

MEMORANDUM

13 January 2020

TO: ALL users of Research Histology Core Lab

Effective immediately, the Division of Pathology has made some changes regarding block request procedures from the Research Histology Core Lab (RHCL) as follows:

- **NO TQL and PFR blocks will be depleted.**
- **To preserve the tumor tissue block further, no punches or cores are allowed on TQL blocks.**

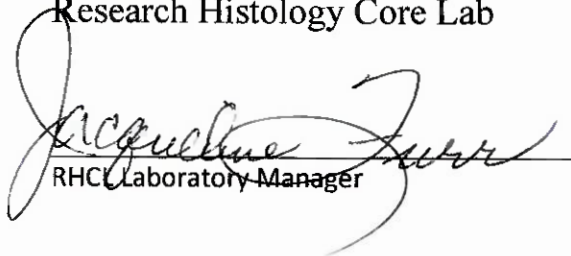

We understand the importance of these tumor tissues on your projects, but it is also crucial not to deplete further these tumor blocks as we need to maintain its existing state for future studies.

We appreciate your consideration and cooperation in this matter.

Thank you,

Sincerely,

Research Histology Core Lab

RHCL Laboratory Manager
