

Every patient's image is interpreted by a fellowship-trained breast radiologist. This higher level of expertise means patients receive precise, accurate results they can trust.

Breast Imaging Centers

At MD Anderson Cancer Center, we are committed to taking a comprehensive team-based approach to caring for breast patients — from breast screening through diagnosis, treatment and survivorship.

We have one of the largest breast imaging programs in the nation, including more than 35 fellowship-trained breast radiologists, highly trained technologists, and a dedicated group of nurse navigators all focused on the care of our patients.

Where you send your patient first matters.

MD Anderson has an unmatched depth of expertise in breast health. Our team has extensive training in performing mammograms and interpreting images of the breast.

When there is a diagnosis of breast cancer, our clinicians collaborate with our subspecialized teams to ensure your patient receives a treatment plan tailored to their unique needs. This vast experience translates to a more precise diagnosis and accurate staging of each patient's disease, resulting in fewer scans.

- Screening and diagnostic mammography with 3-D Tomosynthesis
- Breast MRI
- Breast ultrasound
- Molecular breast imaging
- Cytopathology on-site
- Breast biopsy, including stereotactic, ultrasound and MRI
- Preoperative localization, including Savi Scout and Magseed
- Bone densitometry (DXA)

One in three breast imaging patients received a **change in imaging recommendation** after coming to MD Anderson for a second opinion.

Real-time results

Real-time results are made available to patients **at the time of their appointment** for all breast screening and diagnostic examinations.

Why MD Anderson

A safer environment

Keeping our patients and workforce safe has always been our top priority. We continue to proactively implement measures to ensure the safety of patients on all of our campuses. To learn more about our response to COVID-19, visit our [Coronavirus Precautions page](#).

Health care provider connections

When you refer to MD Anderson, your patients will receive the highest level of care in a safe, compassionate environment. We provide breast imaging at multiple locations across Houston, making it easy and convenient for your patients, including:

- Julie and Ben Rogers Breast Diagnostic Clinic (Texas Medical Center)
- MD Anderson League City
- MD Anderson The Woodlands
- MD Anderson West Houston Diagnostic Imaging

Learn more about each of [our locations](#) and their offerings to find the most convenient one for your patient.

Patient referrals

Our Referring Provider Team is dedicated to assisting health care providers with the following:

- Referrals to any MD Anderson center or location
- Continuous follow-up on the status of referrals
- Answers to questions about patient access procedures
- Support with our online physician portal

Physician portal

Our secure, HIPPA-compliant portal is available for health care providers to take an active role in managing patient care at MD Anderson. After creating a [myMDAnderson for Physicians](#) account, you can:

- Access patient appointment schedules
- Access transcribed patient reports and results
- Receive notifications regarding referral status and results
- Easily update your profile and contact information

For information on our breast imaging faculty, visit our [directory](#).

Patient self-schedule

Phone: 844-240-7092

Annual breast screening mammograms are recommended at age 40.

To learn more about higher risk screening guidelines, visit our [Clinical Practice Algorithms page](#).
