welcome
to the Children’s Cancer Hospital at M. D. Anderson Cancer Center
If your child is facing cancer, you want the best care possible. The Children’s Cancer Hospital at The University of Texas M. D. Anderson Cancer Center focuses on one thing: caring for children, adolescents and young adults with cancer.

M. D. Anderson may seem like a large place, but at the Children’s Cancer Hospital, we have created a kid-friendly, family-friendly environment staffed by experts specially trained to work with children with cancer. This packet will help guide you through your initial diagnosis and the days to come.

You may have a million thoughts running through your mind right now, but rest assured that you are at the No. 1 hospital in the nation for treating cancer with one of the top ranked pediatric oncology programs. We work hard to provide you with an accurate diagnosis, the best treatment plan, and a care program that centers around the physical, emotional and social well-being of your child. We’re here to answer your questions, suggest options or simply listen.

At the Children’s Cancer Hospital, kids rule – not cancer. We plan to keep it that way.

Eugenie Kleinerman, M.D.
Division Head, Pediatrics and the Children’s Cancer Hospital
The University of Texas M. D. Anderson Cancer Center
Dear Patients and Families,

On behalf of parents and family members, I would like to welcome you to the Children’s Cancer Hospital at The University of Texas M. D. Anderson Cancer Center. The word “welcome” may seem unfitting because this is the last place you want to be. With all the uncertainty to follow, please know that you are in the best hands possible – the best doctors and health care team are here to walk with you every step of the way.

I remember feeling sad, fearful and very anxious, and I’ll bet that you have some of these same feelings. I remember very well our first visit to M. D. Anderson, more than two years ago, and how overwhelmed my family and I felt as we began learning about our child’s diagnosis and treatment options. I can tell you that we were always treated with dignity and respect and felt like a true partner as our journey unfolded. Through the many ups and downs, the treatment team was always there to answer our questions, collaborate with us and support us.

After my child completed her cancer treatment, I was hired as a Parent Coordinator for the Children’s Cancer Hospital. I am here to help lend a “family voice” to everything we do. If I can ever be of help to you, I hope you will contact me.

Keep asking questions and encourage your child, teen and family members to do the same. Open communication and information sharing are the cornerstones of a successful partnership and treatment plan.

Again, welcome to the Children’s Cancer Hospital where we are making cancer history!

Sincerely,

Rhonda Armstrong-Trevino
Parent Coordinator
Children’s Cancer Hospital

Who We Are
For more than six decades, the Children’s Cancer Hospital at The University of Texas M. D. Anderson Cancer Center has been making cancer history for pediatric patients.

The Children’s Cancer Hospital is a community of its own within M. D. Anderson. All of our faculty and staff are trained and experienced in caring for young patients with cancer. We see close to 1,700 children, adolescents and young adults from all over the world annually. Because our primary focus is cancer, we see more types of cancer than any other children’s hospital in Houston or Texas.

Most importantly, at the Children’s Cancer Hospital, kids rule – not cancer!

What We Do
At the Children’s Cancer Hospital, we treat the whole child, not just the cancer. Each patient has a team of treatment specialists to address any cancer-related issues, whether they are medical, psychological or developmental. Treatments are designed for minimal interference to your child’s normal routine. Because a familiar face means so much to children, all patients see the same physician throughout their treatment. Patients and families always know who “their” doctor is.

We also make sure that life after cancer is the best it can be. Our survivorship program monitors and manages any side effects of cancer or its treatments. Counseling and support groups help the parents and the child overcome any fears and concerns.

What We Offer You
• Family-centered care
  - The philosophy of partnering with families to provide the best care for every patient
  - A Family Advisory Council and other committees made up of parents and staff that guide the Children’s Cancer Hospital in its decision- and policy-making

• The latest novel therapies and technologies such as:
  - Proton therapy
  - Aerosol chemotherapy
  - Cell therapy
  - PET/CT fusion imaging
  - BrainSUITE

• A team of medical and support specialists
  - More than 30 faculty and 50 full-time registered nurses and nurse practitioners
  - Sub-specialists in pediatric neuro-surgery, radiology and other fields
  - Child and adolescent life specialists, social workers and chaplains
  - Educational teachers for continuous schooling during treatment
  - Psychological and developmental specialists

Most importantly, we offer you hope when you need it most.
What to Expect During Your Visit

Knowing what to expect can help you and your child prepare for your visit to the Children’s Cancer Hospital. Here’s a brief overview of what your daily visits may be like. Most families faced with cancer would agree that the first few visits are overwhelming. It may be helpful to bring someone with you to take notes during your visits so that you can focus on the discussions with your child’s doctor. A journal and tape recorder are helpful, too.

Check-In

It is important that you arrive on time for all of your scheduled appointments, but if something occurs that impacts your arrival time, please notify the clinic at (713) 792-6610.

- Parking – If this is your first visit, valet park at the main entrance, and our patient access center will validate your parking. If you need additional assistance with parking, please contact your social worker to be connected to available resources.
- Sign in at the Robin Bush Child and Adolescent Clinic – Once you check in, the assistant will give your child an identification bracelet with his/her medical number.
- Have blood drawn – Before your child sees the doctor, he/she will be called to have his/her blood drawn by one of our pediatric nurses.
- Wait to be called back to the exam room – While you wait to see your doctor, your child is welcome to play in our playroom.
- People you may meet:
  - Child Life Specialist – Child life specialists are here to make your child feel comfortable and to help your child understand his/her diagnosis and treatment.
  - Social Worker – Social workers help families with financial, lodging and other practical needs.
  - Patient Advocate – Your patient advocate is your liaison for patient care concerns or if you need help finding the right person to contact for any issue.

Medical Examination

A nurse will call your child’s name when it’s time to go back to the exam room. Once in your room, you will go through a routine process:

- Taking vital signs – A nurse or assistant will measure your child’s temperature, height, weight, blood pressure and heart rate.
- Review medical history – The nurse will review your child’s medical history, and you may be asked some additional questions.
- Meet your doctor and health care team – After the initial assessment, you will meet your child’s pediatric oncologist who will complete the examination. Since M. D. Anderson is a teaching hospital, there may be occasions when medical students will join your doctor at your child’s appointment.

What to Bring

Since your first few visits may involve several appointments resulting in long days, we have some suggestions to help these times go more smoothly:

- Bring a special item from home – There are toys to play with in the playroom, but you may want to pack a special item, such as a blanket or favorite toy, that may be of comfort to your child.
- Pack your entertainment accessories – Having handheld electronic games and DVD players, books and other forms of entertainment with you will help keep your child occupied between appointments.
- Bring an overnight bag – Sometimes, a hospital admission will be recommended by your doctor. You may want to pack an overnight bag with a change of clothes in case you and your child need to stay.
- Pack snacks or dietary necessities – Occasionally, wait times can be longer than expected, so it may be useful to bring some snacks or cash for the vending machines or the cafeteria. If your child requires formula or has diet restrictions, you should bring extra food items with you. Also, please be considerate of patients who are fasting.

Helpful Tips

- Keep a journal – This reference tool will help you keep track of your child’s treatment including any reactions or side effects. Also use it to write down any questions between appointments that you want to ask the nurse or doctor.
- Make a special calendar – Your schedule can fill up quickly with appointments, so it may be helpful to create a special calendar to keep track.
- Make a list – Often, friends and family will ask you what they can do to help. Make a list of common duties they can help with such as providing meals, picking up your other children from activities, cleaning the house, doing the yard, etc. Allowing others to fulfill these requests will not only help you, but it will also let the other person feel like they are doing something constructive for you. One useful Web site to help you organize a list online is www.letsahelpinghands.com.

If you have any questions prior to or after your visit, please call our Patient Access Center at (713) 792-5410.
Your Health Care Team

As a parent, you are part of the team that will take care of your child. Depending on your child’s needs, any of the following people may be on your health care team.

**Attending Physician**
A doctor who specializes in cancer and supervises the medical care of your child.

**Advance Practice Nurse/Nurse Practitioner**
A nurse who has completed a master’s program and specialty training in caring for children with cancer. He/she may coordinate the medical and nursing care of your child.

**Candlelighters**
Candlelighters are parent consultants who know what it’s like to have a child with cancer and are here to help other children and families cope with the day-to-day trials of dealing with cancer. They offer many practical resources to families.

**Child Life Specialist**
A person who has special training in child development and how children react to illness and being in the hospital. A child life or adolescent life specialist helps children, adolescents and young adults cope with cancer and its treatment.

**Chaplain**
A person who is trained to offer spiritual care, support and prayer according to each family’s individual needs and customs.

**Fellow**
A doctor who has completed medical school and a pediatric residency and is now receiving specialty training in pediatric hematology/oncology or stem cell transplantation.

**House Officer/Resident**
A doctor who has completed medical school and is now receiving specialty training in pediatrics.

**Nurse**
A person who has successfully completed nursing school and is licensed by the state to provide nursing care and teaching to children and their families in the hospital and clinic.

**Nutritionist**
A person who is trained to evaluate your child’s nutritional needs and weight. The nutritionist also helps to provide teaching and support about eating and drinking when your child goes home.

**Patient Advocate**
Every patient is assigned a patient advocate. Patient advocates are available to help patients and families with any complaints or concerns they have about their care at the hospital. They can also help guide patients in the right direction with specific questions.

**Pharmacist**
A person who is trained to prepare the medicines and nutritional support that your child will need.

**Physical Therapist**
A person who works with your child to maintain or restore a level of fitness through strength and endurance exercises.

**Physician Assistant**
A physician assistant is trained to the level of a first-year medical resident. He/she works under the direct supervision of the physician and may handle physical exams, routine medical cases and can prescribe medications.

**Psychiatrist/Psychologist**
A doctor who can help your child and family with emotional distress, changes in behavior, and diagnosing learning difficulties. Consultation with a psychiatrist or psychologist requires a referral by your pediatric oncologist.

**School Teacher/Liaison**
An educational professional who works in the hospital’s comprehensive education program and school to help your child maintain academic success during treatment. The educational liaison works with your child’s community school, homebound teachers and other medical professionals to assist with advocacy needs and school re-entry.

**Social Worker**
A person who is trained to help you and your child cope with illness and hospitalization through counseling, support groups, financial assistance and resource referral.

**Volunteer**
A person who is trained as an unpaid helper to provide non-medical activities for your child.

Content partially provided by CureSearch Children’s Oncology Group Family Handbook
Our Programs and Services

Candlelighters
(713) 792-4891
Candlelighters is a support group for parents. Parent consultants based at the Children’s Cancer Hospital provide information, support for families, and practical assistance such as parking passes, gas cards, meal passes and grocery store gift certificates. Services and programs, such as scholarships, camps and other fun activities, are offered to area families of pediatric cancer patients and long-term childhood cancer survivors. Parent support groups are held every Wednesday from 11:30 a.m. – 1 p.m. in the Family Room on the 9th floor of the pediatric inpatient unit.

Chaplaincy
(713) 792-7184
Chapel (Main Building, 1st floor, near the Café Corner)
Chapel (Mays Clinic, 2nd floor, near the Tree Sculpture)
Muslim Prayer Room (Main Building, 3rd floor, near Elevator E)
The Children’s Cancer Hospital considers the spiritual care of its patients and families a vital part of the care it provides. A full-time staff pediatric chaplain makes regular visits and responds to the emotional and spiritual needs of young patients and their families in all areas, including the clinic, inpatient units, surgery and emergency center. During evening, weekend and holiday hours, “on call” chaplains, stationed 24/7 in the hospital, provide such services. Chaplains also develop and lead daily (except Saturday) and special religious holiday services.

Child Life Program
(713) 563-1868
Child and adolescent life specialists understand the impact of a chronic illness, painful procedures and repeated hospital stays on infants, children, adolescents and young adults. This program is designed to reduce the dramatic impact of cancer and other hospital experiences on the patient and the family. Child and adolescent life specialists help children, adolescents and young adults with cancer maintain a sense of control and normalcy in their lives. The program provides education and support geared towards a child’s level of understanding, as well as opportunities for play, self-expression and peer interaction. Specialists guide patients through complex medical procedures, accompany them to surgery and teach them ways to cope with painful procedures.

Pediatric Clinical Research Support
(713) 794-1960
The pediatric clinical research staff is composed of research nurses and clinical research coordinators. They direct and coordinate patient care during a clinical trial. They also teach the patient about participation in the clinical trial, make sure that the protocol’s instructions are being followed, help manage data from clinical trials and keep the patient and health care team updated of any changes in the study.

Department of Social Work
(713) 792-6195
Main Building, 2nd floor, near Elevator C, Room 2.2503
Monday – Friday, 8 a.m. - 5 p.m.
Social workers are licensed professional counselors who are available to assist patients and family members during the entire course of care at M. D. Anderson Cancer Center. They work with both outpatients and inpatients to help address coping, adjustment and financial concerns and provide education and connection with community resources. Services include counseling, linkage with community and M. D. Anderson resources, advance directives and financial assistance when needed.

Pediatric Education Program
(713) 745-5059
George Foreman Pediatric and Adolescent Inpatient Unit, 9th floor
The pediatric education program helps patients continue their schooling during treatment by offering a variety of services. Qualified specialists at the hospital provide academic instruction and enrichment (grades K - 12), consultation with community schools, educational counseling and school re-entry services, bedside instruction, educational field trips, GED and SAT preparation, and resources to parents.

Language Assistance Program
(713)-792-7930; After hours (713) 792-7090
The members of the language assistance team are involved whenever there is a language barrier between the patient and the staff. Their task is to interpret/translate from one language to another, and they play a crucial role in staff-patient communications. Interpretation services are provided in the following languages at no cost to the patient: Spanish, Portuguese, Arabic, Turkish, Mandarin, Italian, German, French and Vietnamese. Other languages, including sign language, are available through reputable translation agencies and usually require a 24-hour notice to make the necessary arrangements. Also available is a 24-hour telephone service provided by Language Line, when the need is urgent and no on-site interpreter is available.

Patient Advocacy
(713) 792-7776
Main Building, 3rd floor, near Elevator E, Room G3.3240
Mays Clinic, 2nd floor, near the Tree Sculpture, Room ACB2.1508
Every patient is assigned a patient advocate when they come to M. D. Anderson. Your patient advocate is here to help with any concerns and complaints you may have or when you are unsure where to go with questions. When you arrive for your first appointment, you will meet your patient advocate. For emergencies after hours or on the weekends, call the page operator at (713) 792-7090.
Place … of wellness
(713) 794-4700
Main Building, 1st floor
Mays Clinic, 2nd floor, near the Tree Sculpture, Room ACB2.1041
Monday – Friday, 9 a.m. - 5 p.m.

Place … of wellness is an environment where all persons touched by cancer may enhance quality of life through programs that complement medical care and focus on the mind, body and spirit. Place … of wellness offers more than 75 programs, such as yoga, tai chi, meditation, lectures on complementary and integrative therapies, daily counseling, support groups and family discussion groups. Most programs are offered free of charge, with the exception of acupuncture and full body massage, which require a nominal fee. Place … of wellness is offered to anyone touched by cancer, their family members and caregivers, whether or not they were treated at M. D. Anderson. No physician referral is required.

Psychological Counseling
(713) 794-4467 or (713) 745-5658
Counseling with a psychologist is available to patients and their families at the Children’s Cancer Hospital. For many people, illness and treatment bring new concerns. Common issues for patients include: change in appearance, change in ability to do the things they would normally do, completing treatments and prescriptions, pain, stress, strong emotions such as worry and sadness, and difficulty sleeping. It may happen that a patient’s parents or hospital staff notice changes in behavior or mood and suggest the patient schedule an appointment with the psychologist. To schedule an appointment with a psychologist, patients can ask their physician for a referral. The service has a fee, which is usually covered by your insurance.

Neuropsychology
(713) 794-4066
Some types of cancer and cancer treatments can affect a person’s ability to learn. Neurocognitive assessment is offered to patients who are concerned about changes in learning ability. A physician initiates the service with a referral, either upon the patient’s request, the patient’s parent’s request, or when the patient’s cancer or cancer treatment is known to affect learning ability. The test results guide those who teach, as well as guide the patient, to make important decisions about his/her education.

Adolescent and Young Adult (AYA) Program
(713) 794-1960
The Adolescent and Young Adult (AYA) program is offered to help young cancer patients and survivors cope with their disease and its effects. AYA is a comprehensive program with medical, psychological, social, educational and vocational services specifically for teens and young adults. Visit www.mdanderson.org/aya for more information.

Childhood Cancer Survivors Program
(713) 792-6610
Robin Bush Child and Adolescent Clinic
The Childhood Cancer Survivors Program helps childhood cancer survivors overcome physical, psychological and developmental problems that may result from cancer or its treatments. Because we’ve successfully treated thousands of children and adolescents, we can anticipate many long-term side effects and create individualized monitoring and treatment programs to minimize the impact. Services provided in the survivor clinic include complete physical examinations, blood work and X-rays, regular cancer screenings, evaluation of risks related to previous cancer therapies, screening for risks of therapy, advice about healthy lifestyle for survivors, summarized reports to the primary care physician, referral to medical specialists and genetic counseling.

Children’s Art Project
(800) 231-1580
The Children’s Art Project is a creative arts program that features artwork from Children’s Cancer Hospital patients on seasonal notecards and gifts. All proceeds from the sale of these products return to M. D. Anderson to benefit patient-focused programs such as the in-hospital classrooms, the Child Life Program, summer camps, college scholarships, “pedi parties” and much more. The programs enable pediatric patients to continue to focus on the business of being a child. Classes are provided each week in the PediDome on the 9th floor for patients to work in different art mediums, and bedside art instruction is also available. For more information, visit www.childrensart.org.

Family Advisory Council
(713) 563-5481
Family-centered care is a philosophy that partners pediatric caregivers with health care professionals in caring for the child as well as in the decision-making processes of the Children’s Cancer Hospital. A Family Advisory Council of parents and staff that meets monthly gives parents and caregivers the opportunity to suggest ideas and offer opinions, influence the planning and implementation of initiatives, and give input on facility design, hiring processes, policy making and patient care projects.

Pediatric Caregiver Telephone Support Network
(800) 345-6324
The Pediatric Caregiver Telephone Support Network at M. D. Anderson provides hope and support to those caring for children diagnosed with cancer by connecting them via telephone with other pediatric caregivers and adult survivors of childhood cancers who have had a similar experience or diagnosis. The telephone network is facilitated and run by Anderson Network, a program of the Department of Volunteer Services at M. D. Anderson.
Education Program

If your child is diagnosed with cancer, treatment and appointments may disrupt your child's regular school routine. The Children's Cancer Hospital’s Pediatric Education Program will help your child stay on grade-level with his/her schooling during treatment.

Qualified educators at the hospital provide academic instruction and enrichment, consultation with community schools, educational counseling and school re-entry services, bedside instruction, educational field trips, GED and SAT preparation, and resources to parents. You may choose one of six educational plan options for your child's schoolwork. To speak with an education specialist about enrolling your child in one of the options, please call (713) 745-5059.

Hospital School

This option is for both inpatients and outpatients in grades K-12. Students are encouraged to attend classes at the hospital Monday through Friday but are welcome to attend any day they are on campus, even if it is just a few days a week. The Hospital School is staffed with certified teachers in elementary education, secondary education and special education.

Hospital/Homebound School

This option is a combination of Hospital School (for the days you may be inpatient or at our outpatient clinic) and Homebound School (for days you are at home) that we can help you arrange through your school district.

Homebound Only

Homebound Schooling is offered through each individual’s school district. We can help facilitate the needed paperwork for these services to start. This schooling option will give students at-home instruction 1 - 2 days a week for a maximum of four hours.

Virtual School (3rd - 8th graders – FREE)

This is considered an alternative school placement, and students are enrolled into this school versus being enrolled in a community school. This option is FREE to the families, and the Virtual School provides all supplies, including a computer and printer, as long as the student is enrolled. This option allows patients to log on wherever they are located – whether in the hospital or at home – so they can optimize schooling in all settings. Instructions and assignments are provided online. Plus, students can call in and speak with a teacher for assignment assistance.

Virtual Academy (high school students – fee per class)

This option allows high school students to take classes online through a Virtual Academy, which assists students in meeting their required courses for graduation. Each class has a cost associated with it, and parents are responsible for paying this cost.

Virtual School/Academy Combined with Hospital School

This selection is optimal as it allows the student to be enrolled in a Virtual School/Academy but also attend Hospital School on days when they are inpatient or outpatient. Hospital School classes can supplement anything that a student is or is not taking through the Virtual School or Academy. With this choice, our certified teachers are available to assist students with their virtual class assignments. In addition to the Pediatric Education Program, the Adolescent and Young Adult Program offers vocational counseling, college entrance preparation and scholarship assistance to older pediatric patients. Contact (713) 793-6868 for more information on these services.

When to Call Us:

Outpatient Clinic: (713) 792-6610
Robin Bush Child and Adolescent Clinic
Monday through Friday, 8 a.m. to 5 p.m.

Inpatient Unit: (713) 792-5173 or (713) 792-5150
George E. Foreman Pediatric and Adolescent Inpatient Unit (G9 West)
Monday through Friday after 5 p.m.

Emergency Center: (713) 792-3722
For nights, weekends and holidays
(Be prepared to go to the nearest emergency room if you are more than 45 minutes away.)

Call the above numbers immediately if your child has:

- Fever of 100.5°F (38.0°C) or higher - Do not take any medicine to reduce the fever, unless otherwise instructed by your child’s doctor. Do not wait for your child’s temperature to rise.
- Signs of infection - Pain, redness or swelling anywhere in the body (sore throat, ear ache, stiff neck, pain or burning when urinating or having a bowel movement, pain or redness at the central line/portacath site), chills, open sores on the lips, tongue or gums or near the rectal area.
- An exposure to chicken pox.
- Bleeding - Nose bleed or bleeding from the gums that does not stop within 5 - 10 minutes of gentle pressure, blood in the urine or stool, vomit that looks black, easy bruising or tiny, red freckles on the skin.
- Shortness of breath, difficulty breathing and/or persistent cough.
- A change in behavior or level of consciousness - Being very sleepy and being very irritable or not making sense when talking.
- Nausea (feeling sick to your stomach) or vomiting that cannot be stopped with medicine.
- Severe headache when he/she wakes up.
- Diarrhea (more than four loose stools in eight hours) and/or constipation for longer than 3 days.
- Unable to take or keep fluids down for six hours.
- Break in the central line.
- Uncontrolled pain even when taking pain medications.
- Other new symptoms your child did not have before.

Call 911 or emergency services immediately if your child:

- Cannot breathe.
- Is not able to wake up.
- Is having a seizure.
