16TH INTERNATIONAL WORKSHOP
on Multiple Endocrine Neoplasia
A Focus on New Concepts and Treatment
of Malignant Manifestations

March 27-29, 2019
Houston, Texas
Immediately following ENDO 2019
in nearby New Orleans

Watch for full workshop details at
www.mdanderson.org/conferences

The University of Texas
MD Anderson Cancer Center
Dan L. Duncan Building (CPB)
Floor 8, Rooms 1-8
1155 Pressler Street
Houston, Texas
In keeping with the spirit of the original MEN workshop, MEN2019 will focus on emerging topics in the genesis and therapy of malignant endocrine tumors associated with multiple endocrine neoplasia and other hereditary tumor syndromes.

Symposia topics will include:
• Medullary Thyroid Carcinoma
• Gastroenteropancreatic Neuroendocrine Tumors
• Parathyroid Carcinoma
• Malignant Pheochromocytoma/Paraganglioma
• Pituitary, Renal and Adrenocortical Tumors

The program format will include lecture sessions dedicated to each of these key disease areas as well as corresponding workshops. The goal of the workshops will be to identify novel areas for growth and to develop an outline for future basic and clinical research. The workshops will be led by local and international experts in each disease site. All registrants will attend the lecture sessions and then be invited to participate in a disease site workshop for the duration of the meeting. This approach will allow adequate time for discussion of emerging topics as well as collaborative creations of international disease-specific roadmaps for future research and clinical trials.

The University of Texas MD Anderson Cancer Center is a leader in the development and implementation of new therapies for cancer. The program will feature speakers with expertise in cutting-edge cancer therapies and focus on how these therapies may be applied to malignant manifestations of multiple endocrine neoplasia and hereditary tumor syndromes. Sharing of novel research will also be achieved through poster and oral presentation sessions by the registrants. We look forward to an exciting two and a half days of productive conversation and collaboration as we continue to push forward the field. We hope that you will join us in Houston!

Target Audience:
This workshop will be of value to Physicians, Nurse Practitioners, Physician Assistants, Genetic Counselors, Researchers, Trainees (Students, Residents, Fellows).

Call for Abstracts
Details on oral and poster abstract submissions will be posted at www.mdanderson.org/conferences

Conference Chairs
Robert F. Gagel, MD (Chair)
Elizabeth G. Grubbs, MD (Co-Chair)
Steven G. Waguespack, MD (Co-Chair)
Daniel M. Halperin, MD (Co-Chair)
