RT 4345  Literature Review  1-3 SCH
Directed reading and research, followed by the writing of a report or the creation of a project. SCH are based on size, length and depth of paper or project.
Repeatable up to 3 times

RT 4346  Professional Development  1-3 SCH
Attendance of educational sessions at district, state, regional or national conferences and/or attend specifically enhanced clinical education sessions to improve clinical skills and/or demonstrate continued competency. Twelve documented contact hours per SCH for a maximum of 3 SCH.
Repeatable up to 3 times

RT 4355  Seminar Independent Study  1-3 SCH
This course is designed to provide a review of knowledge in clinical oncology in preparation for the registry examination. Topics cover the concepts of various cancers, staging and treatment techniques. Appropriate diagnostic and treatment procedures are also covered. Students are required to design, develop and present specific individualized projects.
Repeatable up to 3 times

RT 4390  Adaptive Radiation Therapy  3 SCH
Students will demonstrate problem-solving and critical thinking skills related to the verification of treatment accuracy using various imaged guided techniques. Situations presented will require technical and professional judgment as they relate to accuracy of patient treatment.
Course Fee: $38.11
Faculty

Hady Abdin, M.D., RPVI, RDMS, RVT
Assistant Professor
Program Director, Diagnostic Medical Sonography
M.D. Medicine, Cairo University Faculty of Medicine, Egypt

Mark A. Bailey, M.A., HTL(ASCP)CM HT
Associate Professor
Program Director, Histotechnology
M.A. Education and Humanities, Texas A&M University

Sandra John, Ph.D.
Assistant Professor
Program Director, Medical Dosimetry
Ph.D. Higher Education Administration, University of Phoenix

Jamie Baker, Ph.D., CMD
Associate Professor
Associate Program Director, Medical Dosimetry
Ph.D. Higher Education Administration, University of Phoenix

Catherine Bammert, Ph.D., CT, MB(ASCP)CM
Assistant Professor
Program Director, Cytotechnology
Ph.D. Biological Sciences, Michigan Technological University

Suzieann Bass, Ed.D., R.T.(R)(ARRT)
Associate Professor
Associate Program Director, Diagnostic Imaging Radiography, Education and Management
Ed.D. Higher Education Leadership, Northcentral University

Associate Professor
Program Director, Radiation Therapy
Ed.D. Educational Leadership in Health Sciences, University of Houston

Kevin Clark, Ed.D., R.T.(R)(QM)(ARRT), FAEIIRS, FASRT
Associate Professor
Associate Graduate Program Director, Radiologic Sciences
Ed.D. Educational Leadership and Management, Capella University

Mary Coolbaugh-Murphy, Ph.D., MB(ASCP)CM
Assistant Professor
Program Director, Junior Year Laboratory Sciences Program
Ph.D. Human and Molecular Genetics, The University of Texas MD Anderson UTHealth Graduate School

Mahsa Dehghanpour, Ed.D., CMD
Professor
Program Director, Medical Dosimetry
Ed.D. Curriculum and Instruction, University of Houston

Anca Fumurescu, M.D., RDMS, RVT, RDCS
Instructor, Diagnostic Medical Sonography
M.D. Medicine, Iuliu Hatieganu University of Medicine and Pharmacy, Cluj-Napoca, Romania

Brandy Greenhill, Dr.P.H., MLS(ASCP)CM
Professor
Program Director, Clinical Laboratory Science
Dr.P.H. Environmental and Occupational Health Sciences, University of Texas School of Public Health

Jun Gu, M.D., Ph.D., CG(ASCP)CM
Professor
Program Director, Cytogenetic Technology
M.D., Zhejiang University
Ph.D. Health Care Management, Trident University International

Peter Hu, Ph.D., MLS(ASCP)CM CGCM MBCM, FACS, FASAHP
Associate Dean, Research and Strategic Initiatives
Professor
Program Director, Molecular Genetic Technology
Program Director, Diagnostic Genetics and Genomics
Ph.D. Health Sciences: Health Care Management, Trident University International

Assistant Professor
Associate Program Director, Radiation Therapy
M.Ed. Educational Technology, University of Texas Rio Grande Valley

Awdhesh Kalia, Ph.D., MB(ASCP)CM, FACSc
Professor
Associate Graduate Program Director, Diagnostic Genetics and Genomics
Ph.D. Microbiology, All India Institute of Medical Sciences

Susan K. Lee, Ph.D., R.N., CNE, CPXP, FAAN
Associate Professor
Associate Program Director, Health Care Disparities, Diversity and Advocacy
Ph.D. Nursing Science, Texas Woman's University

Toysha Mayer, D.H.Sc., HT(ASCP)
Assistant Professor
Associate Program Director, Histotechnology
D.H.Sc., Nova Southeastern University

Vibhuti Srivastava, Ph.D., MB(ASCP)CM
Assistant Professor
Associate Program Director, Molecular Genetic Technology
Ph.D. Human Genetics, University of Delhi, India

Claudia Tamara, D.D.S., R.T.(CT)(N)(ARRT), CNMT
Assistant Professor
Associate Program Director, Diagnostic Imaging CT, CT/VI and M

MD Anderson Institutional Policies

ACA0019: The University of Texas MD Anderson Cancer Center School of Health Professions Student Travel Safety Policy

**Purpose**

The purpose of this policy is to set forth special rules outlined by the Board of Regents of The University of Texas System (Regents' Rule 50601) and Texas Education Code, Sec. 51.950, to inform The University of Texas MD Anderson Cancer Center (MD Anderson) Students and employees who participate in certain Student travel activities of important safety rules.

**Policy Statement**

MD Anderson supports the educational, research, and service activities of its Students by organizing and sponsoring certain approved travel activities. It is the policy of MD Anderson to promote safe travel practices for Students.

**Scope**

This policy covers Student travel undertaken by one or more Students to reach an activity or event that meets all of the following criteria:

a. The activity or event is organized and sponsored by MD Anderson or The University of Texas System.

b. The activity or event is located more than 25 miles from MD Anderson.

c. Travel to the activity or event is funded in part by MD Anderson or the University of Texas System, OR travel is required by a Student organization registered at MD Anderson (if the Student organization has received prior approval by the appropriate institutional officer).

d. Approved activities as designated by the Program Director, Administrator, or Dean within the purview of educational activities or requirements.

Compliance with this policy is the responsibility of all faculty, trainees/Students, and other members of MD Anderson’s workforce.

For policy information about approval of travel activities and reimbursements for travel expenditures, please consult with MD Anderson’s Department of Travel Management Services.

**Target Audience**

The target audience for this policy includes, but is not limited to, any Students undertaking travel to reach an activity or event that falls within the Scope of this policy.

**Definitions**

**Organized and Sponsored Activities or Events:** Those activities or events that have been planned and funded by MD Anderson and approved by the designated administrator.

**Students:** Those Students currently enrolled in a program offered by The University of Texas MD Anderson Cancer Center School of Health Professions.

**Procedure**

1.0 **Students**

Students must comply with the following guidelines established in the University of Texas Board of Regents Regents’ Rule 50601, Sec. 4.
1.1 Seat Belts
Occupants of motor vehicles shall use seat belts or other approved safety restraint devices required by law or regulation at all times when the vehicle is in operation.

1.2 Alcohol and Illegal Substances
Occupants of motor vehicles shall not consume, possess, or transport any alcoholic beverages or illegal substances.

1.3 Passenger Capacity
The total number of passengers in any vehicle at any time it is in operation shall not exceed the manufacturer’s recommended capacity or the number specified in applicable federal or State law or regulations, or applicable UT System policy, whichever is lower.

1.4 License and Training
Each operator of a motor vehicle shall have a valid operator’s license and be trained as required by law to drive the vehicle that will be used, and comply with applicable requirements of The University of Texas Systemwide Policy (UTS) 157 https://www.utsystem.edu/node/9951, Automobile Insurance Coverage for Officers and Employees and General Requirements for the Use of Vehicles.

1.5 Insurance, Inspection, and Safety Devices
Each motor vehicle must have a current proof of liability insurance card and State inspection certification, be equipped with all safety devices or equipment required by federal or State law or regulation, and comply with all other applicable requirements of federal or State law or regulations and any applicable UT System policy.

1.6 Legal Operation
Operators of motor vehicles shall comply with all laws, regulations, and posted signs regarding speed and traffic control and shall not operate the vehicle for a continuous period that is longer than the maximum provided by guidelines promulgated by federal or State law or regulations or guidelines promulgated by the institution, whichever is lower, without scheduled rest stops or overnight stops.

1.7 Service and Maintenance
Each vehicle owned or leased by an institution must be subject to scheduled periodic service and maintenance by qualified persons and comply with all applicable requirements of any UT System policy.

1.8 Operators of Vehicle
All operators of vehicles owned or leased by an institution shall be employees of the institution and shall have a valid operator's license for the operation of the particular vehicle. In addition, operators of vehicles owned or leased by an institution shall only be operated by persons authorized to operate such vehicles in accordance with any UT System policy.

1.9 Rented Vehicles
Each institution shall adopt rules concerning the use of rental vehicles for travel covered by this Policy. The rules shall comply, where applicable, with the State contracts for rental cars and all applicable requirements of any UT System policy.

1.10 Common Carrier
When a common carrier is used for Student travel covered by this policy, each institution shall take reasonable steps to assure the travel is undertaken in conformance with this Policy.

2.0 Check request and documentation
All travel reimbursement must comply with all applicable institutional policies and the guidelines as provided in Management and Expenditure of Endowment Funds Policy (MD Anderson Institutional Policy #ADM1210) and be submitted through the Institution’s travel request and management system and documentation of
reimbursement should be maintained in the dean’s office. Student expenses are to be catalogued from year to year. Examples include:

2.1 Scheduling and Approval of flights or rental vehicles must be submitted for review in the Institution’s travel request and management system.

2.2 Taxi expenses are reimbursed with receipts (out of town expenses).

2.3 Students must provide receipts for all travel related expenses.

2.4 If Student travel is related to the UT System Student Advisory Council (SAC) meetings in Austin, Texas the following rules are applicable.
   A. UT System covers only one night of lodging per meeting at the state rate, unless prior approval has been given by the Dean.
   B. UT System will not cover the added expense of the higher cost of a hotel room if the Student did not make reservations before the cut-off date.
   C. UT System provides all meals for SAC – no additional meal expenses are covered.
   D. UT System has limited parking and limits public transportation reimbursements to the least expensive alternative. We strongly encourage each Student to continue that practice in order to keep travel costs down. This also applies for airfare.

3.0 Reimbursable expenses

3.1 Personal car – mileage only

3.2 Rental car – gasoline only

3.3 Rental car - State Rate

3.4 Airline baggage fees (if acceptable per MD Anderson policy)

3.5 Hotel Notes: If two or more Students stay in the same room, both Students name should appear on the invoice for payment.

3.6 Airfare: State Rate

3.7 Hotel: State Rate

3.8 Parking: Hotel/ Airport (if acceptable per MD Anderson policy)

3.9 Transportation: Taxi / Shuttle

3.10 Reimbursement process:
   A. All reimbursements are processed as soon as the Student submits the appropriate documentation and receipts for all acceptable expenses (per the regulations of the University of Texas MD Anderson Cancer Center and the UT System Rules).
   B. This documentation must be submitted to the Dean’s office within 72 hours of the return from travel.

4.0 Release of Liability

Students who are traveling to a destination outside the campus should review and sign a SHP Student Travel Release of Liability Form available in the Dean's Office. The completed and signed document should be returned to the Office of the Dean prior to undertaking the travel.

ACA1222: Student Rights Under the Family Educational Rights and Privacy Act (FERPA)

Purpose

This policy sets standards to protect the privacy and records access rights that apply to records maintained by or for The University of Texas MD Anderson Cancer Center (MD Anderson) about its current and former Students by complying with the Family Educational Rights and Privacy Act (FERPA) at all times.

Policy Statement

It is the policy of MD Anderson to protect the privacy and records access rights that apply to records maintained by or for MD Anderson about its current and former Students by complying with FERPA at all times.

FERPA, 20 U.S.C. §1232g, and 34 C.F.R. Part 99 provide Students with the following rights with respect to their Education Records:

- Inspect and review the Student’s Education Records;
- Consent to disclosure of the Student’s Education Records to third parties, except to the extent that FERPA authorizes disclosure without Consent;
- Request amendment of the Student’s Education Records to ensure that they are not inaccurate or misleading, or otherwise in violation of the Student’s privacy rights under FERPA;
- Be notified of the Student’s privacy rights under FERPA; and
- File a complaint with the U.S. Department of Education concerning alleged failures by MD Anderson to comply with the requirements of FERPA.

In accordance with the statute, the rights granted under FERPA and this policy may be exercised by:

- A Student who is 18 years of age or older,
- A Student attending MD Anderson’s School of Health Professions, or
- A parent or legal guardian of a Student who is under 18 years of age.

Scope

Compliance with this policy is the responsibility of all faculty, trainees, Students, and other members of MD Anderson’s workforce.

Target Audience

The target audience for this policy includes but is not limited to all faculty, trainees, Students, and other members of MD Anderson’s workforce.

Definitions

Annual Notice: The notices that MD Anderson must provide at least annually to each Student in attendance at MD Anderson of their rights under FERPA and the procedures for exercising their rights; information about the Directory Information Exception; and the process by which a Student may elect to opt out of the release of the Student’s Directory Information. See Appendix A - Notice of Student Rights Under FERPA and Notice Concerning Directory Information (Attachment #ATT1954).

Consent: Written or electronic Consent, signed by the Student (or an authorized parent or guardian) or otherwise verified by the Student (or an authorized parent or guardian) if electronic, that is dated and describes the specific records to be disclosed, the party or class of parties to whom the records are to be disclosed, and the purpose of the disclosure.
**De-identified Record:** An Education Record that has been stripped of all Personally Identifiable Information and/or aggregated such that MD Anderson has reasonably determined the Student’s identity is not personally identifiable whether through single or multiple releases and taking into account other reasonably available information. An Education Record that has been de-identified is no longer an Education Record and is not subject to this policy or FERPA.

**Directory Information:** Information in a Student’s Education Records that would not generally be considered harmful or an invasion of privacy if disclosed. The following information about a Student has been designated by MD Anderson as Directory Information:

- Name
- Local and permanent postal addresses
- Email address
- Telephone number
- Place of birth
- Field of study
- Dates of attendance
- Enrollment status (*e.g.*, full-time or part-time)
- Student classification
- Degrees awarded
- Certificates and awards (including scholarships) received
- Photographs
- Participation in officially recognized activities
- Most recent previous educational agency or institution attended

**Education Records:** Records directly related to a Student that are maintained by or on behalf of MD Anderson. Education Records do not include:

- Records of instructional, administrative, and educational personnel that are in the sole possession of the maker (*e.g.*, file notes of conversations); are used only as a personal memory aid; and are not accessible or revealed to any individual except, in the case of an instructor, a temporary substitute
- Law enforcement records of The University of Texas Police Department at Houston (UT Police)
- Medical records and mental health records, including counseling records created, maintained, and used only in connection with the provision of medical treatment or mental health treatment or counseling to the Student, that are not disclosed to anyone other than the treatment facility
- Employment records unrelated to the Student’s status as a Student
- Records created or received by MD Anderson after an individual is no longer a Student in attendance, and that are not directly related to the individual’s attendance as a Student.
- Grades on peer-graded papers before they are collected and recorded by an instructor
- De-identified records, *i.e.*, Education Records that have been stripped of all Personally Identifiable Information and/or aggregated such that MD Anderson has reasonably determined the Student’s identity is not personally identifiable whether through single or multiple releases, and taking into account other reasonably available information. An Education Records that has been de-identified is no longer an Education Records and is not subject to this policy or FERPA.
MD Anderson Official with a Legitimate Educational Interest: Any person employed by MD Anderson in an administrative, supervisory, academic, or support staff position, including law enforcement unit and health staff; a person or company with whom MD Anderson has a contract or affiliation (such as a University of Texas System (UT System); an attorney or auditor; a clinical facility where a Student is participating in an internship or clinical rotation); the UT System Board of Regents; a person employed by UT System Administration; or a person assisting another MD Anderson official in performing their tasks (such as a volunteer or committee member), if that person or contractor requires access to an Education Records in order to fulfill their official responsibilities on behalf of MD Anderson.

Personally Identifiable Information: Information obtained from or contained in an Education Records that, alone or in combination, permits the requestor or a reasonable person in the school community who does not have personal knowledge of the relevant circumstances to identify a Student with reasonable certainty. This includes but is not limited to the Student’s name; the name of the Student’s parent or family members; personal identifiers such as the Student’s Social Security number, Student number, or biometric record; and other indirect identifiers such as the Student’s date of birth, place of birth, and mother’s maiden name. Unless the context of this policy indicates otherwise, a reference to an Education Records includes Personally Identifiable Information contained in or obtained from an Education Records.

Student: An individual, regardless of age, who is or who has been in attendance at MD Anderson and regarding whom the institution maintains Education Records. It does not include persons who have been admitted but did not attend MD Anderson. For the purposes of this policy, attendance includes attendance in person, by correspondence, online, or distance learning, and the period during which a person is working in a position that requires Student status, such as a work-study program position. Student includes individuals attending MD Anderson’s School of Health Profession (SHP) or participating in the Pediatric Education and Creative Arts Program (School Program).

Procedure

1.0 Notice of Rights under FERPA

MD Anderson shall provide Annual Notice to each Student of their rights under FERPA and this policy by publishing the information in Appendix A - Notice of Student Rights Under FERPA and Notice Concerning Directory Information (Attachment #ATT1954) in all general information Student catalogues published by MD Anderson.

2.0 Consent Requirements for Access to Education Records by Third-Parties

2.1 General Requirements for Disclosures of Education Records:

MD Anderson will not disclose Education Records or Personally Identifiable Information from an Education Records to a third party without prior Consent of the Student, except as authorized by FERPA and/or this policy.

2.2 Exceptions to the Consent Requirement:

MD Anderson, pursuant to FERPA, will release Education Records without the Student’s Consent as follows:

A. Directory Information:

Directory Information may appear in public documents and may otherwise be disclosed without Student Consent unless a Student submits a written request to withhold such information from disclosure, as applicable or as otherwise designated by MD Anderson in the Annual Notice as follows:

- For SHP Students, to the UTHealth Houston Registrar during the first 12 days of class of a fall, spring, or summer semester, or
- For School Program Students, to the manager of the program within the first 12 days of class from when the Student first attends class.

The Annual Notice required by Section 1.0 of this policy and attached as Appendix A - Notice of Student Rights Under FERPA and Notice Concerning Directory Information (Attachment #ATT1954) provides specific information for Students wishing to exercise their right to have Directory Information about them withheld from release by MD Anderson. Upon graduation or termination of a Student’s enrollment for any reason, the release of the Student’s Directory Information will be governed by the Student’s Directory Information status in place during the Student’s last period of enrollment, unless the former Student changes that status.
B. MD Anderson Officials with a Legitimate Educational Interest in an Education Records are allowed access to that Education Records:

- Intra-institutional disclosures may be made to other school officials within MD Anderson whom MD Anderson has determined to have legitimate educational interests.
- A contractor, consultant, volunteer, or other party to whom MD Anderson has outsourced institutional services or functions may be considered an MD Anderson Official with a Legitimate Educational Interest under certain circumstances, as set forth in 34 C.F.R. Part 99.31(a)(1)(B).
- MD Anderson will use reasonable methods to ensure that MD Anderson school officials obtain access to only those Education Records in which they have legitimate educational interests.

C. Other Institutions:

- MD Anderson may release a Student’s Education Records to officials of other educational institutions in which that Student seeks or intends to enroll, or where the Student is already enrolled, if the disclosure is for purposes related to the Student’s enrollment or transfer. This includes disclosures related to joint programs or activities. For example, an Education Records about a Student concurrently enrolled in MD Anderson and another institution, or who receives services from MD Anderson (such as the provision of a distance education class) and from another institution, may be disclosed by MD Anderson to the other institution under this subsection. This includes services provided by MD Anderson and institutions participating in distance education classes.
- When an Education Records is disclosed under this subsection, MD Anderson shall, upon request of the Student, provide the Student a copy of the disclosed Education Records and give the Student an opportunity for a hearing under Section 5.0 of this policy.

D. Audit or Evaluation of Federal or State Education Programs:

The University of Texas Board of Regents, authorized representatives of the Comptroller General of the United States, the Attorney General of the United States, the Secretary of Education, and state and local educational authorities who are authorized by law to audit and evaluate a Federal or State supported education program, or to enforce Federal law which relates to such education programs, or their authorized representatives, may access an Education Records as required for audit, evaluation, or enforcement purposes.

E. Financial Aid:

MD Anderson may release an Education Records to persons or organizations in connection with that Student’s application for or receipt of financial aid, to the extent necessary for such purposes as determining eligibility, amount, conditions, and enforcement of terms or conditions of such financial aid.

F. State and Local Officials Pursuant to Statutes Concerning Juvenile Justice:

MD Anderson may release Education Records to State and local officials or authorities to whom this information is specifically allowed to be reported or disclosed, pursuant to State statute adopted before Nov. 19, 1974, if the allowed reporting or disclosure concerns the juvenile justice system and the system’s ability to effectively serve the Student whose records are released; and if pursuant to State statute adopted after Nov. 19, 1974, the officials and authorities to whom the records are disclosed certify in writing that the information will not be disclosed to any other party, except as provided under State law, without prior written Consent of the Student.

G. Organizations Conducting Studies:

Organizations conducting studies for or on behalf of MD Anderson for the purpose of developing, validating, or administering predictive tests; administering Student aid programs; and improving instruction may access Education Records for such studies provided that the study is conducted in a manner that will not permit the personal identification of Students and/or their parents by individuals other than representatives of the organization with legitimate interests; the information will be destroyed when no longer needed for the purposes for which the study was conducted; and MD Anderson enters into a written agreement with the organization that complies with the requirements set forth in 34 C.F.R.
**Part 99.31(a)(6)(iii).** The term “organization” includes but is not limited to Federal, State, and local agencies, and independent organizations.

H. Accrediting Organizations:

Accrediting organizations may access an Education Records required to carry out their accrediting functions.

I. Designated Parents of a Tax Dependent:

A parent of a Student who is a dependent for Federal tax purposes, as defined by Section 152 of the Internal Revenue Code of 1986, if the Student has indicated in writing to MD Anderson that their parents may access the Student’s Education Records in accordance with the designation. If a tax dependent Student’s parents are divorced, both parents may have access to the Student’s Education Records if at least one parent is designated by the Student, and MD Anderson has not been provided with evidence that there is a court order, State statute, or legally binding document that specifically revokes these rights.

J. Judicial Order or Subpoena:

A Student’s Education Records may be released in response to a judicial order or lawfully issued subpoena. However, MD Anderson will make reasonable efforts to notify the Student of an order or subpoena before complying with it, except that MD Anderson will not notify a Student of a subpoena if it is from a Federal grand jury or is issued for law enforcement purposes, and the subpoena or order provides that MD Anderson may not disclose the existence or contents of the subpoena or any information furnished in response to the subpoena. In addition, Education Records may be disclosed to the U.S. Attorney General or their designee in response to an ex parte order concerning an authorized investigation or prosecution of domestic or international terrorism, without prior notice to the Student.

K. Health and Safety:

MD Anderson may disclose Personally Identifiable Information from Education Records to appropriate parties, including parents of a Student, in connection with an emergency if MD Anderson determines that knowledge of the information is necessary to protect the health and safety of the Student or other individuals.

L. Disciplinary Hearing Results:

- **Disclosure to Victims:**

  MD Anderson may disclose to an alleged victim of any crime of violence (as that term is defined in Chapter 1, Section 16 of Title 18, United States Code) or a non-forcible sex offense the final results of any disciplinary proceeding conducted by MD Anderson against the alleged perpetrator with respect to such crime or offense, regardless of whether the alleged perpetrator was found responsible for violating MD Anderson’s rules or policies with respect to such crime or offense.

- **Disclosure to Third-Parties:**

  MD Anderson may disclose the final results of any disciplinary proceeding against a Student who allegedly engaged in any crime of violence or non-forcible sex offense (as those terms are defined in 34 C.F.R. Part 99.39) if the Student is found responsible for violating the MD Anderson’s rules or policies with respect to such crime or offense. Such disclosure shall include only the name of the Student, the violation committed, and any sanction imposed by MD Anderson on that Student. Such disclosure may include the name of any other Student, such as a victim or witness, only with the written Consent of that other Student.

- **Alcohol and Drug Violations:**

  MD Anderson may disclose to a parent or legal guardian of a Student information regarding the Student’s violation of any Federal, State, or local law, or of any rule or policy of MD Anderson governing the use or possession of alcohol or a controlled substance, regardless of whether that information is contained in the Student’s Education Records, if the Student is under the age of 21 at the time of disclosure to the parent or legal guardian, and MD Anderson determines that the Student is responsible for a disciplinary violation with respect to such use or possession.
M. Defense of Litigation or Complaints against MD Anderson:

If a Student initiates legal action against MD Anderson, MD Anderson may disclose to the court, without a court order or subpoena, the Student’s Education Records that are relevant for MD Anderson to defend itself.

2.3 Consent of the Student:

MD Anderson will release Education Records or allow access to those records to a third party if the Student provides a valid and verifiable Consent that the Student is permitting the release of access to the third party.

3.0 Disclosure to the Student

3.1 A Student has the right, upon request, to review all materials that are in the Student’s Education Records except:

A. Financial information submitted by the Student's parents;

B. Confidential letters and recommendations associated with admissions, employment or job placement, or honors, to which the Student has waived rights of inspection and review or which were made part of the Student’s Education Records prior to Jan. 1, 1975, provided those letters were collected under established policies of confidentiality and were used only for the purposes for which they were collected;

C. Education Records containing information about more than one Student, in which case MD Anderson will permit access only to that part of the record that pertains to the inquiring Student; and

D. Records that are subject to attorney-client privilege which belongs to MD Anderson.

3.2 Process for Students Requesting Access to their Education Records:

For Students attending the SHP, the Dean of the SHP is designated as the official custodian of the Student’s Education Records. Copies of official transcripts and other official records are available from the UTHealth Houston Office of the Registrar. For Students attending MD Anderson’s School Program, the manager of the program is designated as the official custodian of Education Records. Except where pre-empted by a specific provision of FERPA or a request for an official copy of Student’s transcript, a Student’s right to access and/or request a copy of their Education Records is co-extensive with the Student’s right to access records under the Texas Public Information Act (TPIA).

A. Requests by a Student for Education Records that are available to a Student under an applicable provision of the TPIA will be processed by the MD Anderson in accordance with policies for access to records under the TPIA.

B. Records pre-empted from availability under the TPIA by FERPA will be made available within 45 days of the request.

C. Requests for official copies of transcripts or other academic records will not be released for Students who have a delinquent financial obligation or a financial hold.

4.0 Record of Disclosures

4.1 MD Anderson will maintain with the Student’s Education Records a record of each disclosure request and each disclosure made, as well as the names of State and local educational authorities and Federal officials and agencies that may further disclosures of the Student’s Education Records without Consent. For each request or disclosure, the record must include:

A. The parties who have requested or received the Education Records; and

B. The legitimate interests the parties had in requesting or obtaining the information.

4.2 Additionally, if Education Records are disclosed under the Health and Safety exception set forth in Section 2.2 K of this policy, the record must also include:

A. The articulable and significant threat to the health or safety of a Student or other individuals that formed the basis for the disclosure; and
B. The parties to whom MD Anderson disclosed the information.

4.3 The recordkeeping requirement set forth in this Section 4.0 does not apply if the request was from or the disclosure was to:

A. The Student;

B. A party with written Consent of the Student;

C. MD Anderson Officials with a Legitimate Educational Interest pursuant to Section 2.2 B of this policy;

D. A party seeking or receiving records pursuant to a judicial order or lawfully issued subpoena in accordance with Section 2.2 J of this policy; or

E. A party seeking Directory Information.

5.0 Request to Amend Records

A Student who believes that an Education Records maintained about the Student is inaccurate, misleading, or otherwise in violation of the Student’s privacy rights may request amendment of the record. However, substantive judgment of a faculty member about a Student’s work, expressed in grades and/or evaluations, is not within the purview of this right.

5.1 Informal requests:

A Student may request an informal discussion about amending a record with the MD Anderson office responsible for the particular record. If an agreement is reached regarding the Student’s request, the appropriate records will be amended. If the record is not amended as requested by the Student, MD Anderson will inform the Student of its decision and of the Student’s right to request a formal hearing.

5.2 Requests for a hearing:

MD Anderson shall give a Student, on request, an opportunity for a hearing to challenge the content of the Student’s Education Records on the grounds that the information contained in the Education Records is inaccurate, misleading, or in violation of the Student's privacy rights. A request must be made in writing to the dean of the SHP or the manager of the School Program, as appropriate, who, within a reasonable period of time after receiving the request, will inform the Student of the date, place, and time of the hearing. The Chief Education & Training Officer will serve as the hearing officer or will appoint a designee as appropriate.

A. At the hearing, the Student may present relevant evidence and may be assisted or represented by a person of the Student’s choice, including an attorney, at the Student's expense.

B. The decision of the hearing officer will be final. The decision will be based solely on the evidence presented at the hearing and will include a written summary of the evidence and the basis for the decision. A copy will be given to all parties concerned.

C. If the decision is in favor of the Student, the Education Records will be corrected or amended in accordance with the decision of the hearing officer.

D. If the decision is unsatisfactory to the Student, the Student may place a statement with the Education Records commenting on the information in the record, or a statement setting forth any reasons for disagreeing with the decisions of the hearing officer, or both. The statement will be maintained as part of the Student’s Education Records and disclosed whenever the portion of the record to which the statement relates is disclosed.

E. Students who believe that the adjudication of their requested amendment was unfair or not in keeping with the provisions of FERPA may request, in writing, assistance from the Chief Academic Officer or their designee as appropriate.

6.0 Complaints

Complaints regarding alleged violations of the rights accorded Students by the Federal FERPA may be filed with the Family Policy Compliance Office, US Department of Education, 400 Maryland Avenue, Washington, D.C. 20202.

U.S. Department of Education
ACA1264: The University of Texas MD Anderson Cancer Center School of Health Professions Conduct and Discipline Policy

Purpose

The purpose of the policy is to explain the University of Texas MD Anderson Cancer Center (MD Anderson) School of Health Professions (SHP) regulations concerning Student conduct and discipline.

Policy Statement

It is the policy of MD Anderson to ensure that Students enrolled in the SHP act in a professional and ethical manner in preparation for their entry into their chosen profession. Additionally, MD Anderson is committed to providing its Students a fair and equitable process prior to taking disciplinary action and in appealing any disciplinary action that is assessed.

Scope

Compliance with this policy is the responsibility of all faculty, Students, and other members of MD Anderson’s workforce.

Target Audience

The target audience for this policy includes, but is not limited to, all faculty, trainees, Students, and other members of MD Anderson’s workforce.

Definitions

Dean: Dean of the University of Texas MD Anderson Cancer Center School of Health Professions (SHP).

Hearing Committee: A fair and impartial committee that has been selected to hear disciplinary charges, to make findings of fact, and, upon the finding of a violation, to impose appropriate sanctions.

MD Anderson Campus: All real property, buildings, or facilities owned or controlled by MD Anderson.

Program Director: The administrative officer(s) responsible for the administration of the disciplinary process.

Student: A person who:

- Is enrolled at the MD Anderson SHP,
- Is accepted for admission or readmission at the MD Anderson SHP, or
- Has been enrolled at the MD Anderson SHP in a prior semester or summer session, and is eligible to continue enrollment in the semester or summer session that immediately follows.

Procedure

1.0 Policy Overview

1.1 Students are responsible for knowing and observing the SHP regulations concerning Student conduct and discipline.

1.2 Primary responsibility and authority for Student discipline lie with the Dean and the Program Director, who are responsible for investigating charges of misconduct as well as assessing disciplinary sanctions, if appropriate. The Dean is authorized by The University of Texas Board of Regents (Regents) to proceed with an investigation and disciplinary process as outlined in this policy, notwithstanding any action taken by other authorities. See the UT System Board of Regents, Regents’ Rules and Regulations (Regents’ Rules), Rule 50101: Student Conduct and Discipline.

1.3 All Students are expected and required to:
A. Obey federal, state, and local laws;
B. Comply with the Regents’ Rules and Regulations;
C. Comply with MD Anderson and The University of Texas System rules and regulations;
D. Comply with directives issued by administrative officials of MD Anderson or The University of Texas System in the course of their authorized duties; and
E. Observe standards of conduct appropriate for an academic institution.

1.4 Any Student who engages in conduct that violates the above standards is subject to discipline whether the conduct takes place on or off the MD Anderson Campus, and whether or not civil or criminal penalties are imposed for such conduct.

2.0 Prohibited Conduct

2.1 Unacceptable conduct that would subject a Student to disciplinary action includes, but is not limited to, the following:

A. Engaging in scholastic dishonesty such as cheating, plagiarism, collusion, submitting another person’s work or materials for credit, taking an examination for another person, and acting in a manner that would give unfair advantage to himself or herself or another Student, or attempting to commit such act.
B. Engaging in unauthorized distribution of copyrighted materials, including peer-to-peer file sharing that may also subject Students to civil and criminal penalties. 17 U.S.C. § 506.
C. Illegally using, possessing, or selling alcohol, drugs, or narcotics.
D. Endangering the health or safety of another.
E. Obstructing, disrupting, or interfering with, individually or in concert with others, any teaching, educational, research, administrative, disciplinary, public service, or other activity or public performance authorized by MD Anderson to be held on the MD Anderson Campus or on any property or in any building or facility owned or controlled by MD Anderson or The University of Texas System. Such behavior includes but is not limited to interrupting, modifying, or damaging utility service or equipment; communication service or equipment; and computer hardware, programs, records, or networks accessible through MD Anderson’s resources.
F. Engaging in speaking or writing that is directed to inciting or producing imminent lawless action, and that is likely to incite or produce such action.
G. Engaging in the unauthorized use of property, equipment, supplies, buildings, or facilities owned or controlled by MD Anderson or The University of Texas System. See the Use of State-Owned Property, Equipment, Services, Funds, and Resources Policy (MD Anderson Institutional Policy #ADM0340).
H. Engaging in hazing, singly or in concert with others, with or without the consent of a Student, either on or off the MD Anderson Campus, is prohibited by state law (Texas Education Code, Section 51.936). Both the person submitting to the hazing and the person inflicting the hazing are subject to discipline. Knowingly failing to report hazing can subject one to discipline. Initiations or activities of organizations may not include features that are dangerous, harmful, or degrading to any Student and a violation of this prohibition renders both the organization and participating individuals subject to discipline.
I. Altering or assisting in the altering of any official record of MD Anderson or The University of Texas System, or submitting false information or omitting information required for or related to application for admission, award of a degree, or any official record. A former Student who engages in such conduct is subject to a bar against re-admission, revocation of degree, and withdrawal of diploma.
J. Defacing, mutilating, destroying, or taking unauthorized possession of property, equipment, supplies, buildings, or facilities owned or controlled by MD Anderson or The University of Texas System.
K. Possessing or using any type of explosive, firearm, imitation firearm, ammunition, hazardous chemical or weapon as defined by Senate Bill 11, state law, or federal law while on the MD Anderson Campus or
on any property or in any building or facility owned or controlled by MD Anderson or The University of Texas System, unless authorized by federal, state, or local laws. See the Policy on Concealed Handgun Carriage on MD Anderson’s Campus (MD Anderson Institutional Policy #ADM1254).

2.2 A Student is also subject to discipline for prohibited conduct that occurs while participating in activities off the MD Anderson Campus that are sponsored by MD Anderson or The University of Texas System, including field trips, internships, rotations, or clinical assignments.

2.3 A Student who receives a period of suspension as a disciplinary penalty is subject to further disciplinary action for prohibited conduct that occurs during the period of suspension. A former Student expelled or suspended for disciplinary reasons is prohibited from being on the MD Anderson Campus as well as any campus of The University of Texas System institution during the period of expulsion or suspension without prior written approval of the MD Anderson Chief Academic Officer (CAO) or Chief Education and Training Officer (CETO), or the Chief Student Affairs Officer of the institution at which the suspended Student wishes to be present. In a request for such approval, the former Student is required to disclose in writing each institution from which the individual has been suspended or expelled, and the conduct leading to the disciplinary action.

For more information related to Prohibited Conduct please refer to the Examinations policy outlined in the Academic Policies and Procedures section of the School of Health Professions Policies and Procedures.

3.0 Sanctions

3.1 The following sanctions may be assessed by the Dean or the Dean’s designee:

A. Disciplinary probation.
B. Withholding of grades, official transcript, and/or degree.
C. Bar against readmission.
D. Restitution or reimbursement for damage to or misappropriation of MD Anderson, the SHP, or The University of Texas System property.
E. Suspension of rights and privileges, including participation in extracurricular activities.
F. Assignment of a failing grade for an examination, assignment, or course, and/or cancellation of all or any portion of a prior course credit.
G. Denial of degree.
H. Suspension from the SHP for a specified period of time, or until the Student meets specified conditions. Students who are currently enrolled will be administratively withdrawn from all courses and refunds will not be issued.
I. Expulsion (permanent separation) from the SHP. Expulsion creates a permanent notation on the Student’s academic transcript.
J. Revocation of degree and withdrawal of diploma.
K. Other sanctions as deemed appropriate under the circumstances.

3.2 If a Student is found to be guilty of the illegal use, possession, and/or sale of a drug or narcotic on the MD Anderson Campus, the minimum penalty must be suspension from the institution for a specified period of time and/or suspension of rights and privileges.

4.0 Procedures

4.1 Investigation:

A. The Dean or designee is responsible for investigating allegations of misconduct.
B. If there is a more specific policy that specifies the procedures for investigation, such as the Sexual Misconduct Prevention Policy (MD Anderson Institutional Policy #ADM0285), that policy will govern; however, all the powers provided herein to the Dean for investigations involving Student
witnesses, including summons, interim disciplinary action, and withholding transcripts, grades, and degrees may be exercised by the investigator designated in that policy in consultation with the Dean.

C. Any Student may be summoned by written request of the Dean for a meeting for purposes of the investigation and/or to discuss the allegations. The written request shall specify a place for the meeting and a time at least three weekdays after the date of the request if the request is sent by regular mail, or at least two weekdays after the date of the request if the request is sent by email or hand delivered. The written request may be mailed to the address appearing in the records of the registrar, emailed to the Student at the Student's MD Anderson-issued email address, or hand delivered to the Student. If the Student fails to appear without good cause, as determined by the Dean, the Dean may bar or cancel the Student's enrollment, or otherwise alter the status of the Student until the Student complies with the summons. If the Student failing to appear as directed in a summons is the Student against whom charges are being reviewed, the Dean may, in addition to the above, proceed with disciplinary action based upon other information available using the disciplinary procedures below. A Student's refusal to accept delivery of the notice, failure to maintain a current address with the registrar, or failure to read mail or email is not considered good cause for failing to respond to a summons.

D. The Dean will review the evidence, determine whether to proceed with charges, and, if so, determine the sanction appropriate to the charges. Before proceeding with disciplinary action, the Dean will offer the Student the opportunity to meet to provide a response to the charges and, upon request, to review the available evidence supporting the charges.

4.2 Interim Measures:

A. If the Dean finds the allegations against a Student are not unfounded and pending a hearing or other disposition of the allegations against a Student, the Dean may take such immediate interim disciplinary action as is appropriate to the circumstance when such action is in the best interests of MD Anderson, the SHP, or The University of Texas System. This includes, but is not limited to, a suspension and bar from the MD Anderson Campus when it reasonably appears to the Dean from the circumstances that the continuing presence of the Student poses a potential danger to persons or property, or a potential threat for disrupting any activity authorized by MD Anderson or the SHP.

B. The Dean may also withhold the issuance of an official transcript, grade, diploma, or degree to a Student alleged to have violated a rule or regulation of MD Anderson, the SHP, or The University of Texas System which would reasonably allow the imposition of such a sanction. The Dean may take such action pending disposition of the allegations or charge if the Dean has provided the Student an opportunity to provide a preliminary response to the allegations and, in the opinion of the Dean, the best interests of MD Anderson, the SHP, or The University of Texas System would be served by this action.

C. When interim disciplinary action has been taken by the Dean, a hearing of the charges against the Student will generally be held within 10 days after the interim disciplinary action was taken; however, at the discretion of the Dean, the 10-day period may be extended for a reasonable time period.

4.3 Disposition of the Charge:

A. In any case, except in a case finding a violation of the Sexual Misconduct Prevention Policy (MD Anderson Institutional Policy #ADM0285), where the accused Student elects not to dispute the facts upon which the charges are based and agrees to the sanctions the Dean assesses, the Student may execute a written waiver of the hearing procedures and waiver of any appeals under the policy. This administrative disposition shall be final, and there shall be no subsequent proceedings regarding the charges.

B. In any case finding a violation of the Sexual Misconduct Prevention Policy (MD Anderson Institutional Policy #ADM0285), the case will proceed under the hearing procedures of this policy unless both the accused and the accuser agree to the terms of the administrative disposition and thus waive the hearing and appeals.

C. In any case where the accused Student does not dispute the facts upon which the charges are based, but does not agree with the sanctions proposed by the Dean, the Student may execute a written waiver of the hearing procedures yet retain the right to appeal the decision of the Dean only on the issue of sanction (see Section 4.5 below). The appeal regarding the sanction must be made to the CETO.

D. If the Student disputes the facts on which the charges are based, the Dean will arrange for the facts to be heard and determined by a Hearing Committee.
4.4 Hearing:

A. In those cases in which the accused Student disputes the facts upon which the charges are based, such charges shall be heard and determined by a fair and impartial Hearing Committee.

B. In any case involving a violation of the Sexual Misconduct Prevention Policy (MD Anderson Institutional Policy #ADM0285), the accuser will be provided the same rights and responsibilities outlined in this Section as the accused, including the right to have notice of the hearing.

C. The SHP is committed to providing fair and unbiased representatives each academic year to serve as Hearing Committee members in the school. Those persons will be selected from a nomination pool, in which the Program Directors make the nominations. Members can be selected as the nomination pool may consist of SHP Faculty, MD Anderson staff, or Clinical Affiliates staff. Generally, each Hearing Committee will contain at least three members from opposite program representation. The Hearing Committee pool will be populated annually. In the event of an appeal, Hearing Committee members will be drawn randomly from the pool to serve on the Hearing Committee. The Dean and the individual requesting an appeal will be allowed to strike names if demonstrated conflicts of interest exist. The serving term for the Hearing Committee is a full academic year. During the first meeting, the chair of the Hearing Committee is selected based upon agreement within the committee.

D. When interim disciplinary action has been taken by the Dean, the Student will be given the opportunity to have a hearing of the charges in accordance with the procedures below within 10 days after the interim disciplinary action was taken; however, if the Dean determines that there is good cause, the 10-day period may be extended for a reasonable period.

E. In cases other than those in which immediate interim disciplinary action has been taken, the accused Student will be given at least a 10-day notice of the date, time, and place for the hearing; the name of the Hearing Committee Members; a written statement of the charge(s); and a summary statement of the evidence supporting such charge(s). The hearing notice may also set a deadline by which the Student must notify the Dean if they intend to be assisted by an advisor at the hearing. The notice will be delivered in person or mailed to the Student at the address appearing in the registrar's records. A notice sent by mail will be considered to have been received on the third day after the date of mailing, excluding any intervening Sunday. The date for a hearing may be postponed by the Hearing Committee Chair for good cause, or by agreement of the Student and Dean.

F. The accused Student may challenge the impartiality of a Hearing Committee Member(s) up to three days prior to the hearing by submitting the reasons for the challenge in writing to the Hearing Committee Member(s) through the office of the Dean. If the Committee Member disqualifies himself or herself, a substitute will be appointed in accordance with SHP's procedures.

G. On a hearing of the charges, the Dean or other SHP representative designated by the Dean has the burden of going forward with the evidence and proving the charges by the greater weight of credible evidence.

H. The Hearing Committee Chair is responsible for conducting the hearing in an orderly manner and controlling the conduct of the witnesses and participants in the hearing. The Hearing Committee Chair will rule on all procedural matters and on objections regarding exhibits and testimony of witnesses; may question witnesses; and is entitled to have the advice and assistance of legal counsel from The University of Texas System Office of General Counsel (OGC).

I. The hearing will be conducted as follows:

- Each party shall provide the other party a list of witnesses, a brief summary of the testimony to be given by each, and a copy of documents to be introduced at the hearing at least five days prior to the hearing.

- Each party has the right to appear, present testimony of witnesses and documentary evidence, cross-examine witnesses as permitted by the Hearing Committee Chair, and be assisted by an advisor of choice. The advisor may be an attorney. If the accused Student's advisor is an attorney, the Dean's advisor may be an attorney from The University of Texas System OGC. An advisor may confer with and advise the Dean or accused Student, but may not question witnesses, introduce evidence, make objections, or present argument to the Hearing Committee. In sexual harassment/sexual assault cases, the alleged victim shall have the right to be present throughout
the hearing; to have an advisor present; to have irrelevant past sexual history with third parties excluded from the evidence; and to have a closed hearing.

- The Dean may recommend a penalty to be assessed by the Hearing Committee, and may base the recommendation on past practice for violations of a similar nature, the Student's past disciplinary record or other factors the Dean deems relevant. The accused Student is entitled to respond to the Dean's recommendation.

- The hearing will be recorded. At the request of the CETO, the recording of the hearing will be transcribed and both parties will receive a transcript.

J. The Hearing Committee will send a written decision to both parties that will contain findings of facts, conclusions as to a violation of standards of conduct, and the disciplinary sanction, if any.

K. If either party wishes to appeal the Hearing Committee’s decision, the official record will consist of the recording of the hearing, the documents received in evidence, and the decision of the Hearing Committee.

4.5 Appeal:

A. A Student may appeal a sanction assessed by the Dean following the Student's waiver of the hearing procedures, and either party may appeal the decision of the Hearing Committee. In sexual harassment/sexual misconduct cases, the alleged victim may pursue an appeal under the same procedure as the accused Student.

B. The appealing party must submit a written appeal stating the specific reasons for the appeal and any argument to the CETO (“Appeal Official”) with a copy to the other party. The appeal must be stamped as received by the Appeal Official’s office no later than 14 days after the appealing party has been notified of the sanction assessed by the Dean or the decision of the Hearing Committee. If the notice of sanction or decision is sent by mail, the date the notice or decision is mailed initiates the 14-day period for the appeal. The non-appealing party and, in sexual harassment/sexual misconduct cases, the alleged victim, may submit a response to the appeal which must be received by the Appeal Official’s office no later than five days after receipt of the appeal, with a copy to the other party.

C. In cases of appeal of the sanction assessed by the Dean following the Student's waiver of the hearing procedures, the Appeal Official will review only the written arguments of the Student and the Dean. In cases of appeal of the Hearing Committee decision, the Appeal Official will review only the record from the hearing. The Dean will submit the record from the hearing to the Appeal Official as soon as it is available to the Dean. At the discretion of the Appeal Official, both parties may present oral argument in an appeal from the decision of the Hearing Committee.

D. The Appeal Official may approve, reject, or modify the decision in question, or may require a reopening of the original hearing for presentation of additional evidence and reconsideration of the decision. It is provided, however, that upon a finding of responsibility in a case involving the illegal use, possession, and/or sale of a drug or narcotic on the MD Anderson Campus, the sanction may not be reduced below the required minimum.

E. The action of the Appeal Official will be communicated in writing to the Student and the Dean within 30 days after the Appeal Official receives the appeal and related documents. The decision of the Appeal Official is final.

5.0 Records

5.1 The academic transcript of a Student suspended or expelled for disciplinary reasons shall be marked with “Disciplinary Suspension” or “Expulsion” as appropriate. A permanent written disciplinary record will be kept for each Student assessed a penalty of suspension, expulsion, denial, or revocation of degree and/or withdrawal of diploma.

5.2 A record of scholastic dishonesty will be maintained for at least five years, and disciplinary records required by law to be maintained for a certain period of time, i.e. Clery Act violations, will be maintained for at least the time specified in the applicable law, unless the record is permanent in conjunction with the above stated sanctions.
5.3 A disciplinary record will reflect the nature of the charge, the disposition of the charge, the penalty assessed, and any other pertinent information. This disciplinary record will be maintained by the office of the Dean. It shall be treated as confidential and will not be accessible to or used by anyone other than the Dean or other university official with legitimate educational interests, except on written authorization of the Student or in accordance with applicable state or federal laws, court order, or subpoena.

School of Health Professions Policies

SHP01: Admission of Applicants with Dismissals

PURPOSE

The purpose of the policy is to establish review procedures concerning applicants with previous dismissals from institutions of higher education other than the School of Health Professions.

POLICY STATEMENT

It is the policy of the School of Health Professions to follow the procedures outlined below during the admissions process for applicants previously dismissed from other institutions of higher education.

SCOPE

Compliance with this policy is the responsibility of all SHP faculty and students and other members of MD Anderson’s workforce.

TARGET AUDIENCE

The target audience for this policy includes, but is not limited to, all faculty, students, program admission committee members, other members of MD Anderson’s workforce, and all applicants to the School of Health Professions who have been previously dismissed from other institutions of higher education.

DEFINITIONS

Academic program: A graduate or undergraduate program of the School of Health Professions.

Admissions process: The process of individuals applying for admission to the School of Health Professions that may include, but is not limited to, the application, interview, testing, and review by the program admissions committee.

Dismissal: An applicant’s involuntary separation from an institution of higher education based on academic and/or disciplinary (conduct/behavioral) reasons.

Previously dismissed applicant: A person applying for admission to the School of Health Professions who has been previously dismissed from another institution of higher learning for academic and/or disciplinary (conduct/behavioral) reasons.

Program admissions committee: The committee each academic program forms to review applicants for admission to their academic program.

PROCEDURE

1.0 Requests for information

If it becomes known during the admissions process that an applicant to the School of Health Professions has been dismissed from another institution of higher learning, the program admissions committee may request additional information regarding the circumstances of the dismissal to decide if the previously dismissed applicant is eligible for admission to the School of Health Professions.

A. The program admissions committee may request from the previously dismissed applicant specific information of the dismissal, which may include, but is not limited to, background, charges filed, and date(s) of occurrence.

B. The program admissions committee may request a release of information from the previously dismissed applicant to obtain official records of the dismissal from their previous institution.
2.0 Request actions

The previously dismissed applicant may or may not accept the requests for additional information and/or release of information.

3.0 Review

After review of all available information, the program admissions committee will

A. decide if the previously dismissed applicant is eligible for admission to the School of Health Professions, and

B. inform the previously dismissed applicant if they are eligible for admission to the School of Health Professions.

4.0 Falsification of data

Any falsification of data by the previously dismissed applicant may result in ineligibility of admission to the School of Health Professions.
SHP02: Student Readmission

PURPOSE

The purpose of the policy is to identify the conditions in which previously dismissed students may be readmitted to the School of Health Professions and its programs after a separation from the school due to academic and/or disciplinary (conduct/behavioral) dismissal.

POLICY STATEMENT

It is the policy of the School of Health Professions that each program admissions committee may readmit, with or without conditions, or deny readmission to previously dismissed students from the School of Health Professions with the option to reapply.

SCOPE

Compliance with this policy is the responsibility of all faculty, students, and other members of MD Anderson’s workforce.

TARGET AUDIENCE

The target audience for this policy includes, but is not limited to, all SHP faculty and students, program admission committee members, other members of MD Anderson’s workforce, and previously dismissed students from the School of Health Professions and its programs after a separation from the school due to academic and/or disciplinary (conduct/behavioral) dismissal.

DEFINITIONS

Academic program: A graduate or undergraduate program of the School of Health Professions.

Admissions process: The process of individuals applying for admission to the School of Health Professions that may include, but is not limited to, the application, interview, testing, and review by the program admissions committee.

Letter of admission: The letter sent to applicants offering admission to a specific academic program in the School of Health Professions, which may or may not include conditions for admissions.

Previously dismissed student with the option to reapply: A person applying for admission to the School of Health Professions who

1. has been previously dismissed from the School of Health Professions for academic and/or disciplinary (conduct/behavioral) reasons, and

2. is allowed to apply for readmission to the School of Health Professions as stated in their dismissal letter.

Program admissions committee: The committee each academic program forms to review applicants for admission to their academic program.

PROCEDURE

1.0 Policy Overview

1.1 Program admissions committees will either offer readmission or deny readmission to previously dismissed students who are reapplying to the School of Health Professions.

1.2 The offer of readmission is either with or without conditions as stated in the official letter of admission.

2.0 General Instructions for readmittance with conditions
2.1 Previously dismissed students with the option to reapply who are offered readmission to an academic program of the School of Health Professions will receive specific conditions in their official letter of admission. The student must accept the conditions by the deadline date stated in their letter of admission.

2.2 Conditions of readmission may include, but are not limited to, the following.

A. Repeating courses with unsatisfactory grades earned.

B. Repeating single, multiple, or all courses previously taken at the School of Health Professions. Typically considered for students who have been separated from the SHP program for more than one year.

C. Academic probation.
   - Probationary period may include one or more semesters.
   - Probationary criteria may include dismissal from the program and the SHP, without appeal, if the student earns an unsatisfactory grade or repeats identical or similar inappropriate behaviors to those presented in the original case for dismissal.
