Nursing Assessment and Management for Skin and Wound Care

This practice algorithm has been specifically developed for MD Anderson using a multidisciplinary approach and taking into consideration circumstances particular to MD Anderson, including the following: MD Anderson’s specific patient population; MD Anderson’s services and structure; and MD Anderson’s clinical information. Moreover, this algorithm is not intended to replace the independent medical or professional judgment of physicians or other health care providers.

Note: This algorithm is intended for use by Wound Ostomy Care Nurses (WOCN) only

ORDER

Provider identifies inpatient/outpatient need for WOCN consult

ASSESSMENT

Provider to place order for WOCN consult to evaluate and treat

WOCN performs patient assessment to determine condition

1. Intact Skin
2. Partial Thickness
3. Full Thickness
4. Tumor

Intact Skin → See page 3
Partial Thickness → See page 5
Full Thickness → See page 6
Tumor → See page 7

RECOMMENDATIONS

Intact Skin

- Does the patient have a documented fungal infection?
  - Yes
    - Braden² Moisture Subset Score 3 or below?
      - Yes
        - Apply Cleanser¹ and one of the following Topical Antifungals:
          - Nystatin (Mycostatin) powder 100,000 units/gram
          - Inzo Antifungal 2% Topical Cream
      - No
        - Follow-up determined by WOCN
  - No
    - Apply Cleanser¹ and any of the following:
      - Moisture Barrier
        - Skin Protectant Paste 2.5 oz
        - Remedy Clear Aid Ointment 2.5 oz
        - Remedy Calazime 0.2%-20% EX Paste
        - Nystatin-Zinc Oxide-Lidocaine Cream (NDX) (CMPD) Films
        - No Sting Skin Barrier Wipe
        - Skin Barrier Spray- No Sting
    - Follow-up determined by WOCN

- No
  - Apply Cleanser¹ and any of the following lotions:
    - Nutrashield Skin Lotion 4oz
    - Urea (Carmol) Lotion 10%
    - White Petrolatum-Mineral Oil (Eucerin) Cream
  - Follow-up determined by WOCN

¹Cleansers:
- Skin Cleanser: No Rinse Foam Cleanser 4n1 9oz
- Perineal Cleanser: Perineal Spray Cleanser 8oz
- Wipes: Fragrance-Free Flushable Perineal Wipes

## Nursing Assessment and Management for Skin and Wound Care

This practice algorithm has been specifically developed for MD Anderson using a multidisciplinary approach and taking into consideration circumstances particular to MD Anderson, including the following: MD Anderson’s specific patient population; MD Anderson’s services and structure; and MD Anderson’s clinical information. Moreover, this algorithm is not intended to replace the independent medical or professional judgment of physicians or other health care providers.

### APPENDIX A: Braden Scale

<table>
<thead>
<tr>
<th></th>
<th>1</th>
<th>2</th>
<th>3</th>
<th>4</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sensory Perceptions</td>
<td>Completely Limited: Unresponsive (does not moan, flinch, or grasp) to painful stimuli, due to diminished level of consciousness or sedation OR limited ability to feel pain over most of body.</td>
<td>Very Limited: Responds only to painful stimuli. Cannot communicate discomfort except by moaning or restlessness OR has a sensory impairment which limits the ability to feel pain or discomfort over half of body.</td>
<td>Slightly Limited: Responds to verbal commands, but cannot always communicate discomfort or the need to be turned OR has some sensory impairment which limits ability to feel pain or discomfort in 1 or 2 extremities.</td>
<td>No Impairment: Responds to verbal commands. Has no sensory deficit which would limit ability to feel or voice pain or discomfort.</td>
</tr>
<tr>
<td>Moisture</td>
<td>Constantly Moist: Skin is kept moist almost constantly by perspiration, urine, etc. Dampness is detected every time patient is moved or turned.</td>
<td>Very Moist: Skin is often, but not always moist. Linen must be changed at least once a shift.</td>
<td>Occasionally Moist: Skin is occasionally moist, requiring an extra linen change approximately once a day.</td>
<td>Rarely Moist: Skin is usually dry, linen only requires changing at routine intervals.</td>
</tr>
<tr>
<td>Activity</td>
<td>Bedfast: Confined to bed.</td>
<td>Chairfast: Ability to walk severely limited or non-existent. Cannot bear own weight and/or must be assisted into chair or wheelchair.</td>
<td>Walks Occasionally: Walks occasionally during day, but for very short distances, with or without assistance. Spends majority of each shift in bed or chair.</td>
<td>Walks Frequently: Walks outside room at least twice a day and inside room at least once every two hours during waking hours.</td>
</tr>
<tr>
<td>Mobility</td>
<td>Completely Immobile: Does not make even slight changes in body or extremity position without assistance.</td>
<td>Very Limited: Makes occasional light changes in body or extremity position but unable to make frequent or significant changes independently.</td>
<td>Slightly Limited: Makes frequent though slight changes in body or extremity position independently.</td>
<td>No Limitation: Makes major and frequent changes in position without assistance.</td>
</tr>
<tr>
<td>Nutrition</td>
<td>Very Poor: Never eats a complete meal. Rarely eats more than 1/3 of any food offered. Eats 2 servings or less of protein (meat or dairy products) per day. Takes fluids poorly. Does not take a liquid dietary supplement OR is NPO and/or maintained on clear liquids or IVs for more than 5 days.</td>
<td>Probably Inadequate: Rarely eats a complete meal and generally eats only about ½ of any food offered. Protein intake includes only 3 servings of meat or dairy products per day. Occasionally will take a dietary supplement OR receives less than optimum amount of liquid diet or tube feeding.</td>
<td>Adequate: Eats over half of most meals. Eats a total of 4 servings of protein (meat, dairy products per day). Occasionally will refuse a meal, but will usually take a supplement when offered OR is on a tube feeding or TPN regimen which probably meets most of nutritional needs.</td>
<td>Excellent: Eats most of every meal. Never refuses a meal. Usually eats a total of 4 or more servings of meat and dairy products. Occasionally eats between meals. Does not require supplementation.</td>
</tr>
<tr>
<td>Friction and Shear</td>
<td>Problem: Requires moderate to maximum assistance in moving. Complete lifting without sliding against sheets is impossible. Frequently slides down in bed or chair. Spasticity, contractures or agitation leads to almost constant friction.</td>
<td>Potential Problem: Moves feebly or requires minimum assistance. During a move, skin probably slides to some extent against sheets, chair, restraints or other devices. Maintains relatively good position in chair or bed most of the time but occasionally slides down.</td>
<td>No Apparent Problem: Moves in bed and in chair independently and has sufficient muscle strength to lift up completely during move. Maintains good position in bed or chair.</td>
<td>N/A</td>
</tr>
</tbody>
</table>
RECOMMENDATIONS

If pain at the wound site, pre-treat with Lidocaine (Xylocaine) Mucosal Jelly 2%

Is the wound stalled or is there a predicted need?

- Yes
  - Mist Therapy utilizing Sodium Chloride 0.9% (NS)
    - 100 mL
    - 250 mL
    - 500 mL

- No
  - Bleeding
    - Chemical Cauterization with Silver Nitrate Topical Stick 75%-25% AND/OR
    - One of the following Hemostatic Agents:
      - Clotting Topical Powder Lrg
      - Gelfoam Sponge sz 12-7
      - Gelfoam Sponge sz 100
      - Surgicel Hemostat 2x3in

  - Hypergranulation AND/OR Closed Wound Edge
    - Chemical Cauterization with Silver Nitrate Topical Stick 75%-25%

  - Neither Bleeding, Hypergranulation or Closed Wound Edge

See page 8 for Treatment

This practice algorithm has been specifically developed for MD Anderson using a multidisciplinary approach and taking into consideration circumstances particular to MD Anderson, including the following: MD Anderson’s specific patient population; MD Anderson’s services and structure; and MD Anderson’s clinical information. Moreover, this algorithm is not intended to replace the independent medical or professional judgment of physicians or other health care providers.
RECOMMENDATIONS

If pain at the wound site, pre-treat with either of the following:
- Lidocaine (Xylocaine) Mucosal Jelly 2%
- Lidocaine (Xylocaine) Mucosal Solution 4%

Full Thickness

Bleeding

Hypergranulation AND/OR
Closed Wound Edge

Chemical Cauterization with Silver Nitrate Topical Stick 75%-25%

One of the following Hemostatic Agents:
- Clotting Topical Powder Lrg
- Gelfoam Sponge sz 12-7
- Gelfoam Sponge sz 100
- Surgicel Hemostat 2x3in

Neither Bleeding,
Hypergranulation or
Closed Wound Edge

Debridement of choice
- Conservative sharp wound debridement
- Debriding Agent, see Appendix C

Eschar or slough present?

Yes

Wound ready for active therapy?

Yes

No

Contact Primary team for authorization
- Negative Pressure Wound Therapy (NPWT) AND/OR
- Mist Therapy utilizing Sodium Chloride 0.9% (NS)
  - 100 mL
  - 250 mL
  - 500 mL

No

See page 8 for treatment

TREATMENT (Full Thickness, Partial Thickness, and Tumor)

Apply Cleanser of Choice, see Appendix B
Apply Product of Choice, see Appendix C
Cover with Absorbent Dressing, see Appendix D
Secure with Sterile Kerlix Bandage 6ply 4.5in AND/OR ACE Bandage - Elastic Adhesive Bandage W/Clip (2inx5yd, 2.5inx5yd, 3inx5yd, 3inx5.5yd, 4inx5yd, 4inx5.5yd)
Follow-up determined by WOCN

Appendix B: Cleanser of Choice
- Wound Wash Saline 0.9% Ex Solution (Full and Partial Thickness Only)
- Antisepsics/Antimicrobials (All except Inact Skin)
  - Chlorhexidine (Hibiclense) Topical Liquid 4%
  - Chlorhexidine Frepp Prep 1.5ml
  - Sodium Hypochlorite (Dakin's Quarter Strength) Topical Solution 0.125%
  - Sodium Hypochlorite (Dakin's Half Strength) Topical Solution 0.25%
  - Povidone-Iodine (Betadine) Topical Solution 10%

Appendix C: Product of Choice
- Debriding Agent (Full Thickness Only)
  - Collagenase (Santry) Ointment 250 units/g
  - Sodium Hypochlorite (Dakin's Quarter Strength) Topical Solution 0.125%
  - Sodium Hypochlorite (Dakin's Half Strength) Topical Solution 0.25%
- Hydrogel (All except Intact Skin)
  - Hydrogel Dressing 6x8in
  - mpm Cooling Dressing 8/12in
- Emollient (Vanicream) Cream (All except Intact Skin)
- Moisture Barrier (Full and Partial Thickness Only)
  - Skin Protectant Paste 2.5 oz
  - Remedy Clear Aid Ointment 2.5oz
  - Remedy Calazime 0.2%-20% EX Paste
  - Nystatin-Zinc Oxide-Lidocaine Cream (NDX) (CMPD)
- Medical Grade Honey (All except Intact Skin)
  - Medihoney Calcium Alginate Dressing
  - Medihoney Hydrocoll Paste Tube
- Antimicrobial (All except Intact Skin)
  - Silver (Silvasorb) ER Gel
  - Cadexomer Iodine (Iodosorb) Gel 0.9%
  - Cadexomer Iodine (Iodoflex) Topical Pads 0.9%

Appendix D: Absorbent Dressing of Choice
- Non-Silver (All except Intact Skin)
  - ABD pad (4x4in)
  - Alleyvn Adhesive Dressing (3x3in, 5x5in)
  - Aquecel Dressing 4x4in
  - Aquecel Rope Dressing 2x45cm
  - Duoderm Xthin Dressing 4x4in
  - Exu Dry Dressing (4x6in, 6x9in, 9x15in, 15x18in, 24x36in)
  - Exu Dry Drain Tube Dressing
  - Exu Dry Leg Dressing
  - Exu Dry Torso Dressing
  - Mepiform Dressing 4x7in
  - Mepilex Border Dressing (4x4in, 6x6in, 6x8in)
  - Mepilex Dressing 4x8in
  - Mepilex Lite Dressing 8x20in
  - Mepilex Sacrum Border Dressing
  - Mepilex Signal Dressing 72x7in
  - Odor Control Carboflex Dressing
  - Wound Odor Dressing 4x4in
- Silver (All except Intact Skin)
  - Aquecel Ag Extra Hydrofiber Dressing 4x5in
  - Aquecel Sil Dressing 3/4x18in
  - Mepilex AG Dressing (4x4in, 8x8in)
- Non-Adherent/Contact Layers (All except Intact Skin)
  - Vaseline Petro Gauze 3x3in
  - Xeroform Dressing 1x8in
  - Meptel Dressing (3x4in, 8x12in)
  - Meptel Dressing One 6.8x10in

Nursing Assessment and Management for Skin and Wound Care

This practice algorithm has been specifically developed for MD Anderson using a multidisciplinary approach and taking into consideration circumstances particular to MD Anderson, including the following: MD Anderson’s specific patient population; MD Anderson’s services and structure; and MD Anderson’s clinical information. Moreover, this algorithm is not intended to replace the independent medical or professional judgment of physicians or other health care providers.

DEVELOPMENT CREDITS

This practice consensus algorithm is based on majority expert opinion of the Wound Ostomy Care workgroup at the University of Texas MD Anderson Cancer Center. It was developed using a multidisciplinary approach that included input from the following medical, radiation and surgical oncologists.

Jalyna Cook, MSN, MBA, RN
Eileen M. Le, MSN, RN, GNP-BC, NP-C, AOCNP
Kasey Matura, RN, CWOCN, CFCN, CMSRN
Faith Pattavana, MS, RN, CWOCN¹
Todd Rowe, MSN, RN, VA-BC
Sara Wharmby, RN, CWOCN
Sonal Yang, PharmD
